Professional Summary

I'm a Software Engineer with 2.5 years of experience creating scalable and efficient software solutions. I've worked with Java, Python, and JavaScript, and am comfortable with frameworks like Spring and Django. My experience spans the full software development cycle, from coding and testing to optimization, and I've worked with databases like MySQL and MongoDB. I'm all about collaboration and enjoy working with teams to bring ideas to life, especially in fast-paced, agile environments. I'm constantly looking to learn and stay updated with new technologies so I can deliver high-quality, innovative solutions that make a real impact.

Professional Experience

Java Full Stack Developer

Oct 2024 - Present

Metlife, Missouri

- Managing month-end accounting of 4 public universities and hospital under the University of Missouri Systems.
- Developed and maintained user-friendly web applications, ensuring a smooth and responsive experience across all devices.
- Worked on improving backend performance, making applications 25% more responsive through optimizations.
- Designed and built RESTful APIs to streamline communication between the front-end and back-end, boosting overall application performance.
- Focused on optimizing applications, reducing load times by 15% for a better user experience.
- Managed and analyzed business data, providing insights that helped drive key decisions.
- Actively participated in Agile sprints, collaborating with cross-functional teams to ensure timely and efficient project deliveries.
- Contributed to ERP system integration, enhancing communication between web applications and business systems to improve operational workflows.

Software Engineer

Jan 2021 - Dec 2022

Mindtree Ltd, India

- Played an active role in building and optimizing software solutions, ensuring that applications were efficient and scalable.
- Collaborated with senior engineers to develop new features and enhance existing ones, improving performance by 20%.
- Focused on troubleshooting and resolving issues in both production and development environments to maintain system reliability.
- Contributed to the design of software architecture, ensuring that code was modular, easy to maintain, and scalable.
- Participated in Agile development processes, including sprint planning and daily stand-ups, working closely with the team to meet deadlines.
- Wrote clean, maintainable code, following best practices to reduce technical debt.
- Collaborated with QA engineers to ensure all features were thoroughly tested and met high-quality standards before deployment.
- Used version control to ensure smooth collaboration and proper code management within the team.
- Optimized algorithms and data handling processes, reducing processing time and improving system efficiency.

Skills

Software Tools: Microsoft Office (Excel, Project, Word, PowerPoint), Visual Studio Code, NetBeans IDE, SQL Server, R Studio, IDEs, Git, debugging tools, Unix utilities,

Programming Languages: Java, JavaScript, HTML, CSS, Python.

Web Development: ReactJS, AngularJS, Vue.js.

Back-End Development: Node.js, Spring Boot.

Data Management: SQL, NoSQL, data structures, algorithms.

Agile: Scrum methodology experience.

Cloud: Azure.

Testing: TDD, unit testing (JUnit), integration testing, automated testing (Selenium).

Problem-solving, communication, team collaboration.

Education

Master's in computer science

Jan 2023 - Aug 2024

University of Central Missouri, Missouri

Bachelor's in computer science

Aug 2017 - Aug 2021

Bangalore, India
