OBJECTIVE

Results-driven software engineer with expertise in cloud technologies, full-stack development, and UI/UX design. Seeking a challenging role to leverage my diverse programming skills and innovative problem-solving abilities. Committed and eager to develop user-centered solutions that drive technological advancements and create real-world impact.

EDUCATION

Miami University

Oxford, OH

Bachelor of Science in Software Engineering

Aug 2020 – May 2024

- Awarded Dean's List, Miami University RedHawk Excellence Scholarship, Bridges Program for Excellence Scholarship.
- Director of Programming Executive for S.T.E.M Society, Girls Who Code Club Member, National Society of Black Engineers Member.

Relevant Courses:

Algorithms, Data Structures, Object Oriented Programming, Systems, Intro to CyberSecurity, Web Application Programming, Discrete Mathematics, Calculus, Statistics, Software Requirements, Software Architecture and Design, Software Construction, Software Quality Assurance and Testing.

EXPERIENCE

Software Engineering Intern

June 2023-August 2023

KeyBank

Cincinnati, OH

- Conducted research and delivered a comprehensive presentation on the strategic benefits of developer portals, outlining key features in collaboration with senior leadership.
- Spearheaded the development of KeyStage, a new developer portal, improving software development efficiency for 300+ daily users.
- Implemented a scalable service on Google Cloud Platform, reducing resource access time by 40%.
- Architected infrastructure as code for 2 projects, streamlining containerization and deployment pipelines.
- Mastered Google Cloud Platform, Terraform, and YAML through pair programming sessions, completing 5 major features in 12 weeks.
- Presented research findings on developer portals to senior leadership, influencing strategic decisions.

COURSE PROJECTS

Web Development Final Project

January 2023 - May 2023

- Developed and deployed a full stack web application for a user based stock system with full history of stocks.
- Built a full database using SQL access.
- Wrote REST interface for web applications.
- Wrote code fully utilizing HTML, CSS, JavaScript, jQuery, and Bootstrap, focusing on data-driven user interactions.
- Implemented AJAX calls for dynamic data fetching, ensuring a seamless user experience.
- Created a request history page that allowed users to query past stock requests by date, displaying results in a formatted table with clickable entries for detailed views.

Senior Design Project Study Abroad – Manchester, UK

January 2024 – February 2024

- Worked with a team to redesign a homeless organization's communication platform within a 3-week deadline.
- Implemented a third-party communication platform, enabling the organization to connect with other nonprofits for the first time, enhancing collaboration and outreach efforts.
- Managed stakeholder communication and gathered feedback for iterative design improvements.
- Implemented WordPress plugins for accessibility, improving user experience for visitors with disabilities.
- Set up Google Analytics and WordPress analytics for user engagement monitoring.
- Created technical documentation and user guides for nonprofit staff.
- Employed ChatGPT API for automated testing and debugging to streamline the development process.
- Applied PHP for backend scripting ensuring 99.9% uptime for critical website functions.

UI/UX Redesign of Craigslist Semester Project

- Collaborated with a team to redesign Craigslist's user interface, with a focus on enhancing usability and accessibility.
- Conducted in-depth analysis of user pain points, highlighting issues with unresponsive design, cluttered layout, and navigation complexity.
- Crafted comprehensive use cases and scenarios to inform redesign decisions and align with user needs.
- Designed low-fidelity prototypes focused on improving product listings, categorization, and product description interactions.
- Applied advanced interaction styles, including menu selection and direct manipulation, to streamline navigation and elevate the user experience.

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, Python, HTML, SQL, R, PHP
- **Web Technologies:** JavaScript, jQuery, Bootstrap, AJAX, WordPress
- **Cloud & DevOps:** Google Cloud Platform (GCP), CI/CD, Terraform, YAML
- **Tools:** Git, Linux, R Studio, Google Analytics
- **Concepts:** Algorithms, Data Structures, Object-Oriented Programming, Software Architecture, UI/UX Design, Statistical Analysis

VOLUNTEER EXPERIENCE

Food Pantry Volunteer

September 2021-September 2022

Talawanda Oxford Pantry & Food Services

- Sorted food donations and stocked shelves.
- Delivered food to homebound customers.
- Aided customers in shopping and utilizing My Plate nutrition charts.
- Loaded customers' cars with groceries.
