

Priyal Bamnikar

United States | (315) 991 9466 | priyalbamnikar26@gmail.com | <https://www.linkedin.com/in/priyalbamnikar/>

TECHNICAL SKILLS

Programming languages: Python, R, Spark, PL/SQL, T-SQL, C, C++, JAVA, HTML

Database: Microsoft SQL Server, PostgreSQL, MySQL, NoSQL MongoDB, Snowflake

Frameworks & Tools: Looker, Tableau, Power BI, Microsoft Excel (VLOOKUP, pivot tables), Databricks, Access

Cloud Technologies: GCP (Dataflow, BigQuery, Dataflow), AWS (Lambda, S3, Glue, Redshift, Airflow), Snowflake, Azure

EXPERIENCE

Data Engineer | Possip, Inc. | Nashville, TN

Oct 2023 – Apr 2024

- Developed ELT pipelines to automate survey data migration from PostgreSQL RDBMS to GCP BigQuery using PySpark, Dataflow thereby boosting processing efficiency by 30%
- Led the CX initiative to create and present 20+ Looker dashboards and SQL queries for real-time login trends, user profiles, geo-locations, resulting in 25% rise in customer engagement
- Deployed an internal tool for automation using Python, Google Sheets APIs to reduce data discrepancies and enhance data quality with an efficiency of 92.71%

Data Analyst | iConsult Collaborative | Syracuse, NY

Jun 2023 – Sep 2023

- Performed data mining analysis based on consumer behavior patterns to predict rental price estimates
- Conducted web scraping using BeautifulSoup in Python to automate data extraction from 20 rental websites
- Utilized TensorFlow's API Keras to build a neural network model for rental price forecasting, enabling accurate predictions based on various features with accuracy of 81%

Master Data Analyst Intern | Tesla, inc. | Fremont, CA

May 2022 – May 2023

- Performed statistical modelling on financial datasets sizing over 1M rows to provide actionable insights and conclusions to internal and external stakeholders in Finance operations team using SAS
- Designed Tableau dashboards containing KPIs to monitor business metrics related to Tesla's electric vehicle sales
- Built ad-hoc reports and analysis on VAT (Value Added Tax) errors within banking entities using MS SQL Server, MS Excel, Power Query thereby reducing payment failures by 43%
- Streamlined ETL pipelines achieving 98% success in data validation to migrate data from MS SQL to Snowflake
- Created SQL joins, views, aggregations, CTEs, subqueries, window functions that supported strategies to resolve 18% of payment failures among high profit vendors

Systems Engineer (Data Analyst) | IBM | Pune, MH

Aug 2019- Jun 2021

- Performed data analysis, cleaning on healthcare claims and billing data for US based client using SQL queries thereby reducing claims processing time by 8%
- Developed AWS Lambda functions for daily automated data collection, improving operational efficiency by 10% through timely and precise file size and row count information from S3 buckets
- Optimized ELT pipelines with AWS Glue and Airflow from AWS S3 buckets to AWS Redshift for handling 1TB of claims and enrollment data in compliance with healthcare data standards
- Collaborated cross-functionally in an agile environment to reduce 70% quarterly manual work by automating audit report generation using Power BI, DAX, MS Excel macros, and VBA
- Used Github actions to build Continuous Integration and Continuous Delivery pipelines, reducing deployment time

PROJECTS

Analysis of Diabetic Patients healthcare data

Oct 2021 - Dec 2021

- Performed exploratory data analysis, JSON API Scraping on diabetes data using Scikit-learn, NumPy, Pandas
- Assessed probability of hospital readmission probability with predictive analytics, GLMs, association rules
- Presented visualizations to display trends in readmission using matplotlib and seaborn

EDUCATION

Syracuse University | Syracuse, NY

May 2023

MS in Applied Data Science

Pune University | Pune, India

May 2019

Bachelor of Technology in Electronics and Telecommunication
