

Seyma Senturk

QA AUTOMATION TEST ENGINEER

Toronto, ON, Canada
Permanent Resident
seymaasenturkk@gmail.com
(437) 248 9492

PROFESSIONAL SUMMARY

- 3+ years experience as a QA automation Engineer extensively working on **Automation, JAVA, Selenium, API, Manual and Web services** applications.
- Strong knowledge of core **Java** with a deep understanding of **Object-Oriented Programming** principles.
- Experienced in working with **Windows** and **iOS** operating systems.
- Proficient in **Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), and Defect Life Cycle**.
- Skilled in Agile methodologies, including active participation in **Agile** ceremonies and working in dynamic Scrum Agile iterations.
- Automated tests using tools such as **Java, Maven, Scripts, Selenium WebDriver, JUnit, and TestNG**.
- Expertise in **TestNG** and parallel test execution with scripts.
- Hands-on experience in Test Automation Development, utilizing open-source solutions for creating **functional, smoke, regression, ad-hoc, and user acceptance tests**.
- Proficient in designing, developing, and maintaining scripts using the **Behavior-Driven Development (BDD)** framework, implementing the **Page Object Model** and **Singleton pattern**.
- Proficient in identifying web elements in **HTML DOM**.
- Experienced in utilizing **Jira-Xray** for project tracking, including test plan creation, test case development, test set creation, and test execution.
- Skilled in creating jobs on **Jenkins**.
- Expertise in database testing, data manipulation using **Oracle SQL Developer** queries, and establishing database connections using **JDBC**.
- Proficient in defect logging, retesting defects, and generating defect reports using various bug-tracking tools.
- Utilized **JDBC** libraries for testing databases and **REST Assured** libraries for **API testing**.
- Familiarity with containers, virtualizations, and ability to assist in designing and implementing computing grids for **Selenium testing**.

TECHNICAL SKILLS

- Languages: **JAVA, SQL, HTML, XML**
- Testing frameworks: **Scripts BDD, Page Object Model, Hybrid, Data Driven**
- Project Building Tools: **Maven**
- Automation Tools: **Selenium WebDriver, TestNG, JUnit**
- Manual Tools: **Postman (API), Oracle SQL Developer (Database)**
- Databases: **AWS, JDBC**
- Database Connection Tools: **Oracle SQL Developer, JDBC**
- Operating Systems: **Windows, IOS**
- IDE: **IntelliJ, Eclipse**
- Version Control: **Git, GitHub**
- CI/CD Tool: **Jenkins**
- Bug Tracking Tool: **Jira-Xray**
- Microsoft Office Tools: **Outlook, Excel, Word, PowerPoint**

EXPERIENCE

Bookofid -Tysons, VA

QA Automation Engineer

Nov 2021 –Present

- Implemented **Agile Scrum** methodology for effective collaboration and best practice adherence.
- Automated testing using **Selenium WebDriver** and **Java**, resulting in streamlined processes and reduced time/cost.
- Actively participated in test result evaluation, documentation, and comprehensive reporting.
- Enhanced existing **test plans**, **test cases**, and scripts to optimize automation efforts for **regression testing**.
- Configured and automated test cases using **Java**, **Selenium WebDriver**, **JUnit**, and **Maven**.
- Conducted **smoke**, **functional**, **acceptance**, and **regression** tests to ensure robust application performance.
- Performed **API Testing** using **Rest Assured Library** and **Postman** tools and validating the **JSON** format requests and responses, using **GET**, **POST**, **PUT**, **PATCH**, and **DELETE** methods. Solid knowledge of working with **SQL** queries and performing Database testing using JDBC libraries in different **RDBMS** like Oracle.
- Regularly engaged in weekly meetings to track testing progress and discuss identified defects.
- Executed automation scripts on various browsers(**Chrome**, **Firefox** and **Safari**), diligently reporting defects and test results to the team.
- Played a pivotal role in **smoke**, **functional**, **regression**, and **end-to-end testing**, meticulously monitoring application behaviour throughout different testing phases.
- Used **Git** for version control and **GitHub** as a remote repository.

Trycloud -Tysons, VA

QA Automation Engineer

Apr 2020 – Oct 2021

- Collaborated in Agile Scrum environment as cross-functional SDET and Manual Tester.
- Developed and executed automation scripts using **Selenium WebDriver** and **Java** programming language.
- Participated in user story analysis meetings and created functional test cases for manual testing.
- Designed and developed **BDD** and **data-driven** frameworks using **Scripts** and **TestNG**, following the **Page Object Model (POM)** design pattern.
- Conducted manual and automated backend testing using JDBC and Java for comprehensive evaluation.
- Written test Scenarios and Scenario Outlines with Examples in Cucumber Feature Files using Gherkin.
- Built project frameworks, managed dependencies, and plugins, and executed tests using Apache Maven.
- Performed backend testing using **Oracle SQL** database, writing SQL queries as needed.
- Implemented script scenario outlines and data-driven tests using Excel data.
- Extensively involved in **regression**, **functional**, and **smoke testing**, generating automated reports for the team.
- Leveraged **Jira-Xray** for requirements management, planning, scheduling, test execution, and defect tracking.
- Used **Postman** for **manual API testing** to evaluate API endpoints.

EDUCATION

Bahcesehir University, Istanbul / Turkey

Feb 2020

Psychology (BACHELOR)
