

Robert McKallip

robertmckallip@gmail.com | (346) 758-3068 | Washington, DC 20009

TECHNICAL SKILLS & RELEVANT COURSEWORK

- **Tools:** Python (packages: *pandas*, *spaCy*, *NLTK*, *TensorFlow*, *PySpark*), R (packages: *ggplot2*, *dplyr*, *tidy*), Power BI, Tableau, SQL, Java, C#, Microsoft Excel (*functions*: PivotTables, Macros, Power Pivot), Visual Basic, GRO, OnQ R&I
- **Skills:** Time series forecasting, Regression (linear, logistic, ridge, lasso, panel data), Decision trees, Neural networks (CNN, RNN), Stochastic analysis (Markov chains, Martingales, Gaussian processing), NLP, Revenue Management
- **Relevant Coursework:** Econometric Methods and Models, Stochastic Processes, Text Analytics, Modern Data Mining, Predictive Analytics for Business, Health Economics, Labor Economics

WORK EXPERIENCE

Hilton Corporate Office, McLean, VA

Revenue Specialist, RMCC Standard

March 2025 - Present

- Analyzed hotel pricing and inventory using Excel, GRO and OnQ R&I to develop pricing and market strategies to achieve market share growth
- Developed tools and other code in Visual Basic to enhance workflow and analyze hotel inventory data

Embassy of Peru, Washington, DC

Economic Department Intern

October 2024 - March 2025

- Conducted research into Peru's economic and business affairs, analyzing economic literature, data and reports in order to create graphics and presentations used in Peruvian diplomatic affairs.
- Used Python, Excel and Power BI to clean, analyze and visualize large government datasets to create graphics and other deliverables used in official governmental resources and promotional materials.

Telcron, Bloomfield, New Jersey

Data Analytics Intern (Remote)

August 2023 – May 2024

- Conducted market and sales research by analyzing and transforming large datasets, produced data visualization using R and Excel, and led pricing studies on multiple products and services
- Wrote code in Python to scrape large amounts of data from websites and cleaned and compiled data using R
- Led the development of promotional videos using data-driven insights into marketing and promotional trends

ACADEMIC PROJECTS

Student Pass Rate Prediction Modeling Using Neural Networks, (R, Python)

May 2024

- Developed prediction models using logistic regression, random forest, and neural networks for the prediction of student school pass rates based on health, demographic, and school performance data.
- Examined and optimized predictive models utilizing a variety of measures, including backwards elimination and hyperparameter optimization, and compared models to determine optimal model choice.

Multiclass Classification of Movie Genre Using Logistic Regression (Python)

October 2023

- Scraped, cleaned and processed review data from multiple film review websites and data sets, compiling them into a clean, tokenized corpus
- Used natural language processing techniques to create logistic regression models that predicted movie genre based on film summaries, and performed hyperparameter optimization to optimize models

LEADERSHIP

Kappa Alpha Society, Philadelphia, Pennsylvania

Secretary

February 2023 – May 2024

- Hosted philanthropic events and charity drives for humanitarian causes, and collaborated with performing arts clubs and other on-campus organizations

Bent Button Productions, Philadelphia, Pennsylvania

Treasurer

September 2022 – December 2023

- Supervised production of shoots and events, managing costume and location expenses as well as purchasing capital equipment and supplies, and worked with school administrators to procure funding and permissions

EDUCATION

University of Pennsylvania, College of Arts and Sciences, Philadelphia, PA

May 2024

Bachelor of Arts in Economics:

GPA: 3.30/4.00

LANGUAGES

Languages: English (Fluent) | Spanish (Fluent)
