

Summary

Business Data Analyst with 3+ years of experience delivering data-driven insights across pharmaceutical and retail domains. Proven expertise in SQL, Power BI, Tableau, Snowflake, and Excel to analyze large-scale datasets, automate reporting, and develop executive-ready dashboards. Strong background in data modeling, ETL processes, KPI tracking, and forecasting to support commercial, supply chain, and operations teams. Adept at translating complex data into actionable insights through data storytelling, cross-functional collaboration, and Agile-driven analytics solutions that improve decision-making and business performance.

Skills

- Programming & Query Languages:** SQL, Python (Pandas, NumPy), Excel VBA
 - Data Visualization & BI Tools:** Power BI, Tableau, Advanced Excel (Pivot Tables, Power Query, Dashboards)
 - Databases & Data Platforms:** Snowflake, Relational Databases, POS & Enterprise Data Systems
 - Cloud & Analytics Platforms:** Microsoft Azure, Cloud Data Warehousing
 - Data Engineering & ETL:** ETL Pipelines, Data Transformation, Data Validation, Alteryx, Automated Reporting
 - Analytics & Statistical Techniques:** KPI Development, Forecasting, Trend Analysis, Root Cause Analysis, Segmentation Analysis
- Business & Commercial Analytics:** Sales Analytics, Inventory & Demand Planning, Revenue Analysis, Market & Product Performance Analysis
 - Data Governance & Quality:** Data Accuracy Checks, Data Documentation, Reporting Standards, Regulatory & Compliance Support
 - Project & Delivery Methodologies:** Agile Methodology, JIRA, Cross-Functional Collaboration, Stakeholder Management
 - Data Storytelling & Communication:** Executive Reporting, Insight Presentation, Business Requirements Translation, PowerPoint Reporting

Experience

Business Data Analyst

Jun 2024 – May 2026

Pfizer

- Analyzed commercial and clinical operations data using SQL, Snowflake, and Power BI, to identify revenue leakage and demand variability, improving forecast accuracy by 18% for commercial strategy and finance leadership.
- Designed automated KPI dashboards in Power BI and Tableau, to track product performance, trial timelines, and market access metrics, reducing manual reporting effort by 30% for senior business stakeholders.
- Collaborated with cross-functional teams (Commercial, Medical Affairs, Supply Chain) using Agile and JIRA, to translate business requirements into data models, accelerating decision cycles by 25% for executive leadership.
- Developed SQL-based data pipelines and validation checks on Snowflake and Azure, to ensure data integrity across multi-source datasets, improving reporting accuracy for regulatory and compliance teams.
- Performed ad-hoc and root-cause analyses using Python (Pandas, NumPy), to evaluate sales performance and market trends, supporting data-driven go-to-market strategies for commercial operations.
- Optimized data transformation workflows using ETL tools and Alteryx, to streamline ingestion of sales, clinical, and supply chain data, cutting processing time by 20% for analytics teams.
- Translated complex analytical findings into executive-ready insights through PowerPoint and data storytelling, to support portfolio prioritization and investment decisions for senior leadership.
- Implemented data governance and documentation standards using Confluence and Excel, to improve data transparency and usability, enhancing adoption across global business units.

Data Analyst

Aug 2020 – Jun 2022

AutoZone

- Analyzed large-scale retail sales, inventory and POS datasets using SQL, Excel and relational database to uncover demand trends, stock gaps and sell-through inefficiencies, reducing inventory stockouts by 15% for store operations teams.
- Designed and maintained interactive Tableau dashboards tracking sales trends, SKU-level performance, regional KPIs, and inventory health, enabling data-driven decision-making for regional and district leadership.
- Automated recurring operational and executive reports using Excel VBA, SQL queries and advanced excel functions to streamline data preparation workflows, and save 10+ hours per week for business analysts and operations teams.
- Conducted customer and product segmentation analysis using Python (Pandas, NumPy) and statistical methods, to optimize pricing strategies and promotional effectiveness, driving a 6% increase in same-store sales for merchandising stakeholders.
- Collaborated cross-functionally with supply chain, merchandising and operational teams, to define business requirements, KPIs, and success metrics, ensuring analytics solutions aligned with enterprise retail objectives.
- Conducted Data validation and quality checks across inventory, vendor, and POS systems using SQL audits and reconciliation techniques, ensuring accurate, reliable datasets for executive and financial reporting.
- Supported forecasting and replenishment initiatives by analyzing historical sales data and seasonality patterns, improving demand planning accuracy and enhancing inventory turnover ratios.
- Presented clear insights through data storytelling, visual analytics, and executive-ready summaries, influencing operational improvements, pricing decisions, and promotional strategies for non-technical stakeholders.

Education

Master of Science in Computer and Informa on Science

May 2024

University of Texas at Arlington, USA

Bachelor of Engineering in Computer Engineering

May 2022

Gujarat Technological University, India

Projects

Enterprise Data Intelligence Platform | Power BI, Python, AWS (Jan 2024 – Apr 2024)

- Built an enterprise analytics solution integra ng Salesforce, Oracle, and Excel using Python, SQL, and AWS Glue, reducing reporting latency by 60% and improving data accuracy by 35% across business units.
- Designed Power BI dashboards with unified KPIs for finance, HR, and compliance, enhancing leadership visibility and supporting consistent, data-driven interdepartmental decisions.
- Automated ETL and data validation workflows, saving 12 hours weekly while delivering executive-ready visuals that accelerated quarterly strategy decisions through real- me insights.
