EDUCATION

M.S., Data Science

San Jose State University, San Jose, USA

Aug 2023 - May 2025

B.E., Computer Engineering

Gujarat Technological University, Ahmedabad, India

Jul 2018 - Aug 2022

EXPERIENCE

Software Engineer | Covert Defenses LLC, USA

May 2024 - Present

- Monitor secure audio signal processing algorithms leveraging **Python** and **Django**, incorporating statistical analysis to enable seamless embedding and extraction of 99% primary audio with high-level encryption.
- Finalize full-stack web applications from scratch with **Flask** and **CI/CD** pipeline on cloud infrastructure incorporating **AWS** interface, **Docker**, and **GitHub**, refining deployment efficiency by 30%.
- Administer a team of 6 for research project on audio segmentation and build **deep learning** models employing **TensorFlow**, **Keras**, and **PyTorch**, enhancing detection accuracy by 15%.

Software Engineer | Ace Analytics, Gujarat, India

Aug 2022 - Aug 2023

- Orchestrated design of **PostgreSQL** databases with **Node.js** backend, exercising **REST API** concepts to support large-scale inventory, order, and supply chain management systems, handling over 10,000 transactions daily.
- Spearheaded one-click Chrome extension operated by **JavaScript** for Gen AI Chatbot & Writing Assistant, integrating Stripe for secure payment processing and increasing user engagement by 16%.
- Collaborated with project managers and teams for developing real-time voice recorder platform with **Python**, **MySQL**, and socket programming on **GCP**, revamping communication by 25% and processing multiple audio signals.

Python Developer Intern | Turabit LLC, USA

Jan 2022 - Jun 2022

- Led **data analysis** for chatbot development operating on **Flask**, demonstrating **Python** proficiency with quality assurance and **LLM** concepts, improving efficiency and maintainability of **AI** assistants by 40% for **NLP** challenges.
- Parallelized data pipelines exploiting **Python**, **PySpark**, and **Airflow** to transform 97% web traffic data and store it as parquet files in HDFS used for generating weekly and quarterly sales reports in business development.
- Engineered and rigorously tested **AI** Chatbot using Google Dialogflow, synthesizing natural language understanding to create a sophisticated conversational interface demonstrating a strong grasp of deep learning principles.

SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, Scikit-Learn, PyTorch, TensorFlow, Pyspark), SQL, R, JavaScript

Framework: Flask, Django, Node.js, Express.js, Streamlit, Fast API, React.js, Next.js, REST API, JIRA

Cloud Technologies: AWS, GCP, Azure, Docker, Kubernetes, Git, CI/CD, ETL, Kafka, CUDA

Data Science: Machine Learning, Deep Learning, AI, LLM, Data Mining, NLP, Visualization, Statistical Analysis, Big Data

Software Development: Object Oriented Programming, Data Structure and Algorithms, Tableau, Power BI, MS Excel

Soft Skills: Conflict Resolution, Leadership, Cross Team Collaboration, Analytical Reasoning, Design Thinking

PROJECTS

LLM for Multi-Modal Adaptive Data Interpretation | Large Language Models, NLP, Cloud Technology

Dec 2024

- Delivered a multimodal LLM on GCP engaging Terraform, enabling processing of 5+ data types (text, audio, images, etc.) in response to user queries with data warehousing for efficient storage and retrieval of multimodal inputs.

No-Show Prediction Model for Patient Appointments | Data Mining, Machine Learning, Big Data Analysis

Sep 2024

- Utilized healthcare dataset for predictive system of appointment no-shows via decision trees and random forests, improving precision by 28% through data mining and scalable big data architecture inspired by flight cancellation.

Predictive Analytics for Monitoring Digital Habits via Fitness Data | Python, Deep Learning

Dec 2023

- Directed a team of 6 to construct a neural network employing auto-encoders and KNN Imputer on unstructured children's fitness data, building ETL pipeline and visualizations, overhauling detection of internet use issues by 15%.

Real-Time Sentiment Analysis Dashboard | Airflow, Data Visualization, Cloud Technology

Nov 2023

- Implemented real-time Apache data pipeline on GCP, processing 1M+ records by sentiment analysis on New York Times dataset programming Python for NLP, SQL for database management, optimizing data analysis on cloud.

ACHIEVEMENTS

Winner | [Smart India Hackathon](#), Healthcare and Education Ministry of India

Aug 2022

- Led a team of six engineers to develop a customizable B2B chatbot platform implementing Reinforcement Learning and Generative AI, providing personalized chatbot creation with optimized performance and scalable deployment.
