SUMMARY

Full Stack Developer with 4+ years of experience delivering scalable full-stack applications, RESTful APIs, and microservices in Agile environments. Proficient in **Java** with expertise in **Spring Boot**, **Microservices**, **Angular and React**, and cloud platforms (**AWS**, **Azure**). Skilled in **CI/CD**, **GitHub Actions**, **Kubernetes**, **ELK Stack**, and AI-driven development using **GitHub Copilot**. Strong in system design, TDD, performance optimization, and building secure, high-performance backend and frontend solutions.

EDUCATION

Chicago State University, Illinois, USA

May 2025

Master of Science in Computer Science (**GPA: 3.8**)

Gujarat Technological University, India

August 2020

Bachelor of Engineering, Information Technology (**CGPA - 8.17**)

TECHNICAL SKILLS

Programming Languages & Methodologies: C, C++, Java, Python, JavaScript, TypeScript, SQL, SDLC, Agile/Scrum

Frontend: HTML5, CSS3, Tailwind CSS, XML, React.js, Angular, Redux, RESTful API

Backend: Spring Boot, Spring MVC, Spring REST, Spring Batch, Spring Data JPA, Spring AOP, Spring IoC

Security & Compliance: Spring Security, OAuth2, JWT

Testing & Tracking: JUnit, Mockito, Postman, Confluence, JIRA

Cloud & Databases: AWS (S3, EC2, CloudFormation, API Gateway, EKS), Azure, PostgreSQL, MongoDB, DynamoDB, Redis

Logging & Monitoring: ELK Stack (Elasticsearch, Logstash, Kibana), Grafana, AWS CloudWatch

CI/CD & DevOps: Git, GitHub Actions, GitLab, Jenkins, Docker, Kubernetes, Kafka, RabbitMQ, GraphQL

AI & Developer Productivity: GitHub Copilot, ChatGPT API Integration, AI-Assisted Code Generation, Test Case Automation

EXPERIENCE

PNC Financial Services, USA

October 2024 – Present

Full Stack Developer

- Engineered customer-profile microservices using **Java**, **Spring Boot**, and **Spring MVC** with **RESTful APIs**, improving data retrieval speed by 30% and enabling compliance-ready KYC/AML workflows.
- Implemented authentication and authorization using **Spring Security** and **JSON Web Token (JWT)**, strengthening digital banking API security and reducing unauthorized access attempts.
- Developed modular UI components with **React.js** and **Redux**, optimizing loan officer dashboards and reducing frontend load time by 25%.
- Deployed cloud-native banking services to **AWS EC2** and **Amazon Elastic Kubernetes Service (Amazon EKS)** via **CloudFormation**, achieving 99.5% system uptime and faster environment provisioning.
- Integrated **Apache Kafka** for real-time event streaming and used **Redis** caching to reduce fraud-alert and transaction processing latency by 20%.
- Enhanced observability by configuring centralized logging with the **ELK Stack** and **AWS CloudWatch**, reducing incident triage time by 30% and improving audit readiness.
- Accelerated development throughput by adopting **GitHub Actions** for CI/CD and AI tools such as **GitHub Copilot** and **ChatGPT API Integration**, alongside **JUnit** test automation, boosting delivery speed by 20%.

Kpit Technologies, India

January 2020 – December 2022

Full Stack Developer

- Orchestrated the development of an automotive telematics portal using **Angular**, **TypeScript**, and **Tailwind CSS**, delivering real-time vehicle health dashboards and improving UI rendering efficiency by 28% through optimized component architecture and state management.
- Constructed backend service modules with **Spring Boot**, **Spring REST**, **Spring Data JPA**, and **Spring AOP**, enabling high-volume diagnostics data processing for OEM clients and reducing API query latency by 35% via performance tuning and caching strategies.
- Administered secure authentication workflows using **OAuth2**, ensuring role-based access control for engineering teams, strengthening platform security posture by 40%, and aligning with OEM data-sharing compliance requirements.
- Validated microservice reliability through **Mockito**, **Postman**, and **TDD** practices, increasing automated test coverage to 88% and reducing regression defects by 30%, while documenting functional flows and edge cases in **Confluence**.
- Optimized cloud-based deployments using **GitLab CI/CD**, **Jenkins**, **Docker**, and **Azure App Services**, integrating **RabbitMQ** and **GraphQL** for asynchronous fleet-monitoring workflows and reducing operational incidents by 22% with **Grafana**-driven metrics and dashboards.
