Fremont, CA | Mobile No: +1 (551) 344-2366 | [samir.p.nandardhane@gmail.com](mailto:samir.p.nandardhane@gmail.com) | GitHub [samir-nandardhane](#) | LinkedIn [samirnandardhane](#)

## SUMMARY

- Completed Master of Science in **Data Analytics & Intelligent Methods** with 3.80 GPA.
- Around 3 years of experience as **Data Integration & Business Intelligence developer**, descriptive & predictive analysis, Multivariate Testing, machine learning.
- Experienced in developing visually appealing dashboards and reports in various formats using **Tableau**, requirement gathering, effort estimation, identifying KPI's.
- Experience with Data Cleansing, **Data Transformation**, Data Profiling, **Data Visualization** and Data Analysis to suit business requirements.
- Developed **LLM pipeline** for chatbot creation & Optimization, Tabular data Understanding & predictive analysis.
- Expertise in Business Intelligence Development, **Data Warehousing**, Data Lake, Data Modeling, **ETL methodologies**. SQL, Python and **Spark Development**.
- Excellent team player, a self-starter and effective leader.

## SKILLS

- Programming:** SQL, Python, Java, R, Scala.
- ETL Tools:** Alteryx Designer, Pandas, Apache Spark.
- Database:** Oracle 11g, MySQL.
- Files:** JSON, FLAT, PARQUET.
- Tools:** Tableau Desktop, MS Excel, Azure ADF, Databricks, Apache Airflow, Apache Kafka.
- Libraries:** Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, PySpark.

## WORK EXPERIENCE

### Data Analyst Intern – Gigaplex Academy.

January 2024 – June 2024

- Spearheaded the creation of chatbot using OpenAI & **NLP models**, resulting in 20% increase in user engagement.
- Engineered data preprocessing techniques to **optimize chatbot performance**, enhancing accuracy by 15% and streamlining processing time by 30% to boost customer satisfaction and operational efficiency in the AI technology sector.
- Conducted in-depth analysis of student performance and engagement data, **identifying trends**, resulting in a 25% increase in program optimization.
- Built in-depth performance **reports**, leading to a 20% increase in program efficiency and empowering strategic **decision-making** through precise **data analytics** and **visualization**.

### Graduate Teaching Assistant – George Mason University.

August 2023 – May 2024

- Conducted 2+ engaging lectures and facilitated 4+ hands-on sections to promote diverse learning experiences, showcasing commitment to effective teaching methodologies.
- Implemented **data-driven** instructional support strategies to aid faculty members during classroom instruction and refined assignment administration.

### Data Analyst - Quality Kiosk Technology.

November 2020 – July 2022

- Orchestrated** a robust **ETL pipeline** using **Apache Spark** and **Databricks**, transforming 20 million+ delivery records: accelerated analysis capabilities and improved data reliability by 25%.
- Developed and managed interactive **Tableau dashboards**, delivering real-time **operational insights** that led to a 20% reduction in project turnaround time and increased stakeholder engagement by 30%.
- Integrated **machine learning** models with testing framework via **Azure cloud services**, achieving a 40% increase in operational efficiency and processing 1000+ test cases per minute.

## PROJECT

### Yelp Insights: Revealed User Behavior and Preferences through Data-driven Analysis.

January 2024 – March 2024

- Orchestrated the creation of an ETL pipeline that managed over 1 million Yelp dataset entries, boosting data pre-processing efficiency by 40% with advanced **feature engineering** methodologies.
- Engineered a **sentiment analysis** feature with 95% accuracy, uncovering critical insights into **user behavior** and preferences, which facilitated strategic improvements.

### Real Estate Insights: Web Data ETL Pipeline & Tableau Dashboard.

February 2024 – March 2024

- Enhanced data accuracy by 30% and streamlined processing time by 20% through managing an **end-to-end ETL pipeline** for 3.5 million housing records, extracting, and transforming 12+ features.
- Developed a **Tableau dashboard** with 15+ visualizations, enabling comprehensive housing **data analysis** at state, county, city, and zip code levels, enhancing **decision-making** by 30%.

### Insightful Analysis of Divvy Bike Share Data: Revealed Patterns for Strategic Optimization.

August 2023 – December 2023

- Prepared and preprocessed 11 million records from 24 files of Divvy Bike Share data, encompassing 13 columns each, to optimize programs.
- Performed **data wrangling** using Python **Pandas**, processing null values in start and end station columns, resulting in 8.5 million valid records.

### Volatility Prediction for Improved Options Pricing.

January 2023 – May 2023

- Enhanced market volatility forecasting accuracy by implementing a **data pre-processing pipeline**, resulting in a 10% increase in **predictive performance** and a 25% reduction in **data anomalies**.
- Ensembled modeling approach incorporating **XGBOOST** and **LIGHTGBM** improves model accuracy by 18% compared to individual models, enhancing pricing efficiency in financial markets by at least 20%.

## ACHIEVEMENT

- Secured registered **copyright** for Automatic Coconut Harvesting Robot from **Indian Patent Office**; recognized as the peer robot in the agricultural industry and awarded for **innovation**.

## CERTIFICATIONS

- Google Advanced Data Analytics Professional** Certificate, Coursera.org, 2024.
- Certified **Alteryx Designer** Core, Alteryx, 2024.
- Databricks **Certified Apache Spark Developer Associate** Certificate, Databricks, 2024.

## EDUCATION

George Mason University, Fairfax, VA

August 2022 – May 2024

**M.S. Applied Information Technology Concentration Data Analytics & Intelligent Method**

GPA: 3.80 / 4.0

Pune University, Pune, India

August 2016 – June 2020

**Bachelor of Engineering Instrumentation & Control**

CGPA: 8.33 / 10.0
