Professional Experience

Business Analyst, *Energysys*

06/2023 – present | Remote, USA

- Leads and facilitates complex requirement gathering sessions with stakeholders from diverse departments. Documents and prioritizes business and functional requirements, using Jira, while ensuring alignment with organizational goals.
- Harnesses expertise to extract actionable insights from large and intricate datasets. Develops and presents data-driven reports, dashboards, and presentations using Microsoft Power BI, aiding leadership and stakeholders in informed decision-making.
- Analyzes complex datasets to identify trends, patterns, and insights that inform decision-making. Utilizes data to drive business process improvements and make strategic recommendations.
- Applies advanced data analysis techniques to extract valuable insights from extensive datasets using Tableau. Identifies key performance indicators (KPIs) and trends to inform strategic decision-making and drive business growth.
- Collaborates effectively with cross-functional teams, including IT, finance, marketing, and operations. Bridges communication gaps to ensure seamless project delivery and facilitate effective teamwork.
- Creates detailed business requirement documents, functional specifications, and process diagrams. Maintains accurate and up-to-date documentation throughout the project lifecycle using Oracle EBS.
- Utilizes project management skills to oversee end-to-end project lifecycles. Develops comprehensive project plans, tracks progress, manages risks, and ensures timely delivery of high-quality solutions aligned with business objectives.
- Partners with cross-functional teams to identify areas for process improvement. Develops and implements strategies to streamline workflows and increase operational efficiency.
- Serves as a liaison between technical and non-technical teams for project success. Builds strong relationships with business partners to ensure successful project outcomes.

Business Analyst, Elevance Health

06/2022 – 06/2023 | Remote, USA

- Innovated the LOE Estimates Repository for 50 IT projects, supporting budgeting and providing insights for Monthly Valuation Adjustment budget forecasts.
- Charged for analyzing risk patterns (KRI's) across 3 projects using employee responses and data visualization, customized 2 SharePoint dashboards for data aggregation. Supported business analysis through project planning, coordination, technical reports, setting up Key Performance Indicators (KPI's) and program evaluations.
- Experienced in comprehensive Quality Management (QM) and User Acceptance Testing (UAT) to ensure software functionality and enhance user experience.
- Played a vital role in identifying data sources using Salesforce.com and contributed to developing a navigational dashboard linking 8 dashboards and 6 sites.
- Improved quality outcomes by modifying 5 Tableau dashboards for 3 projects within budget as per requirements.
- Assisted in an Agile based project for the 'Omnichannel for Medicare' pilot, enhancing member experience through a prototype leveraging cloud services utilizing data insights from multiple vendors offering supplemental benefits.

Business Analyst, Genpact Solutions

05/2020 – 07/2021 | Pune, India

- Conducted a thorough analysis of customer retention rates, behavior, and purchase patterns using data analytics tools such as Excel and/or SQL.
- Collaborated with cross-functional teams such as sales, marketing, and product to gather relevant data and insights on customer behavior.
- Led the development of a comprehensive customer retention strategy that included segmentation, targeting, and positioning tactics to improve customer loyalty and reduce churn.
- Conducted customer research and analysis to identify customer needs, preferences, and pain points to inform personalized communication and loyalty programs.
- Tracked and analyzed the impact of the initiative on customer retention rates, customer lifetime value, and other relevant metrics to measure the success of the project.

Business Analyst, Kuehne + Nagel Pvt Ltd

06/2018 – 04/2020 | Mumbai, India

- Developed and executed highly successful CRM strategies tailored to SME businesses, resulting in the acquisition of 40+ new clients and a substantial increase in revenue.
- Led a team of 5 professionals in conducting comprehensive B2B market research, delivering actionable insights that fueled a remarkable 20% business growth.
- Leveraged data analysis techniques to integrate historical customer data into company systems, optimizing warehouse operations. This initiative led to improved space utilization, enhanced inventory management, and the creation of sustainable sales pipelines.
- Implemented internal dashboards for 200+ sales accounts, leveraging Power BI for real-time data insights to drive decision-making. Designed and implemented ERP systems to provide end-to-end supply chain solutions, aligning with Standard Operating Procedures (SOPs).
- Successfully negotiated spot and transactional business pricing for 5+ Key Accounts, securing favorable quotes from carriers. Proficiently captured customer requirements throughout the supply chain, resulting in \$35,000 in profits.
- Pioneered the introduction of Ui Path's Robotics Process Automation (RPA) through a pilot program, saving 4 hours of manual processing time per task.
- Served as the primary point of contact for clients, airlines, and shipping lines. Led in-depth market analysis to identify growth opportunities and refine target market strategies.
