

Prathyusha Vajinepally

317-717-2537/PVAJINEPALLY@GMAIL.COM

PROFESSIONAL SUMMARY

- Data Analyst with 4+ years of experience delivering end-to-end data solutions across operations, marketing analytics, financial reporting, and healthcare domains using SQL, Snowflake, Tableau, Power BI, and Alteryx.
- Strong background in data ingestion, data modelling, automation, and dashboard development with hands-on experience supporting cross-functional teams, including Marketing, Operations, Field Teams, and Finance.
- Proven ability to translate business requirements into scalable data pipelines, optimise reporting workflows, and identify data quality issues through validation, reconciliation, and root-cause analysis.
- Experienced in collaborating with IT, business leaders, and analytics partners to streamline data processes, enhance accuracy, and improve the usability of data for decision-making.
- Experienced in developing self-service data assets, maintaining clear process documentation, and providing support across enterprise tools like Datorama, Tableau, Snowflake, Excel, and Alteryx.

SKILLS & ABILITIES

Programming & Scripting	Python, R, SAS, SQL, XML
Statistical & Public Health Analytics:	Descriptive/Univariate/Multivariate Analysis, Statistical Testing (t-tests, chi-square, regression), Public Health Analytics, Epidemiologic Methods, FERPA Compliance
Data Analysis & Visualisation	Tableau, Power BI, MS Excel (macros, pivot tables, VBA), SPSS, Alteryx, Dashboard Monitoring, Data Quality Audits, Google Analytics.
Healthcare Data Technologies	EMR/Clinical Data Integration, Epic/MiChart (Familiarity), Data Validation, HL7, ICD-10, LOINC, CPT, HIPAA, HITECH
Software & Database Tools	PostgreSQL, Oracle, NoSQL (MongoDB), MS Access, DBeaver, phpMyAdmin
Survey Tools & Methods	Survey Design & Analysis (Qualtrics, REDCap, Google Forms)
Data Warehousing & ELT	Snowflake, dbt (Core & Cloud), Apache Airflow, Dataform, CI/CD Pipelines
Cloud Platforms & Big Data	AWS, Azure, Google Cloud, Hadoop, Apache Spark
Automation & Integration	APIs (Basic), Automated Data Pipelines, Data Linking & Reconciliation

PROFESSIONAL EXPERIENCE

Data Analyst | Centra Credit Union | Nov 2024 – Present

- Designed and orchestrated end-to-end data ingestion pipelines using SQL, Snowflake, Alteryx, and Tableau Prep, integrating multi-source datasets into scalable, analytics-ready models for operational, financial, and marketing use cases.
- Established robust business rules for data mapping, transformation, and validation, strengthening data governance and significantly improving accuracy and consistency across Field Operations and Marketing analytics.
- Automated critical reporting workflows through advanced Alteryx pipelines and Snowflake Tasks, reducing manual effort, accelerating KPI refresh cycles, and enabling near real-time decision-making for leadership.
- Enhanced Marketing intelligence by preparing high-quality, standardised datasets for Datorama, enabling reliable campaign attribution, digital engagement insights, and performance monitoring across channels.
- Partnered with IT, analysts, and business stakeholders to diagnose pipeline issues, refine data models, optimise workflows, and document end-to-end processes for improved transparency and long-term maintainability.
- Implemented data quality checkpoints and anomaly detection logic to proactively identify inconsistencies in financial and operational feeds.
- Developed reusable SQL and Alteryx templates, reducing development time for new reporting requests and improving process consistency.

- Supported Field Operations with custom-built data extracts and KPI scorecards tailored to regional and branch-level performance tracking.
- Collaborated with Marketing and Digital teams to align data structures with evolving campaign strategies, improving measurement accuracy.
- Built Power BI dashboards that translate business needs into clear, actionable KPIs for executive and operational audiences, applying advanced DAX measures (time intelligence, rolling averages, what-if parameters) and optimised Power Query transformations for performance and scalability.
- Leveraged Snowflake Cortex AI to build intelligent, AI-assisted data models and accelerate insight generation across large-scale datasets.

Data Analyst | GTechnologies Pvt Ltd | September 2023 – October 2024

- Engineered and transformed complex EMR, billing, and operational datasets using SQL Server, DBeaver, and advanced data-wrangling techniques, producing analytics-ready tables for reporting and clinical insights.
- Designed, refreshed, and optimised Tableau and Power BI dashboards, applying calculated fields, parameters, and data modelling techniques to deliver actionable visual insights for clinical operations and leadership.
- Conducted detailed root-cause analysis on data anomalies across EMR, QNXT, and billing systems using SQL-based validation frameworks; documented findings, implemented corrective logic, and improved overall data accuracy.
- Integrated RSS feed-based data inputs into internal reporting pipelines to support timely updates for operational and clinical insights.
- Executed rigorous testing and validation of new data pipelines and sources, strengthening data integrity and improving reliability for downstream analytics and reporting.
- Collaborated cross-functionally with senior analysts, data engineers, and clinical stakeholders to streamline ETL workflows, enhance documentation, and fulfil complex ad-hoc analytical requests with quick turnaround.
- Assisted in designing standardised data dictionaries and definitions to improve clarity and governance across clinical analytics.
- Developed SQL audit queries to monitor frequent data issues and minimise recurring discrepancies in key data elements.

Research Data Analyst | Indiana University | Indianapolis IN | January 2024 - May 2024

- Engineered and refined large-scale research datasets using SQL, SAS, Python, R, and API-based data extraction, applying advanced cleaning, transformation, and validation techniques to ensure accuracy and analytical readiness.
- Automated recurring analytical workflows and statistical summaries using scripts and scheduled processes, significantly improving reporting efficiency and reducing turnaround time for academic and administrative teams.
- Performed detailed data quality assessments, identifying structural gaps, missing values, and inconsistencies, and worked with project teams to enhance data collection methods and metadata standards.
- Conducted exploratory and hypothesis-driven analyses to uncover trends, anomalies, and key health risk indicators, contributing to evidence-based research and policy recommendations.
- Produced high-quality datasets, visual summaries, and written insights for presentations, publications, and decision-making, ensuring clarity, reproducibility, and scientific rigour.

Data Reporting Analyst | EXL Pvt. Ltd., India | November 2021 – April 2022

- Created structured datasets using SQL Server and Excel to support daily operations, sales reports, and management dashboards.
- Updated and maintained Tableau and Power BI dashboards by preparing clean datasets and applying required business rules.
- Performed data checks, reconciliations, and issue resolution to ensure accurate numbers in recurring reports.
- Assisted in improving ETL steps by updating data mappings and rules to make the data flow more reliable.
- Worked closely with team leads to document reporting steps, track updates, and support KPI reporting needs.
- Handled ad-hoc data requests by preparing quick reports, pulling relevant datasets, and validating results.
- Streamlined reporting cycles by introducing consistent file templates and automated refresh schedules.

EDUCATION

Indiana University | Master's degree in Health Informatics | Indianapolis, IN
Mamata Institute of Medical Sciences | Bachelor of Dental Surgery | India.

May 2024
October 2021
