

Evan Hopper

Data Analysis & Enterprise Reporting Expert

Professional Experience

June 2019 - Present

RSM US LLP. | Data Analytics & Business Intelligence Consultant

Supervisor (2023 - Present)

- Professional data modeling & reporting Subject Matter Expert helping healthcare and tech/media clients to improve the way they process and analyze data across departments and enabling self-service analytics.
- Oversee 10 client delivery development teams of 2-3 associate-level analysts to produce data warehouse solutions along with business critical dashboards and analytics using market leading data tools, such as Microsoft Azure Stack, Tableau, and Power BI/Fabric,
- Presented to audiences of 50+ Microsoft technologists at official 3 official Microsoft conferences to explain complex Power BI and data integration solutions.
- Maximized customer conversion by utilizing knowledge of data analytics platforms to drive over \$3 million in project revenue over the past fiscal year.
- Analyze customer data from both 1P & 3P proprietary datasets using SQL functions such as aggregations, subqueries, and window functions to identify trends and patterns that drive future A/B testing strategies.

Senior Associate (2021 - 2023)

- Key technical resource for data model and visualization development for a variety of 3-6 month client engagements.
- Translate business requirements into SQL queries to extract raw data from CRM, ERP, and EMR applications.
- Use Microsoft Azure Stack cloud data tools, such as Azure Synapse using SQL & PySpark (Python) to setup ETL processes geared toward cost savings and performance.
- Deliver custom Power BI and Tableau training to clients to drive adoption and enable business users to create their own analyses.

Associate (2020 - 2021)

- Create interactive reports for healthcare and financial services clients using Power BI & Tableau to drive data-driven decision making, optimized processes, and improved data quality.
- Conducted interviews with various departments and assessed current state data architecture for 6 clients to provide a strategic data analytics roadmap, which included data architecture, reporting, and governance recommendations.
- Employed SQL Server, Azure Data Lake, & Azure Data Factory to co-develop 3 separate data warehouse models extracting data from API, SFTP, or ODBC connection.

Summer 2018

Mobile Media Content | C. d'Àlaba, 61, 08005 Barcelona, Spain

Marketing Research & Analytics Intern

- Conducted a competitor benchmarking data capture and reporting initiative to automate and deliver comparative analytics.
- Championed lift testing to understand the addition of several ad campaigns and presented to Executive team to help balance CLV and CAC.
- Translated complex insights and requirements in American sports and events market to software development team.
