

Saumya Srivastava

Dallas, Texas, 75244, United States, 6827167339, saumya.sri2701@gmail.com

PROFILE

A qualified analytics candidate with demonstrated experience in systems management, data analysis, and technical troubleshooting. Strong strategic skills in implementing company policies through a systematic approach using analytical data and interacting with relevant personnel.

EMPLOYMENT HISTORY

May 2024 — Aug 2024	Data Analyst - Intern, TE Connectivity	Winston-Salem, NC, USA
	- Debugging Systems and Automating Workflows: Migrated HR systems of over a thousand utilizes users to ServiceNow and integrated it using SQL validation. - BI and ETL Proficiency: Created procedures for Extract-Transform-Load (ETL) which optimized data processing and migration by 30% in time. - Data Solutions on the Cloud: Moved datasets into AWS and improved the efficacy of dashboards such focused on financial data. - Debugging Systems and Automating Workflows: Analyzed systems, identified service bottlenecks, and developed Python scripts alongside analytical models to enhance system throughput. - Analytics in Supply Chain Management: Developed applications tracking and forecasting financial and operational metrics for the automotive supply chain. Used BI tools. like tableau to analyze and optimize supply chain data streams to enhance operational efficiency.	
Apr 2018 — Nov 2022	Business/Data Analyst, AlmaMate Infotech	India
	- Talent Management and HR Metrics: Participated in the initiatives of talent management by studying datasets HR metrics including employee performance, retention and recruitment. Developed dashboards with Tableau and reported with macros in VB to enhance HR reporting systems. - Data Integrity and Governance: Managed reporting databases and was responsible for business reporting data integrity and governance. Developed SQL scripts and reported with BI tools as part of the process of continual improvement. - Process Optimization for ETL: Interacted directly with clients and business users to resolve issues related to failures in ETL operations and enhanced the overall performance of the processes by 20%. - Optimization of System Performance: Enhanced performance by 15% through the automation of manual processes using Python scripts and the analysis of data pipelines for task redundancy. - Technical Assistance: Reduced system transfer downtimes by 25% through technical assistance during system transfers to ensure functional and operational migration. - Business Solutions: Examined Access databases for appropriate and efficient answers to business questions and needs, thereby decreasing project time by a noteworthy 10%. - Engagement with Stakeholders: Worked with primary stakeholders to analyze the business as well as present organizational information to meet their expectations and align with their objectives. - Monitoring KPI: Generated projects that raised user activity for monitoring Key Performance Indicators (KPIs) and enhancing user interaction.	

EDUCATION

Jan 2023 — Dec 2024	MS in Information Systems, The University of Texas at Arlington	Arlington, TX, USA
	Graduated GPA: 3.4/4.0 Performed outstanding in courses like project management, database management and data engineering	
Sep 2016 — Mar 2018	MBA in Marketing and Human Resource Management, Galgotias University	India
	Graduated 3.8/4.0	

Skills

- Programming & Scripting: Python, SQL, JavaScript, VB Macros
- Data Visualization: Tableau, Power BI
- Database Tools: Microsoft Access, RDBMS, NoSQL
- Cloud Computing: AWS, Azure (conceptual and practical knowledge)
- Networking: HTTP/s, TCP/IP, DNS, OSI model, routing, switching, firewalls
- Technical Troubleshooting: System administration, data migration, performance tuning
- Project Management: Agile development, stakeholder engagement, process improvement
