US Citizen. Authorized to work for all employers

---

## Professional Summary:

- Having Focused 4+ years of Salesforce.com CRM experience as an Administrator / Analyst utilizing Salesforce Lightning, Sales Cloud, and Service Cloud
- Architected an efficient framework for creating custom objects and roles tailored to specific departmental needs; resulting in a reduction of administrative overhead by saving approximately 15 hours monthly on manual configurations

## Professional Experience:

**Blackbaud, TX**

**Oct 2022 to Present**

### Salesforce Administrator

- Provided ongoing support and maintenance for Salesforce applications, ensuring smooth operation and high user satisfaction, optimizing platform stability.
- Performed administrative activities using data loader and Apex data loader, as well as import wizard to import data, such as accounts, campaigns, cases, and leads from multiple data sources into Salesforce.
- Designed, Implemented, and deployed the Custom objects, Custom Fields, Page layouts, Custom tabs, and Components, to suit the needs of the application
- Diagnosed and resolved recurring technical challenges within Salesforce by collaborating with vendor support, streamlining workflow for stakeholders handling approximately 500 monthly transactions
- Increased customer satisfaction by 20% through improved team collaboration, resolving support requests more efficiently, and enhancing user experience
- Defined system requirements using UML methodologies for Use Cases, Use Case Scenarios, and Use Case Narratives, improving documentation and communication
- Led functional design sessions identifying 10 key data issues, resulting in targeted solutions and a 25% reduction in discrepancies in reports, improving data accuracy
- Developed Salesforce.com reports, analytics, and dashboards to support and monitor activity and key performance metrics
- Integrated systems displaying real-time performance indicators via linked dashboards, improving departmental collaboration and decision-making
- Identified gaps within the Salesforce platform by analyzing user feedback, resulting in three key enhancements that improved system performance to meet business needs
- Created Use Case Diagrams, Data Flow Diagrams, Activity Diagrams, and Sequence Diagrams in MS Visio, boosting team collaboration by 30% through improved visual communication
- Designed customized dashboards and reports aligned with KPIs, reducing support ticket resolution times from 7 days to 3 days, significantly improving operational efficiency

**Raymond James, MN**

**Feb 2021 to Sep 2022**

### Salesforce Business Analyst

- Captured and formalized application workflows in Salesforce, specifically detailing Sales Cloud and Service Cloud processes; enhanced onboarding time for new users by 20% through comprehensive documentation
- Mitigated inconsistencies within Salesforce applications; addressed critical issues which resulted in clarifying end-user requirements, ultimately boosting project delivery timelines by an average of two weeks for key initiatives
- Composed tailored solutions through the design and deployment of custom objects, fields, and page layouts in Salesforce; elegant workflows resulting in a 40% decrease in time spent on manual updates for users
- Spearheaded initiatives aimed at bundling renewal offerings into cohesive packages; identified gaps leading to evolved conversions through optimized quotes with an average close rate growth of 15%
- Expertise in CRM business processes like forecasting, campaign management, lead management, Pipeline management, account management, and case management
- Attended scrum team ceremonies (Product backlog refinement, sprint planning, daily standup, sprint review, and retrospective) for Salesforce projects
- Configured Validation rules to enhance data accuracy within the system, leading to a significant decrease in errors during transactions and improving overall user satisfaction scores by 25%
- Prioritized grooming sessions resulting in simplified backlogs with an average reduction time per session decreasing clutter from 30% down to less than five high-priority tasks ready for implementation
