

PRAVELLIKA CHIRIVELLA

☎ 838-934-7763 ✉ pravelliikac@gmail.com 💻 <https://www.linkedin.com/in/pravelliikachirivella>

Professional Summary

- Proficient Java Full Stack Developer with over 5 years of experience in designing, developing, and deploying enterprise-level web applications.
- Strong expertise in backend development using **Java**, **Spring Boot**, **Spring MVC**, and **REST APIs**.
- Hands-on experience with frontend frameworks like **Angular**, **React.js**, and **JSP** for building responsive UIs.
- Skilled in database design and development with **MySQL**, **PostgreSQL**, **Oracle**, and **MongoDB**.
- Experienced in building and integrating microservices architecture with secure authentication using **JWT** and **Spring Security**.
- Expertise in version control and CI/CD pipelines using **Git**, **Jenkins**, **Docker**, and **Maven**.
- Good understanding of cloud deployment using **AWS** and **Azure**, including EC2, S3, RDS, and App Services.
- Adept in Agile methodologies, actively contributing to sprint planning, stand-ups, and delivering incremental features.
- Strong analytical, debugging, and problem-solving skills with a focus on delivering optimized and maintainable code.
- Excellent communication and teamwork skills; proven ability to collaborate with cross-functional teams and deliver high-quality solutions on time.

Education

University At Albany

Master of Science in Computer Science

Alabany County, New York

Certifications

- Oracle Certified: Professional Java SE 11 Developer

Experience

Niosys

Jan 2025– Current

Java Full Stack Developer

Alabany, NY

- Developed and maintained full-stack web applications using **J2EE 17**, **Spring Boot**, **Reactjs**, and **REST APIs**, enhancing platform performance by 30%.
- Integrated business logic and database layers using **Hibernate** and **JPA**, improving query efficiency by optimizing entity relationships.
- Designed responsive UI components using **React.js**, **Redux**, **Bootstrap**, and **Material-UI** to ensure cross-platform compatibility.
- Deployed microservices to **AWS ECS** and configured **CI/CD pipelines** using **GitHub Actions** and **Docker** for automated builds and deployments.
- Implemented JWT-based **authentication and authorization** using Spring Security and integrated OAuth2.0 for third-party logins.
- Wrote unit and integration tests using **JUnit**, **Mockito**, and **Postman**, increasing code coverage to 85%.
- Collaborated with product managers and UI/UX designers to gather requirements and deliver features in Agile sprints.
- Refactored legacy modules into reusable components, reducing code duplication by 40%.
- Utilized **MongoDB** and **MySQL** for data storage and performed query optimization using indexes and explain plans.
- Participated in code reviews and conducted knowledge-sharing sessions to uplift team productivity and maintain coding standards.

Verisk

Jun 2023 – Dec 2024

Senior Software Engineer

Jersey City, NJ

- Led the design and development of enterprise-grade microservices using **Spring Boot**, **Java 17**, and **REST APIs**, reducing system latency by 35%.
- Designed data pipelines and ETL workflows leveraging **Python** (Pandas, NumPy) to complement Java services, enabling automated data validation and transformation for reporting.

- Implemented asynchronous data processing using **Kafka** and **RabbitMQ**, improving throughput and fault tolerance across modules.
- Developed scalable front-end components with **React js**, **Redux**, and **TypeScript**, supporting responsive layouts and accessibility standards.
- Orchestrated cloud deployments using **AWS ECS**, **S3**, and **CloudFormation** templates, ensuring zero-downtime rollouts.
- Mentored 4 junior developers through code reviews, pair programming, and technical walkthroughs, improving code quality and onboarding time.
- Designed database schemas and optimized queries using **PostgreSQL** and **MongoDB**, resulting in 25% faster report generation.
- Integrated secure login and session handling with **JWT** and **OAuth2.0** using Spring Security.
- Built CI/CD workflows with **Jenkins** and **GitHub Actions**, reducing release cycle time from 2 weeks to 2 days.
- Implemented **unit**, **integration**, and **load tests** using JUnit, Mockito, and JMeter to improve system reliability.
- Collaborated cross-functionally with DevOps, QA, and product teams to define architecture and ensure delivery of business-critical features.

Accenture

Dec 2021 – Dec 2022

Java Developer Associate

Hyderabad, India

- Developed RESTful APIs using **Spring Boot** and **Java 11** for enterprise-level applications across multiple business domains.
- Worked on backend modules including data access, service layer, and controller logic using **JPA**, **Hibernate**, and **Spring MVC**.
- Created and consumed SOAP and REST web services for third-party integrations using **Spring WS** and **RESTTemplate**.
- Used **MySQL** and **Oracle** databases to write complex queries, stored procedures, and database optimization routines.
- Assisted in migrating legacy Java applications to microservices architecture using Spring Cloud components.
- Implemented authentication and role-based authorization using **Spring Security** and **JWT**.
- Wrote unit and integration test cases using **JUnit** and **Mockito**, achieving over 80% code coverage.
- Participated in Agile ceremonies including daily stand-ups, sprint planning, and retrospectives using **JIRA** and **Confluence**.
- Collaborated with front-end developers and QA teams to ensure seamless integration and issue resolution.
- Followed best practices in code versioning and collaboration using **Git**, **Bitbucket**, and code reviews.

HDFC Life

Mar 2020 – Nov 2021

Junior Software Engineer

Hyderabad, India

- Developed dynamic and responsive UI components using **Java**, **JSP**, **HTML5**, **CSS3**, and **JavaScript** to enhance customer experience on life insurance platforms.
- Integrated frontend components with backend services using **AJAX**, **REST APIs**, and **Spring MVC**, reducing page load time by 30%.
- Designed reusable UI modules with **Bootstrap** and **jQuery**, ensuring consistent branding and layout across portals.
- Collaborated with backend teams to consume data from **Spring Boot** services and optimized JSON payload rendering.
- Utilized **JavaScript validation** libraries and custom logic to implement robust input validation and enhance data quality.
- Worked with QA team to identify and fix front-end defects using **Chrome DevTools**, reducing bug backlog by 40%.
- Optimized website performance by lazy loading non-critical assets and minimizing CSS/JS bundles.
- Participated in requirement analysis and UI wireframe reviews with business analysts and product teams.
- Used **Git** for version control and collaborated via **Bitbucket** and **JIRA** for sprint task tracking.
- Ensured cross-browser compatibility and responsive design across desktop and mobile platforms.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3, Python

Backend Frameworks: Spring Boot, Spring MVC, JPA, Hibernate, REST APIs, Microservices

Frontend Technologies: Angular, React.js, JSP, Bootstrap, jQuery, Thymeleaf

Databases: MySQL, PostgreSQL, Oracle, MongoDB

Cloud Platforms: AWS (EC2, S3, RDS), Azure (App Services, SQL Database)

DevOps Tools: Git, GitHub, Jenkins, Docker, Maven, CI/CD, SonarQube

Testing Tools: JUnit, Mockito, Postman, Selenium

Others: IntelliJ IDEA, Eclipse, Visual Studio Code, Jira, Confluence
