Education

University of Texas at Arlington

Bachelor of Science in Computer Science

Expected May 2027

Arlington, TX

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Object-Oriented Programming, Operating Systems, Databases

Work Experience

OIT Lab Operations Assistant — Student Assistant

University of Texas at Arlington

Oct 2024 – Present

Arlington, TX

- Provided technical support for students and faculty by troubleshooting hardware and software issues.
- Assisted with system updates, software installations, and lab maintenance across labs.
- Managed equipment and documented issue resolutions to streamline IT workflows.
- Acted as first point of contact for on-call technical issues and compiled reports to senior staff.

Projects

XamGuard — Personal Project

Python Productivity App

Jul 2025 – Aug 2025

Frisco, TX

- Designed lightweight focus program to block distracting apps and websites to enable productivity.
- Developed SQL schema and CLI tools to manage custom sets of blocked sites.
- Implemented hosts file modifications and process termination using Python for timed, uninterruptible focus sessions.
- Built modular architecture for future GUI and analytics extensions.

JobSnap — Personal Project

Python Job Application Tracker

Mar 2025 – Aug 2025

Arlington, TX

- Built a Python-based CLI app to track job applications with fields like role, company, status, and contact info.
- Integrated SQLite3 for persistent local storage with schema design and query support.
- Designed modular architecture with input validation and edit/update features for future web integration.

Checkers Game — Course Project

Team-Based Java & JavaScript Development

Feb 2025 – May 2025

Arlington, TX

- Collaborated with Java/JavaScript teams to manage project logic and backend/frontend connections.
- Applied Agile methodology to plan tasks, set deliverables, and track team progress.
- Delivered a functional product through coordinated testing and planning.

Paddle Prodigy — Personal Game Project

Python Pong Clone

May 2024 – Jun 2024

Frisco, TX

- Built a Pong game using Turtle graphics with paddle movement, scoring, and AI behavior.
- Added a soundtrack via Pygame and optimized for modular, clean performance.

Skills

Languages: Python, Java, C/C++, SQL

Tools: Git, GDB, Valgrind, Windows, MS Office

Soft Skills: Agile Workflow, Communication, Leadership, Problem Solving, Adaptability, Time Management

Certifications

- Databases and SQL for Data Science with Python — Coursera IBM, 2025
- Fundamentals of Data Science — Coursera IBM, 2024
- Programming with Java — Amazon, 2025
