SUMMARY

Entry-Level Software Engineer with hands-on experience in Python, JavaScript, React (learning), and Agile development. Known for consistent, reliable contributions to team projects and the ability to collaborate effectively in fast-paced environments. Skilled in debugging, version control (Git/GitHub), and responsive design, with experience providing guidance to peers and students. Strong analytical thinker and highly motivated to build scalable, user-focused applications while continuously learning and improving.

SKILLS

Languages: Python, HTML5, CSS, JavaScript

Tools and Frameworks: Git/Github, Jira, VS Code, IntelliJ, Doxygen, Maven, Figma

Development Practices: Agile/Scrum, Software development lifecycle, Design Patterns, Unit Testing, White/Black Box Testing

Learning: React (In-progress), TypeScript, Next.JS, CI/CD with GitHub Actions

EDUCATION

University of Minnesota Twin Cities

Minneapolis, MN

Bachelor of Arts in Computer Science

Sep 2018 – Dec 2023

- Cumulative GPA: 3.34/4.0
- President's Emerging Scholar

Capstone: Autonomous Drone Simulation – C++, Docker, Routing Algorithms (A, Dijkstra), Design Patterns

Relevant Coursework: Machine Architecture and Organization, Program Design and Development, Algorithms and Data Structures, Introduction to Operating Systems, User Interface and Design, Software Engineering I and II

PROJECTS

Find My Garage Sale App UI - UX Design Project | *Figma*

Sep 2023 – Dec 2023

- Collaborated with a team of 5 to design a responsive Android application UI using Figma for locating nearby garage sales
- Conducted customer experience research, user interviews, and competitor analysis with users of diverse age groups and needs
- Applied UI/UX best practices through heuristic evaluations and cognitive walkthroughs to drive iterative, user-centered design of wireframes and prototypes
- Finalized a design system for a scalable front-end

Capstone Project: Autonomous Drone Simulation | *C, Docker, Github, Design Patterns*

Sep 2022 – Dec 2022

- Partnered with 3 students to create a simulation of drones and robots for an Autonomous Vehicle Transportation System, modeled after popular ride-sharing platforms like Uber using design patterns (factory, strategy, decorator)
 - Enhanced drone movement algorithms by implementing DFS, A*, and Dijkstra to support user selected route
 - Designed and implemented a modular software architecture using Agile methodology
 - Integrated drone battery functionality and recharge stations using Decorator and Factory design patterns to enhance system flexibility and scalability
-

EXPERIENCE

Medical Interpreter

Osseo, MN

Kim Tong Translation Services

Sep 2022 – Present

- Facilitate communication between healthcare professionals and Limited English Proficient individuals by proficiently interpreting in Somali and English, both on site and over the phone, in order to enhance inclusivity and accessibility in healthcare communication
- Analyze and accurately interpreted complex medical data, with precision, confidentiality, and cultural sensitivity; adherence to strict ethical standards for all patients
- Develop strong problem-solving and analytical skills through real-time translation of nuanced medical conversations.

Undergraduate Teaching Assistant – Intro to Programming (Python)

Minneapolis, MN

University of Minnesota Twin Cities

Sep 2023 – Dec 2023

- Led 13 Python programming labs; guided 30 students on debugging, test-driven development, and GitHub usage
- Held office hours to support student learning and resolve coding challenges
- Collaborated with the course instructor and 27 TAs to refine teaching materials, integrate real-world applications, and adapt the curriculum
