

SUMMARY

Data Analyst with 3+ years of experience in collecting, cleaning, and analyzing data to support business decisions. Skilled in SQL, Python, Power BI, and Tableau for building reports, dashboards, and data models. Strong understanding of data validation, ETL processes, and exploratory analysis, with a focus on improving data accuracy and operational efficiency.

EDUCATION

Master of Science, Business Analytics Mercer University, USA	Aug 2023 - May 2025
Bachelor of Pharmacy BITS Pilani Hyderabad Campus, India	Aug 2018 - Jun 2022

SKILLS

- Programming:** Python, SQL, R, PySpark
- Data Visualization:** Power BI, Tableau, Excel (Pivot Tables, DAX, Power Query), Matplotlib, Seaborn
- Databases:** Snowflake, Redshift, Azure SQL, PostgreSQL, MySQL, BigQuery
- Data Engineering & Workflow:** dbt, Apache Airflow, ADF, Data Lake, ETL/ELT Pipelines, CI/CD
- Statistical & Predictive Analysis:** Regression, Clustering, Forecasting, A/B Testing, Hypothesis Testing
- Cloud Platforms:** AWS, Azure, GCP
- Automation & Integration:** Power Automate, Alteryx, API Integration, Workflow Optimization
- Data Management & Governance:** Data Cleaning, Data Modeling, Data Validation, Metadata Management, Data Quality
- Data Storytelling & Reporting:** KPI Dashboards, Trend Analysis, Time-Series, Cohort Analysis, Executive Reporting
- Agile & Collaboration Tools:** JIRA, Confluence, Git, Scrum

EXPERIENCE

Cleveland Clinic, USA Data Analyst	Jan 2025 - Current
- Developed and maintained EHR, clinical, and revenue cycle dashboards in Power BI and SQL Server, providing actionable insights to improve provider productivity, patient throughput, and claims efficiency. - Translated clinical and operational data into measurable KPIs across appointment adherence, care quality, and reimbursement trends, enabling leadership to identify process bottlenecks and cost inefficiencies. - Designed and automated data pipelines for extracting and transforming large-scale EHR, billing, and patient outcome datasets using dbt, Fivetran, and Python (Pandas), ensuring clean and consistent analytics outputs. - Partnered with clinical operations, billing, and finance teams to standardize performance metrics — bridging gaps between clinical documentation, coding accuracy, and revenue optimization. - Built predictive and trend-based analytics models to identify high-risk patients, reduce readmissions, and forecast resource utilization for inpatient and outpatient care. - Collaborated with health informatics and EMR teams to integrate structured and unstructured data from Epic and Cerner systems into centralized reporting warehouses on Snowflake. - Created clinical and financial performance dashboards for executive leadership, incorporating KPIs such as Length of Stay (LOS), Case Mix Index (CMI), denial rates, and patient satisfaction scores. - Automated recurring reporting and workflow orchestration via Apache Airflow, Power Automate, and SQL scheduling, reducing manual intervention and improving refresh reliability by 45%. - Contributed to clinical quality initiatives, aligning analytics deliverables with value-based care goals, CMS reporting standards, and hospital accreditation metrics.	
CitiusTech, India Data Analyst	Jan 2021 – Jul 2023
- Delivered financial and operational analytics solutions for U.S. healthcare clients, focusing on revenue forecasting, cost optimization, and claim settlement performance. - Developed financial KPI dashboards in Power BI, providing visibility into collection efficiency, claim denials, reimbursement trends, and payer mix analysis. - Wrote optimized SQL scripts and Python transformations to prepare and validate large volumes of billing and claims data, ensuring consistency and integrity across finance reporting layers. - Designed and automated ETL/ELT pipelines using Snowflake, Matillion, and Airflow, streamlining data ingestion from multiple EHR and RCM systems into centralized data marts. - Partnered with finance and operations teams to implement variance and trend analysis models, improving forecasting accuracy and helping clients reduce aged receivables by 20%. - Supported migration of legacy Excel-based reports to a cloud BI environment, improving refresh time and report accuracy while enabling dynamic financial tracking. - Conducted ad-hoc analyses and root-cause investigations on cost deviations, rejected claims, and reimbursement delays, providing actionable insights to revenue cycle teams. - Collaborated with FP&A and business stakeholders to define key performance indicators (KPIs) for margin analysis, service line profitability, and volume-based cost modeling. - Contributed to data quality governance and HIPAA-compliant data pipelines, implementing dbt testing and documentation for full audit traceability. - Coordinated project timelines using JIRA and version-controlled deliverables through Git/GitHub, ensuring transparency and repeatable analytics delivery.
