

PRANAV SAI G

Business Analyst

Massachusetts, USA | +1 (978) 795-9910 | pranavsai01@gmail.com | [LinkedIn](#) | pranavsai01.com

PROFESSIONAL SUMMARY

Business Data Analyst with 4+ years of experience delivering data-driven insights, dashboards, and process optimizations across banking, consulting, pharmaceutical, and client implementation domains. Proficient in SQL, Python, Power BI, Tableau, Alteryx, Snowflake, Oracle ERP Cloud, Figma, InVision, Balsamiq, Microsoft Visio, and ETL workflow design. Skilled in requirement gathering, BRD/FRD creation, UAT execution, Agile/Scrum, workflow mapping, and stakeholder management, with a track record of improving product adoption, planning accuracy, reporting efficiency, and reducing operational bottlenecks.

TECHNICAL SKILLS

- **Programming & Scripting:** SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), R
- **Data Visualization & Reporting:** Power BI, Tableau, Google Data Studio, Excel (PivotTables, Power Query, VLOOKUP), Report Automation, Visual Reporting
- **Cloud & Big Data Platforms:** AWS (S3, Redshift, Lambda), Azure (Data Factory, SQL Database), Google Cloud (BigQuery), Apache Spark (Databricks), Hadoop, Snowflake
- **ETL & Databases:** ETL Pipelines, Data Cleaning, Data Transformation, SQL Server, MySQL, PostgreSQL, MongoDB
- **Analytics & Machine Learning:** Hypothesis Testing, Regression Analysis, A/B Testing, Forecasting, Scikit-learn, TensorFlow (Beginner)
- **Business Analysis & Reporting:** Requirement Gathering, Functional Specifications, UAT Support, Process Mapping, User Stories, KPI Tracking, Report Automation, Visual Reporting
- **Tools & Methodologies:** REST APIs, Git, GitHub, Jira, Confluence, SDLC, Agile (Scrum, Kanban), Data Governance (Integrity, Compliance, Quality), Figma, Microsoft Visio, Balsamiq, Snowflake

PROFESSIONAL EXPERIENCE

Business Data Analyst | McKinsey & Company | USA **Feb 2025 – Current**

Tech: SQL, Python, Power BI, Figma, InVision, Microsoft Visio, Balsamiq, Agile/Scrum, Requirement Gathering, Stakeholder Management, Workflow Mapping, Data Analysis & Visualization

- Evaluated financial and operational datasets using SQL and Python, identifying workflow inefficiencies and **accelerating transaction speed by 15%**.
- Engineered interactive Power BI dashboards, validated with Figma and InVision prototypes, **improving stakeholder adoption and reporting efficiency by 20%**.
- Simplified analytics delivery by mapping workflows in Visio and creating Balsamiq prototypes, **aligning outputs with business objectives and reducing development rework by 25%**.
- Managed end-to-end analytics initiatives, delivering actionable insights to leadership and **optimizing processes for measurable outcomes**.

Product Business Analyst Intern | Data-Driven Product Optimization | Enterprise Bank | USA **May 2024 – Dec 2024**

Tech: Tableau, Alteryx, Snowflake, Oracle ERP Cloud, SQL, Data Cleansing & Automation, Financial Reporting, Requirement Gathering, Process Documentation, Stakeholder Communication

- Collected and refined 150+ product data requirements, enabling the creation of five Tableau dashboards that **tracked customer spend for 6,000+ users and identified revenue opportunities**.
- Systematized data cleansing using Alteryx workflows, integrating outputs into Snowflake, **uncovering 60+ cross-sell opportunities and increasing product adoption by 18%**.
- Authored user manuals and process documentation, **reducing support ticket volume by 30%** and improving product onboarding.
- Facilitated Oracle ERP Cloud integration with analytics platforms, **enhancing financial reporting accuracy and cutting manual reconciliation time by 40%**.

Business Analyst | KPMG | India **Feb 2022 – July 2023**

Tech: SQL, Python, Microsoft Visio, Figma, Balsamiq, ETL Workflow Design, Statistical Modeling, Agile/Scrum, JIRA, BRD/FRD/User Stories, Process Automation, Requirement Gathering, UAT Execution, Stakeholder Management

- Converted executive goals into **product strategies**, defining scope, success metrics, and leading delivery from analysis to implementation; partnered with product managers to align requirements with roadmaps while balancing **long-term objectives and time-to-market priorities**.
- Engineered and optimized **SQL-driven ETL workflows** for transactional datasets (50K–100K records), improving **data quality and processing efficiency**; applied **statistical modeling** to increase demand forecasting accuracy by **12%**, strengthening financial planning and inventory allocation.
- Enabled key **system upgrades and product rollouts**, ensuring features met business expectations, were documented, and transitioned smoothly with **user training**; developed training materials and knowledge-transfer documentation to accelerate onboarding.
- Partnered with QA and engineering to **validate functional and non-functional requirements** throughout the SDLC; led **UAT for four major releases**, identifying and resolving critical defects pre-deployment to ensure stakeholder alignment.
- Formulated **workflow diagrams in Microsoft Visio** and developed **UI wireframes via Figma and Balsamiq**, enhancing UX clarity, streamlining developer handoffs, and improving delivery efficiency.
- Streamlined workflows through **process automation**, achieving a **15% cost reduction**; conducted **requirement workshops**, authored **BRDs, FRDs, and user stories**, established **KPI frameworks**, and facilitated **client-facing process improvement workshops**, boosting turnaround times and customer satisfaction. Practiced **Agile methodologies** using **JIRA** for sprint planning, backlog grooming, and stakeholder feedback.

Business Analyst Intern | Cipla | India

Tech: Power BI, Power Query, DAX, Python, Time-Series Forecasting, SOP & Process Documentation, Workflow Analysis, Data-Driven Reporting, Stakeholder Collaboration, Supply Chain Analytics

Aug 2021 – Jan 2022

- Collaborated with manufacturing, procurement, and regulatory teams to analyze end-to-end workflows, identifying bottlenecks that reduced production cycle time by 22% and informed product feature enhancements.
- Constructed seven Power BI dashboards using Power Query and DAX to track inventory performance, enabling data-driven decisions and saving 18+ hours per month of manual reporting.
- Produced SOPs and onboarding documentation for analytics-driven tools, improving internal adoption by 30% and ensuring smoother product rollouts across teams.
- Assisted in developing Python-based time-series forecasting models for raw materials, increasing planning accuracy by 27% and reducing stockouts by 15%, directly strengthening supply chain continuity and customer satisfaction.

EDUCATION

University of Massachusetts Lowell | USA

Master of Science in Business Analytics | GPA: 3.85/4.0

Aug 2023 – Dec 2024

Osmania University | India

Bachelor of Commerce | GPA: 8.04/10

Jun 2018 – July 2021

PROJECTS

- Enhancing Bank Marketing Strategies with Predictive Modeling:** Constructed a predictive model with **Naive Bayes**, **J48**, and **SMO**, analyzing **10,000+** records to optimize marketing and boost client engagement.
- Flight Ticket Price Prediction Project using Machine Learning:** Integrated a machine learning model with **XGBoost**, **DNNs**, and **LSTM** to predict **ticket prices** for **500+ routes**, boosting forecast accuracy for **1,000+ flight tickets**.

CERTIFICATIONS

- SQL for Data Analysis | DataCamp
- Python for Data Science | DataCamp
- Information Privacy and Security for Health Sciences (Basic Course) | CITI Program
- Fundamentals of Digital Marketing | Google Digital Unlocked
- Lean Six Sigma Certification | The Council of Six Sigma
- GenAI Powered Data Analytics Job Simulation | Forage
- Product Management Certification | Great Learning
