Career Objective

Full-stack software engineer with several years of experience creating scalable web and mobile applications. Experienced across front-end and back-end development with additional exposure to security practices, adaptable to evolving technologies and organizational needs. Committed to delivering impactful solutions through clean code, modern frameworks, and collaborative problem-solving.

Technical Skills

- Languages & Frameworks: HTML/CSS, JavaScript/TypeScript, Java, Python, SQL, React (React Native), Angular (v9–v12), jQuery, Jest, Selenium, Expo.
- Tools & Environments: VS Code, IntelliJ IDEA, Git (GitHub, Bitbucket), Jenkins, Gradle, Postman, Jira, Splunk, Apache Tomcat, Node.js, Flask, Windows, Linux, Bash.
- Methodologies: Agile/Scrum, Waterfall.

Education & Certification

- B.S. in Computer Science, Montana State University – Bozeman, MT | 09/2016 – 12/2019
- A.A.S. in Computer Technology/Programming, Helena College – Helena, MT | 09/2013 – 05/2016
- CompTIA Security+ (SY0-701) – Self-studied – Manassas, VA | 05/2025 – 08/2025

Experience

Software Engineer at Arcos LLC – Manassas, VA | 05/2021 – 01/2024

- Collaborated on Agile teams to build and maintain SaaS web/mobile solutions by migrating front-end from AngularJS to Angular (v9-v12) and React Native, adding Jest unit tests, developing backend data logic/integrations in Oracle PL/SQL, and supporting both new and legacy features.
- Enhanced application security by integrating AWS Secrets Manager and S3 with Java (JWT-based access), and modernized legacy authentication flows using a Node.js bridge.
- Automated builds and enforced code quality/security by integrating SonarQube, Gradle, and Jenkins into CI/CD workflows.
- **Tech Stack:** HTML, CSS, JavaScript, TypeScript, Angular 9+, React, React Native, Redux, Jest, Expo, JSP, Java, Git, PL/SQL, RESTful, Postman, Splunk, Jenkins, Gradle, SonarQube, Linux Bash/Shell Scripting, Jira.

Software Developer at Montana Department of Justice – Helena, MT | 02/2020 – 05/2021

- Maintained/created plugins for WordPress and Moodle; updated and decompiled legacy .NET apps with ILSpy to enable framework migration.
- Created internal process documentation, user guides, and app update notes to improve operations and knowledge sharing.
- Supported intranet users by managing site updates, resolving technical issues, and exploring Python and ArcGIS APIs to automate tasks and process geospatial data.
- **Tech Stack:** HTML, CSS, JavaScript, jQuery, PHP, C# .Net, ILSpy, Python 3, ArcGIS, WordPress.

Web Developer at Montana State University – Bozeman, MT | 09/2016 – 05/2017.

- Collaborated in a team of three developers on full-stack development of an intranet web application for campus users.
- Leveraged a PHP-based CMS (Omni CMS) to implement back-end functionality and streamline content updates for university staff.
- Designed and developed responsive front-end interfaces with HTML, CSS, and JavaScript, performing testing and debugging to ensure cross-browser compatibility and seamless performance.
- **Tech Stack:** HTML, CSS, JavaScript, PHP, Omni CMS, FileZilla, Bugzilla.

Web Developer Intern at Montana Department of Labor – Helena, MT | 10/2015 – 03/2016.

- Collaborated in a team of two developers and one UI/UX, contributing to web development and documentation.
- Designed and implemented front-end components with HTML, CSS, JavaScript, and jQuery to improve user experience and ensure cross-browser compatibility.
- Contributed to back-end development with .NET and C#, integrating new features into the DotNetNuke CMS.
- Developed custom DotNetNuke components to extend system functionality and improve usability.
- **Tech Stack:** HTML, CSS, JavaScript, jQuery, .Net, C#, DotNetNuke CMS.

Software/Programming Projects

Python Machine Learning Demo – Manassas, VA | 01/2025 – 03/2025

- Developed an AI/ML demo with PyTorch, pandas, and NumPy covering data preprocessing, feature engineering, and predictive modeling; containerized with Docker for consistent local/remote runs.
- GitHub: <https://github.com/QuaziBit/BasicStockCryptoMLModel>.
- **Tech Stack:** Python, NumPy, pandas, PyTorch, Docker, Bash, Git.

Python Full-stack Development – Manassas, VA | 06/2024 – 01/2025

- Developed both a traditional website and a React.js SPA, sharing a Flask/SQLite backend, integrating a GPT-3.5 chatbot trained on a custom dataset.
- Website: <https://www.alex-mtv.com/>.
- **Tech Stack:** HTML, CSS, JS/TS, React, Redux, Python 3, Flask, jQuery, SQLite, OpenAI APIs, Git.
