

Sindhura Vajapeyayajula

Software Engineer

+1 7325585173 | vsindhura9@gmail.com | [LinkedIn](#)

SUMMARY

Highly skilled Software Developer with 3+ years of experience designing and deploying Java Spring Boot microservices, AWS and Azure cloud solutions, and React frontends. Proficient in programming with Golang and applying Agile methodologies and DevOps practices throughout the SDLC. Strong background in Computer Science and Information Technology, with expertise in HTML and modern framework integration to build high-availability, fault-tolerant systems that improve scalability, cut costs, and streamline development workflows.

EXPERIENCE

Software Developer - Associate Technical Consultant, Oracle

Jul 2021 — Apr 2023

- **AI Integration:** Deployed AI-based log anomaly detection using Python, catching 80% of incidents early and saving 6+ hours per production issue in manual troubleshooting effort.
- **Microservices Design:** Developed a Java Spring Boot app using Agile Methodologies and SDLC principles to convert EDI files into JSON with auto-segment detection, cutting developer onboarding time by 75% and accelerating go-live for 10+ client integrations.
- **Cloud Architecture:** Built cloud-native microservices leveraging Azure and DevOps practices with Eureka service discovery, API Gateway routing, and centralized config, enabling horizontal scaling for 50+ APIs and zero-downtime growth.
- **System Reliability:** Implemented WebClient load balancing, Kafka messaging, and Golang-based monitoring with Resilience4j circuit breakers and Sleuth/Zipkin tracing, reducing MTTR by 40% and boosting overall platform stability.
- **API Security:** Achieved 99.9% uptime by securing endpoints with Keycloak OAuth2, containerizing with Docker and Jib, orchestrating via Docker Compose, and monitoring health via Prometheus/Grafana within a robust SDLC framework.
- **CI/CD Pipeline:** Automated Gradle builds, tests, and code checks with GitHub Actions CI/CD using DevOps frameworks, cutting developer wait times by 50% and improving release quality and predictability.

Software Engineer Intern, Prospecta Technologies

Apr 2020 — May 2021

- **Backend APIs:** Built a Spring Boot REST API using strong Programming and Computer Science fundamentals to handle 2,000+ monthly receipt uploads to AWS S3 with PostgreSQL metadata storage, saving 10 employee hours per month on manual processing.
- **Frontend UX:** Developed a React.js interface with HTML integration, drag-and-drop uploads, real-time previews, and live gallery refresh, achieving 4.7/5 employee satisfaction and 90% feature adoption within launch month.
- **Cloud Deployment:** Containerized API and database with Docker Compose, configured Azure and AWS EC2/ECS auto-scaling, and delivered zero-downtime releases that reduced deployment effort by 75% while following Agile Methodologies.
- **CI/CD Automation:** Established an end-to-end CI/CD pipeline integrating build, test, and deployment stages, cutting release cycle time from days to hours and improving release consistency.
- **System Scalability:** Optimized storage and API throughput using Information Technology best practices to support 3x growth in monthly uploads without performance degradation, ensuring smooth experience for 200+ active users.

PROJECTS

Meeting Notes Management Application | Node.js, Express, MongoDB

- Designed a RESTful MeetingNotes API with full CRUD operations and a clean controller/service architecture for easy maintainability, enabling seamless multi-user collaboration. Implemented keyword search and date-range filters that helped users locate notes 2x faster, boosting meeting productivity and decision-making speed.

Financial News Research Tool, Langchain | Cohere LLM, FAISS, Streamlit

- Built an end-to-end AI research pipeline that fetches, chunks, and semantically indexes financial articles, reducing research time by 60% for end users. Designed an interactive Streamlit UI for natural language queries, delivering concise, citation-backed insights that accelerated data-driven decision-making.

EDUCATION

Northeastern University, Boston, USA - Master of Science, Information Systems

May 2025

National Institute of Technology(NIT) , Durgapur, India - Bachelor of Technology, Electrical Engineering

May 2021

SKILLS

Programming Languages	: Java (Spring Boot), JavaScript (ES6+), TypeScript, Python
Frameworks & Libraries	: Spring Boot, React.js, Node.js, Express.js, Resilience4j, Sleuth, Zipkin
Cloud Platforms	: AWS (EC2, S3, ECS, Lambda, CloudFront, VPC, DynamoDB, API Gateway, CodeCommit), Docker, Kubernetes
DevOps & CI/CD	: GitHub Actions, Jenkins, Docker Compose, Jib, Prometheus, Grafana, OAuth2 (Keycloak)
Databases	: MySQL, PostgreSQL, MongoDB, Amazon DynamoDB (NoSQL)
Event-Driven Systems	: Apache Kafka, Eureka Service Discovery, API Gateway
Tools & Other Skills	: Linux/Unix, OpenAPI/Swagger, Figma, Streamlit, REST API Design, Microservices Architecture
Relevant Skills	: Azure, HTML, Agile Methodologies, Golang, DevOps
