

NOUR TAHA

nourtaha091@gmail.com | +1 (313) 726-3907 | Dearborn, MI | <https://www.linkedin.com/in/nour-taha-a82921254>

EDUCATION

MS in Artificial Intelligence, Wayne State University — Detroit, MI (Expected 2027)

BS in Computer Science, Lebanese University — Hadath, Lebanon (Oct 2021 – Aug 2024)

EXPERIENCE

AI Engineer Intern, Cogent Softech LLC — Dearborn, MI (Nov 2024 – Jul 2025)

- Developed a real time OCR based number recognition system using advanced computer vision techniques.
- Built a real time speech to text transcription system using Whisper AI, processing continuous audio with <2s latency.
- Integrated LLMs with LangChain and implemented a RAG system, improving AI response relevance by 30% through external knowledge sources.

Software Engineer Intern, Wakilni — Beirut, Lebanon (Jul 2024 – Oct 2024)

- Developed a photo viewer with pinch to zoom, video player, and integrated search with pagination, reducing search latency by 50%.
- Improved UI/UX by integrating interactive components, skeleton loaders, and optimized CSS styling.
- Integrated third-party libraries and resolved dependency conflicts, contributing to a more stable and scalable app architecture.
- Upgraded React Native from 0.64 to 0.70.15, improving JavaScript performance by 20–30% and reducing app startup time by 15–20%.

Backend Software Engineer Intern, CGC — Beirut, Lebanon (Jan 2024 – Apr 2024)

- Developed and maintained backend services using Flask and FastAPI.
- Designed and integrated RESTful APIs, improving data access and application functionality.
- Enhanced database efficiency by optimizing MongoDB queries with indexing, aggregation pipelines, and query restructuring.

OTHER EXPERIENCE

Contestant, Lebanese Collegiate Programming Contest (LCPC) (Sep 2023)

- Ranked among top collegiate teams, enhancing problem-solving and algorithmic skills.
- Solved complex algorithmic challenges under time pressure, strengthening proficiency in data structures and algorithms.
- Enhanced coding efficiency and debugging skills while collaborating with team members in a competitive environment.

PROJECTS

QuickPick – Freelance Application

- Developed a React Native e-commerce app for buying/selling products.
- Integrated AI chatbot support and real-time messaging via custom API.

FitLife

- Built and deployed a full-stack Typescript fitness app using React, Vite, Tailwind CSS, and Framer Motion, featuring a responsive, interactive frontend and smooth animations. Deployed on Cloudflare Pages.

SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, C++, C

AI & LLMs: RAG, OpenAI API, NLP, Transformers, PyTorch

Frontend: React Native, React.js, Next.js, Tailwind CSS, Angular

Backend: Node.js, NestJS, Express.js, Flask, FastAPI

Database: MongoDB, MySQL, Firebase

Tools: Git, GitHub, Android Studio

Software Design: Object-Oriented Design, REST API Design, Microservices Architecture

Soft Skills: Problem Solving, Communication, Teamwork & Collaboration, Time Management, Leadership, Critical Thinking, Creativity

Languages: Arabic (Native), English (Fluent)
