

Refia Senliler

Cyber Security Analyst

Green Card Holder | Bethlehem, PA | +1 484 249 2521

refiasen@gmail.com | [LinkedIn](#)

Professional Summary

CompTIA Security+ certified SOC Analyst with 5+ years of IT experience, specializing in threat detection and incident response. Bringing analytical skills and technical expertise to security operations and risk mitigation strategies. Executed critical security operations in a closed environment, developing expertise in real-time threat detection and rapid incident response protocols. Committed to continuous professional development, staying ahead of emerging cyber threats in the rapidly evolving field of cybersecurity.

Technical Skills

Cyber Security Tools & Technologies: IBM QRadar, ProofPoint, SentinelOne, TheHive, VirusTotal, AnyRun, MX ToolBox, AbuseIPDB, Joe Sandbox, Hybrid Analysis, CyberChef, URLScan.io, Splunk Enterprise Security, Selenium, Cucumber, Postman, API, JDBC, Git/GitHub/GitLab, Jira/Xray, MySQL, Jenkins, Agile-Scrum, BurpSuite, IPS/IDS.

Vulnerability and Networking: Fortinet, Tenable.io, Nessus, Kali Linux, WAF, Wireshark PCAP Analysis, TCP/IP, IDS/IPS

Frameworks: OWASP Top 10, MITRE ATT&CK, Cyber Kill Chain, SANS, NIST

Programming Languages & IDE: Java, SQL, HTML, CSS, Gherkin, IntelliJ, Eclipse, Visual Studio, RubyMine

Testing Methods: Functional Testing, UI Testing, Database Testing, Smoke Testing, Regression Testing, E2E Testing

Experience

Security Operations Center Analyst | CyberNow Labs | VA 06/2024 – Present

- Performed log analysis on a **SIEM** solution like **IBM QRadar** and triaged security alerts to determine threat severity, providing actionable solutions, and context to technical teams through **TheHive** ticketing system. Improving response time by 30%.
- Monitored and analyzed alerts through **SentinelOne EDR** and IBM QRadar to identify security anomalies for investigation and remediation in a 24/7 Cyber Security Operations Center (SOC) for continuous security coverage.
- Applied critical thinking to investigate and mitigate phishing campaigns using ProofPoint, effectively identifying and neutralizing malicious threats. Led targeted awareness training to enhance phishing prevention efforts.
- Demonstrated responsiveness in implementing, monitoring, maintaining, and optimizing security tools, including Intrusion Detection and Prevention Systems, Security Information and Event Management, Malware Prevention, and Email Security.
- Analyzed files, domains & emails via OSINT, enhancing proactive threat prevention, and **cutting false positives 25%**.

QA Engineer | Heitmeyer Consulting Firm | OH 03/2022 – 01/2024

- Executed comprehensive **end-to-end** testing spanning from user registration to payment processing, while integrating **Guidewire Solutions** with Policy Center, Billing Center, and Portal, at both **QA** and **production levels**.
- Worked closely with stakeholders to present detailed test results, including negative, positive, and regression tests, enhancing understanding of product reliability and increasing stakeholder confidence.
- Automated test cases, focusing 85% on manual testing, enhancing with Watir, BDD, Ruby, Selenium, and Cucumber.
- Engineered test strategies with Jira/Xray, developing plans, cases, and scripts, **increasing test coverage by 30%**.
- Optimized web app performance by analyzing network traffic and HTTP responses, **boosting performance by 40%**.
- Involved in Agile scrum ceremonies such as daily standup, sprint planning, sprint retrospective, and sprint grooming.

QA Automation Tester | Ruby Health | NY 04/2021 – 01/2022

- Implemented the testing framework from the beginning, precise defect identification and resolution to ensure seamless usability.
- Maintained and managed 60 percent of Automation framework by following a hybrid model with Page Object Model and BDD, using **JAVA** OOP concepts, **Selenium** Web Driver, and Cucumber.
- Developed detailed test scenarios, and feature files utilizing Gherkin language, translating complex business requirements into executable test documentation.
- Identified, documented, and reported bugs in the product using **Azure**.
- Performed **functional testing** by locating web elements with Selenium **locators** such as ID, CSS, and Xpath.

Certifications & Honors

CompTIA Security+, Armis Cyber Defense Core, Fortinet Certified Fundamentals Cybersecurity, Fortinet Certified Associate Cybersecurity, SkillFront ISO/IEC 27001 Information Security Associate

Education

Borough of Manhattan Community College
A.S. Computer Science
