US Permanent Resident | (940) 977-9582 | rohitchalapathi@gmail.com | 1330 Norman St, Denton, TX, 76201

EDUCATION

University of North Texas

Master of Science – Business Analytics

Denton, USA

(Aug 2024 – Present) GPA: 3.89

Coursework: Database Management System, Data Visualization, Statistics, Data Mining, Predictive Analytics, Data Warehousing, Big Data Analytics, Information Systems Design, Business Intelligence, Artificial Intelligence

MVGR College of Engineering

Bachelor of Technology in Civil Engineering

Visakhapatnam, India

(Aug 2016 – Jun 2021) GPA: 8.59

JOB EXPERIENCE

University of North Texas

Teaching Assistant

Denton, USA

(Aug 2025 – Dec 2025)

- Instructed graduate students on developing **SQL queries** (including **complex joins**, **subqueries**, **common table expressions**, and **window functions**), **ER and relational modelling**, **schema normalization**, **indexing**, **constraint management**, and concepts of **query optimization**. Supported MySQL lab sessions, conducted grading, and addressed student inquiries.

Tata Consultancy Services

Database Administrator

Kolkata, India

(Dec 2021 – Mar 2024)

- Monitored **Error log** and **Event log** for database errors to ensure optimal performance and stability. Managed databases by creating and modifying stored procedures and SQL scripts for **Data Conversion**. Took care of **User-security protocols**, **optimization of databases**, **high availability** and **scaling** of the database based on requirements. Administered **Performance tuning**, **configuration**, and **implementation** for large, scalable standalone databases. Planned and scheduled the physical backup of the database as a measure for **Disaster recovery** to ensure **Data Consistency**.

SKILLS

Programming Languages: C, C++, Python, Java

Web Technologies: HTML, CSS, JavaScript

Database: MySQL, Oracle

MS Office: MS Word, MS PowerPoint, MS Excel

ACADEMIC PROJECTS

Water Pump Functionality Prediction

- Built a **Classification model** on a real-world rural water-pump dataset using **Python** to predict whether pumps were functional. Performed extensive **Data cleaning**, **Feature engineering**, and **Standardization**. Evaluated **Logistic Regression**, **Random Forest**, **Naive Bayes**, **Decision Tree**, and **Neural Network** models with **confusion matrices**, **ROC curves**, and **F1 scores**.

Tableau Data Story on World University Rankings

- Designed an end-to-end **Tableau data story** that explores global university performance over time using **key metrics** (teaching, research, citations, industry income, international outlook) and communicates **actionable recommendations** for students choosing institutions for higher education.

MySQL Dimensional Modelling and QlikView Analytics

- Designed a **star-schema dimensional model** in MySQL based on Airbnb website, connected the database to **QlikView**, resolved **data model loops**, and built **interactive dashboards** to analyse occupancy, revenue, pricing patterns, and guest satisfaction.

ACHIEVEMENTS

- Received **Best Employee of the year** Award in **Tata Consultancy Services** for my contributions in the year **2023**.
- Received a **Merit based Scholarship** from the **Department of Information Technology and Decision Sciences** at **University of North Texas** for the **2025-2026** academic year.
