

Bavitha Varala | ServiceNow Developer

GA, US | +1 (470)-667-6832 | bavithasnow@gmail.com | [LinkedIn](#)

SUMMARY

- ServiceNow Developer with six years of experience delivering scalable, secure, and enterprise-grade solutions across ITSM, ITOM, HRSD, SPM, EAP, CMDB, Discovery, and Agile Development 2.0.
- Strong hands-on expertise in building, configuring, and customizing HR Service Delivery capabilities including lifecycle events, onboarding workflows, case management, knowledge, and fulfillment automation using Flow Designer and Integration Hub.
- Skilled in JavaScript, GlideRecord, Business Rules, Client Scripts, Script Includes, ACLs, UI Policies, UI Actions, and reusable framework development.
- Experienced in designing secure, compliant, and scalable solutions aligned to coding standards, platform best practices, and CI/CD deployment models.
- Adept in third-party and cloud system integrations using REST, SOAP, MID Server, ECC Queue, LDAP, and event-driven webhooks.
- Experience collaborating with HR systems such as Workday and PeopleSoft for employee data alignment, onboarding triggers, profile sync, and integration mapping.
- Proficient in Agile/Scrum practices—participating in sprint ceremonies, backlog grooming, estimation, code reviews, retrospectives, and continuous improvement.
- Strong communication, problem-solving, debugging, and mentoring skills, with ability to translate technical concepts for non-technical stakeholders.

PROFESSIONAL EXPERIENCE

Travelers, Atlanta ServiceNow Developer Tech Stack: ServiceNow ITSM ITOM HRSD Integration Hub REST Jira Spoke Rally Spoke Webhooks • Delivered enterprise-scale ITSM/ITOM and HRSD enhancements across multiple workstreams from requirements to deployment and hypercare support. • Implemented HR Service Delivery—including lifecycle events, onboarding processes, HR case templates, document templates, and fulfillment workflows. • Automated HR and IT processes using Flow Designer, Integration Hub, subflows, and orchestrations to streamline request handling and reduce manual steps. • Integrated HRSD workflows with core HR systems (Workday, PeopleSoft) for employee data flow, onboarding triggers, and profile synchronization using REST APIs and Integration Hub spokes. • Configured Enterprise Agile Planning for ART governance, standardizing Epics, Features, and Stories across teams. • Drove Strategic Portfolio Management to prioritize and govern initiatives, improving project delivery timelines through aligned prioritization and resource allocation. • Developed secure, reusable platform components using Business Rules, Script Includes, UI Policies, ACLs, and GlideRecord APIs. • Created leadership dashboards across multiple modules for visibility into KPIs, metrics, and service performance. • Built and maintained secure integrations with Jira, Rally, REST endpoints, webhooks, MID Server and ECC Queue. • Participated in defining coding standards, reusable logic frameworks, versioning practices, and secure development patterns. • Ensured solution quality through unit testing, documentation, peer code reviews, and adherence to development best practices. • Worked closely with Product Owners, Scrum Masters, and stakeholders to clarify requirements and ensure successful feature delivery. • Evaluated technical impacts of platform upgrades and coordinated deployment readiness for new releases.	Jun 2023 - Current
Boston Consulting Group, India ServiceNow Developer Tech Stack: ServiceNow CMDB CSDM LDAP Integration Hub Flow Designer Webhooks Transform Maps • Established a CSDM-aligned CMDB foundation and governance by defining CI classes, attributes, identifiers, and relationships to enable accurate dependency modeling and impact analysis. • Operationalized data ingestion via LDAP, initial and incremental data loads, Import Sets, Transform Maps/Scripts, and APIs with validation and exception handling to preserve data quality. • Deployed and managed MID Servers and configured Discovery (credentials, schedules, patterns, probes/sensors), with proactive troubleshooting to maintain comprehensive and reliable CI coverage. • Implemented Service Mapping to build end-to-end application and business service maps, linking infrastructure and apps for root-cause and change-impact analysis. • Enabled ITSM reporting and continuous improvement by creating dashboards/KPIs and ensuring Incident, Change, Problem, and Knowledge processes consume CMDB and service maps effectively. • Designed and published scoped Scripted REST APIs with versioned endpoints, JSON contracts, input validation, and standardized error handling to support predictable third-party integrations. • Orchestrated outbound REST integrations with Integration Hub spokes and Flow Designer, implemented event-driven webhooks and notifications, and executed initial/incremental data migrations with audit logging for traceability.	Jun 2021 - Dec 2022
Abbot, India	July 2019 – Jun 2021

Jr. ServiceNow Developer

Tech Stack: ServiceNow | Import Sets | Transform Maps | Service Catalog

- Built and maintained 30+ Service Catalog items with order guides, variables, and variable sets, documented build steps and user guidance in Knowledge articles.
- Created data sources and scripted Transform Maps to standardize imports into core tables; resolved mapping errors and duplicate records during loads.
- Configured and supported ITSM processes including Incident, Problem, Change, and SLAs, updated forms, rules, notifications, and Knowledge articles.
- Developed basic Client Scripts, Business Rules, and Flow Designer flows to automate field validation, notifications, and task assignments.
- Coordinated platform maintenance activities such as update set promotion, instance cloning, patching, and family upgrades; executed smoke testing and rollback planning.
- Monitored scheduled jobs, imports, and email actions; triaged integration issues and prepared runbooks and reports to track SLA performance and incident trends.

EDUCATION

Bachelor of Technology, Computer Science	May 2019
Rajiv Gandhi University of Knowledge Technologies, Nuzvid, India.	

TECHNICAL SKILLS

ServiceNow Platform & Modules: ITSM ITOM HRSD Service Catalog CMDB Knowledge Management Service Portal Virtual Agent
Scripting & Development: JavaScript GlideScript GlideRecord GlideAjax Business Rules Client Scripts Script Includes UI Policies UI Actions ACLs
Integration & Automation: Scripted REST APIs Integration Hub Flow Designer Subflows Webhooks MID Server ECC Queue LDAP SOAP/WSDL Inbound/Outbound Email Actions
HR Systems: Workday (data alignment, onboarding triggers) PeopleSoft (HR data mapping & sync)
Discovery & Mapping: MID Servers Discovery Patterns/Probes/Sensors Service Mapping CI Classes/Relationships CSDM Alignment Dependency Views
Reporting & Analytics: Dashboards KPIs Performance Analytics Database Views SLA Definitions
Administration & Maintenance: Update Sets Instance Cloning Patching Family Upgrades Scoped Applications Smoke Testing Rollback Plans
Methodologies & Soft Skills: ITIL Agile/Scrum SAFe (ARTs, Epics/Features) Stakeholder Collaboration Requirements Gathering Hypercare Support
Soft Skills & Methodologies: Agile/Scrum Stakeholder Communication Deliver Results

CERTIFICATIONS

ServiceNow Certified Application Developer (CAD)
ServiceNow Certified System Administrator (CSA)
