

Obaid Mohammed

obaidvision24@gmail.com | 646-780-9309

PROFESSIONAL SUMMARY:

- **4+ years of experience** as a **Java/J2EE Developer** in **analysis, design, implementation, integration, testing, and maintenance** of applications using **Java/J2EE** and **object-oriented client-server technologies**.
- Strong understanding of **SDLC phases**, including **requirements gathering, analysis, design, development, testing, and implementation**, following methodologies like **Agile (Scrum)** and **Waterfall**.
- Proficient in **Core Java** concepts such as **multithreading, collections, exception handling, and garbage collection**.
- Expertise in **Object-Oriented Programming (OOP)** and **design patterns**, including **Singleton, Factory, Front Controller, DTO, DAO, Service Locator, and MVC architecture**.
- Experience in developing **web-based applications** using front-end technologies such as **HTML5, CSS3, Bootstrap, AJAX, JavaScript, jQuery, React.js, Node JS, Express JS and Angular**.
- Hands-on experience in building and consuming **RESTful APIs** and implementing **microservices architecture** using **Spring Boot, Spring Cloud, and Netflix Eureka**.
- Strong experience in **ORM frameworks** like **Hibernate, JPA, and Spring Data JPA** for **database interaction**.
- Proficient in **database technologies**, including **MySQL, Oracle, MongoDB, and Cassandra**.
- Experience working with **web and application servers** such as **Apache Tomcat, WebSphere, and WebLogic**.
- Expertise in **containerization and orchestration** using **Docker and Kubernetes**.
- Strong knowledge of **CI/CD pipelines** using **Jenkins** and **version control** with **Git**.
- Experience with **cloud platforms**, including **AWS services** like **EC2, S3, RDS, and Elastic Load Balancing**.
- Well-versed in writing **unit test cases** using **JUnit and Mockito** for **Test-Driven Development (TDD)**.
- Hands-on experience in **messaging technologies** such as **Apache Kafka** for **event-driven architectures**.
- Familiarity with **logging frameworks** like **SLF4J and Log4j** for **application monitoring and debugging**.

TECHNICAL SKILLS:

Programming Languages	C, C++, Java, JavaScript, Python, PL/SQL
Backend Development	Java, J2EE, Servlets, JSP, JDBC, JPA, JSTL, Spring, Spring Boot, Spring Security, Hibernate, Apache Kafka, Spring Cloud, Spring AOP, Spring Core, Spring IOC
Frontend Development	HTML, CSS, Bootstrap, JavaScript, React.js, Angular, jQuery, Node JS, Express JS
Databases	MySQL, Oracle, MongoDB, Cassandra
Web Services & APIs	RESTful Web Services, SOAP Web Services, JAX-RS, XML, JSON, WS-S, Postman API Testing, RESTful API
Cloud & DevOps	AWS (EC2, S3, RDS, Cloud Monitoring), Docker, Kubernetes, Jenkins
Development & Build Tools	Maven, Gradle, ANT
Testing & Debugging	JUnit, Mockito, Selenium
Version Control	Git, SVN, CVS
IDEs & Development Tools	Eclipse, IntelliJ IDEA, Spring Tool Suite(STS), NetBeans
Application Servers	WebSphere, WebLogic, JBoss, Apache Tomcat
Development Methodologies	Agile, Scrum, Waterfall, OOAD
Operating Systems	Windows, Linux, UNIX

EDUCATION:

Bradley University – Peoria, Illinois

Master of Science in Data Science

Osmania University – Hyderabad, India

Bachelor of Engineering in Computer Science

PROFESSIONAL EXPERIENCE:

Java Developer/Backend Developer, Workcog Inc | Little Elm, Texas

Jan 2024 – Dec 2024

Responsibilities:

- Involved in **SDLC cycle** like analysis, designing, developing, testing and deploying applications with active participation in scrum related activities and **daily scrum meetings**.
- Developed and deployed scalable enterprise applications using **Java, Spring Boot, Hibernate, and RESTful Web Services following Agile (Scrum) and Test-Driven Development (TDD) methodologies**.
- Designed and implemented microservices architecture using **Spring Cloud** and **Netflix Eureka** for service discovery and client-side load balancing.
- Built **RESTful Web Services** to handle **CRUD operations** and ensured seamless integration with databases using Spring Data JPA.
- Integrated **Apache Kafka** for event-driven messaging between microservices and REST APIs.
- Implemented **authentication and authorization** using **Spring Security and JWT tokens** to enhance security.
- Developed reusable UI components in **React.js with Redux Architecture**, improving the front-end user experience.
- Designed and built dynamic user interfaces using **HTML5, CSS3, JavaScript, AJAX, Bootstrap, and React.js**.
- Used **Postman** for API testing and debugging to ensure reliable application functionality.
- Developed and executed unit tests using **JUnit and Mockito**, maintaining high code quality and test coverage.
- Worked with **Docker and Kubernetes** to containerize applications and manage deployments efficiently.
- Configured **CI/CD pipelines** using Jenkins for automated build, test, and deployment processes.
- Implemented ORM-based database operations using **Hibernate, JPA, MySQL, and NoSQL (MongoDB)**.
- Created and optimized SQL scripts and stored procedures using PL/SQL for improved database performance.
- Used **SLF4J** and **Log4j** for application logging and monitoring.

Environment: Java, Spring (Spring Boot, Cloud, Security), Hibernate, JPA, RESTful APIs, SOAP Web Services, React.js, Redux, HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL, MongoDB, Apache Kafka, AWS, Docker, Kubernetes, Jenkins, PL/SQL, JUnit, Mockito, Postman, Git, SLF4J, Log4j.

Java Developer, Logisoft IT Services | Hyderabad, India

Sept 2019 – Dec 2022

Responsibilities:

- Designed and developed object-oriented applications using **OOA (Object-Oriented Analysis) and OOD (Object-Oriented Design)** techniques.
- Provided **bug fixes** and **production support**, ensuring system stability and resolving issues efficiently.
- Developed and maintained dynamic web pages using **HTML, JSP, and JavaScript** for improved user experience.
- Implemented client-side validations using **JavaScript** to enhance form security and usability.
- Built responsive UI components using **Angular**, integrating with APIs to dynamically render the **Virtual DOM**.
- Developed backend functionality using **Java Servlets, JSP, and J2EE beans** for web applications.
- Worked with **Eclipse IDE** for development, testing, and deployment of Java applications.
- Processed and imported client data into databases using **XML parsing** techniques.
- Collaborated with the **QA team** to prepare and review test cases, ensuring high-quality software releases.
- Integrated **Hibernate ORM** with **Spring Framework**, facilitating efficient data persistence.
- Implemented database operations using **Hibernate** with **MySQL**, leveraging **Criteria API** for dynamic queries.
- Used **Hibernate features**, including inheritance, lazy loading, dirty bit checking, locking, and transactions.
- Developed and maintained XML-based Hibernate mappings, ensuring efficient **Object-Relational Mapping (ORM)**.
- Conducted **code reviews**, performed unit testing, and refactored code using **JUnit** and **Mockito** to improve quality.
- Utilized **Git and GitHub** for version control, managing code repositories in a collaborative environment.

Environment: Java, J2EE, JSP, Servlets, Spring Framework, Hibernate, MySQL, Angular, JavaScript, HTML, XML, Git, GitHub, JUnit, Mockito, Eclipse IDE
