

Professional Summary:

- Total 7+ years of experience in Information Technology, Experience as architecture in Installation, configuration, design, development, testing and implementing architecture of enterprise wide security applications using CA IDM, CA SiteMinder, PingFederate, PingAccess, Involved in the upgrade of PingFederate 6.0 to 8.0 and 8.0 to 9.0/10, PingAccess 4.0 to 5.0 and 6.0.
- Experienced in installing, configuring SiteMinder policy servers, Web agents, Web Agent Option Packs, Secure Proxy servers, PingFederate, PingAccess, ODSEE 11g server (LDAP) and various Web & Application servers on Multiple platforms like windows.
- Experienced in SAML based authentication 1.1 and 2.0 using PingFederate, SiteMinder Federation and integrate with SiteMinder authentication and another adapter.
- Experienced in installing PingFederate on both Linux and Windows Platform.
- Worked on all the PingFederate OAUTH grant types to get the access token to access the protected API. Supported development with integration of Mobile Apps using OAuth/SAML in PingFederate.
- Experienced in implementing the SiteMinder solution to support Tokenized ID's.
- Used Keycloak to authorization and authentication.
- Solid understanding of Identity Access Management architecture and exposure to entire features of CA SiteMinder, PingFederate and Azure.
- Experienced in architecture implementing OAuth & OpenID Solutions using PingFederate. Worked on PingFederate to allow users to perform single sign - on with other third-party applications
- Experienced in implementing OAuth & OpenID Solutions using PingFederate.
- Worked on PingFederate to allow users to perform single sign - on with other third-party applications.
- Deployed PingFederate as both Engine and Console servers.
- Experienced in performance testing the Ping Engine servers depending on the min and max threads, depending on that we used to scale the number of engine servers per cluster.
- Experience in Active Directory assist in design and changes to Group Policy. Also familiar with Active Directory Federation Services (ADFS).
- Experience in designing Agents, SLA, Correspondence, HTML and Validation rules.
- Experience with Flow Actions, Agents, SLA, Correspondence, PRPC Security, Reports, Listeners (File, MQ), Connectors and Services.
- Active Directory Federation Services (ADFS), SAML, web Single Sign-on (SSO), related authentication technologies.
- Support Single Sign-On using Active Directory Federation Services with Multifactor Authentication
- Protected Restful API's using OAuth in PingFederate so that it can be accessed only with Access Tokens.
- Experienced in installation and configuration of PingAccess Policy Servers and PingAccess Agents.
- Experienced on application configuration with PingAccess and defining PingAccess Sites, Site Authenticators, Virtual hosts, Policies and Rules.
- Collaborated with Application Control Assessment (IAM), Vendor Risk Management, Infrastructure Control Assessment (KPI), Privacy Assessment, Cyber Security (Burp Suite), and Business Logic Assessment.
- Experienced in PingAccess Integration with PingFederate to protect the applications using PingAccess Tokens.
- Involved in vendor evaluations for Multi Factor Authentication (MFA).
- Research, evaluate, design, test, recommend, and plan implementation of new and/or improved information security with a focus on SSO and MFA with consumers, caregivers, vendors and partners.
- Experienced in configuration of PingAccess both as Proxy Gateway to decode the JWT tokens, and also by installing the agent on application server to communicate with PingFederate server.
- Created SP/IdP connections using PingFederate with external partners.

AREA OF EXPERTISE:

Single Sign-On

Ping Access 3.0/4.0, PingFederate 7.0/8.0/9.0/10, SiteMinder R12 SP2, SP3 / R6 SP1, SP2, SP4, SP5, SP6 /5.5 Webagent 4.x,5.x,6.x,12.x, APS 4.0, MFA, SAP Agents 5.6/12 and Session Linker r12

Directory Server	Netscape Directory Servers 4.x, SunOne/iPlanet server 5.x,6.x MS Active Directory, Oracle Directory Server 11g, OUD 11g and iPlanet meta Directory Server 5.x., ADFS
Servers	IBM WebSphere, SunOne/iPlanet Webserver, BEA WebLogic, JBoss, SunOne application server, IIS, Apache and Apache tomcat
Databases	Oracle, SQL, MySQL and MS SQL Server

Work Experience:

Excellus BCBS

Nov 2021 - Present

Location: Rochester, NY

Senior Identity Access Manager

Responsibilities:

- Worked on moving around 50 applications from OAM to PingAccess 4.0 to 5.0 and 6.0. Implemented a lot of other custom features with SecureAuth like Post authentication for custom attributes and also implementing geo-location.
- Implementation architecting Access control, MFA, PingFederate. Creating Active directory (cloud) for app services in azure management portal using RBAC other protocols.
- Worked on Microsoft Entra ID for Azure SSO Implementations and for conditional accesses.
- Perform Installation and configuration of SailPoint IdentityIQ
- Used Keycloak for Single Sign on and Single Sign Out.
- Worked with Keycloak to create custom roles and groups.
- Implement REST classes using SailPoint Rest Application.
- Developed and maintained PowerShell scripts for automating processes
- Automated MicrosoftIdentityManagement installation
- Used Microsoft Entra ID for configuring the risk policies and MFA registration policy.
- Implemented and configured Confidential IAM solution in a multi-forest, multi-domain Active Directory environment
- Modified the synchronization scripts through Powershell which allows the data integration to process.
- Automated ActiveDirectory migration and custom activities
- Build and Configure SailPoint in-built tasks like aggregation, ID refresh, schedule tasks, correlation, etc.
- Configuration and development of SailPoint Life Cycle Events (LCM).
- Customizing and branding of SailPoint solution.
- Worked on Token Generator and Token Processor to establish a connection between two web services from different Enterprises and PingAccess and JWT tokens to authenticate the user using PingFederate.
- Experience in doing Web service federation (WS-Fed) between two web services' using SAML and by creating connections between the two soap Service clients.
- Designed KPI monitoring & reporting framework to measure service providers' quality, adherence to company processes & value-ad.
- Used CrowdStrike to identify identity based threats and responded back from not happening. many challenges were faced during this incident response.
- Experience in installing Okta's Lightweight agent to integrate with Active Directory.
- Provides guidance on the development of metrics, KPI s, and reports needed to measure the health and status of services.
- Setup Daily, Weekly, Monthly Backups and check failovers.
- Configured OKTA inbuilt multifactor authentication for additional security.
- Developed custom PingAgent using Ping SDK and Implemented SAML Protection with Digital Signature and configured PingFederate clusters and configured PingOne desktop for cloud based SSO.
- Worked on moving around 50 applications from OAM to PingAccess.
- On board the applications and provided seamless authentication and SSO using OKTA.
- Manage SSO and MFA server inventory and work with different teams to manage SSO servers, firewalls, storage, network etc.
- Worked on Custom Authentication Schemes in PingFederate based on Business needs.
- Involved in working on PingFederate, configuration of Identity Provider and Service Provider and troubleshooting various issues regarding Authentication Request, SAML token and provided solutions for complex application using SiteMinder and PingFederate.
- Configured Microsoft office365 with Okta.
- Participated extensively in designing application alongside developers which involves setting up Access groups, Access Roles, Operators, Application ID, Work groups, Work basket and SLA rules.

- Designed, deployed, and supported highly available and scalable PingFederate infrastructure in on premise that provides single-sign-on (SSO) and federation solutions for internal/external access.
- Setting up SAML applications in OKTA.
- Created federation trust between PingFederate and SiteMinder for seamless SSO for applications during migration strategy for utilizing SMSESSION using coreblox token service adapter
- Migrated around 100 applications to use the new solution which offers the users with Kerberos Authentication internally and the Forms based authentication externally using PingFederate 9.2.
- Executed platform upgrades for PingFederate.
- Designed and Developed SLA (Service level Agreements) as per Business requirements.
- Have Built and grown strong collaborative relationships with key stakeholders to effectively get their application on boarded into OKTA.
- Creating and managing application integrations for identify and access management. Having Experience of Creating conditional Access policies Multifactor authentication (MFA), Resetting MFA and Resolving the MFA issues.
- Installation and configuration of PingAccess.
- Integrated Ping Access with PingFederate servers to authenticate using custom Adapters.
- Integrated OAuth with PingFederate to protect RESTful API's.
- Protected multiple applications both web based, and API based using PingAccess and PingFederate.
- Worked on OAuth Integration using PingFederate and PingAccess and implementing Federation SAML services to SSO into third-party vendors.
- Met with SSO/MFA service providers (CyberArk, IdentityX, SecurAuth, and Okta. PingOne, etc) security teams discussing cloud/on-premise solution, security requirement, authentication options, application installation, and integration points.
- Implemented OAuth to access the protected API with Access Token by using Different OAuth Grant types.
- Integrated PingAccess with PingFederate System to get authenticated by PingFederate and Authorized by PingAccess Servers using the Access Control Lists.
- Provides guidance on the development of metrics, KPI s, and reports needed to measure the health and status of services.
- Setup Daily, Weekly, Monthly Backups and check failovers.
- Developed custom PingAgent using Ping SDK and Implemented SAML Protection with Digital Signature and configured PingFederate clusters and configured PingOne desktop for cloud based SSO.
- Worked on moving around 50 applications from OAM to PingAccess.
- Manage SSO and MFA server inventory and work with different teams to manage SSO servers, firewalls, storage, network etc.
- Worked on Custom Authentication Schemes in PingFederate based on Business needs.
- Involved in working on PingFederate, configuration of Identity Provider and Service Provider and troubleshooting various issues regarding Authentication Request, SAML token and provided solutions for complex application using SiteMinder and PingFederate.
- Participated extensively in designing application alongside developers which involves setting up Access groups, Access Roles, Operators, Application ID, Work groups, Work basket and SLA rules.
- Designed, deployed, and supported highly available and scalable PingFederate infrastructure on premise that provides single-sign-on (SSO) and federation solutions for internal/external access.
- Created federation trust between PingFederate and SiteMinder for seamless SSO for applications during migration strategy for utilizing SMSESSION using coreblox token service adapter
- Migrated around 100 applications to use the new solution which offers the users with Kerberos Authentication internally and the Forms based authentication externally using PingFederate 9.2.
- Executed platform upgrades for PingFederate.
- Designed and Developed SLA (Service level Agreements) as per Business requirements.
- Creating and managing application integrations for identify and access management. Having Experience of Creating conditional Access policies Multifactor authentication (MFA), Resetting MFA and Resolving the MFA issues.
- Installation and configuration of PingAccess.
- Integrated Ping Access with PingFederate servers to authenticate using custom Adapters.
- Integrated OAuth with PingFederate to protect RESTful API's.
- Protected multiple applications both web based, and API based using PingAccess and PingFederate.
- Worked on OAuth Integration using PingFederate and PingAccess and implementing Federation SAML services to SSO into third-party vendors.
- Met with SSO/MFA service providers (CyberArk, IdentityX, SecurAuth, and Okta. PingOne, etc) security teams discussing cloud/on-premise solution, security requirement, authentication options, application installation, and integration points.
- Implemented OAuth to access the protected API with Access Token by using Different OAuth Grant types.
- Integrated PingAccess with PingFederate System to get authenticated by PingFederate and Authorized by PingAccess Servers using the Access Control Lists.

- Assisted developers with integration of Mobile Apps using OAuth/SAML in PingFederate.
- Created Linux/Windows virtual environments installing POC applications, LDAP directory services, databases (Oracle/SQL, MySQL), and Web Services (IIS, Apache). AWS (IaaS, PaaS, SaaS) infrastructure design.
- Worked on PingFederate Clustering so that we can have multiple Engine servers to serve the requests in parallel and single admin server for a cluster.
- Installed and configured SiteMinder policy servers and policy stores to utilize MS SQL Database as policy store and AD LDS as the user store..
- Deliver provision for login issues, check log files, work with client and SAML Level 3 to find Root Cause Analysis of SSO problems, gather accurate useful information from end user for SSO/MFA issues

Environment: Windows 2012 R2, RHEL 7.0, PingFederate 8.4,8.0,9.0,10 PingAccess 4.1, AD (LDAP) as User Store, SAML, MAF, OAuth, Oracle Database as Policy store, Apache Web Server, IBM Http Web Server., Azure, SSO

GlaxoSmithKline

June 2020 to Oct 2021

Location: Upper Providence, PA

Identity Access Manager

Responsibilities:

- Valuable experience in analyzing IAM logs, IAM application server logs, provisioning server logs to troubleshoot various authentication/endpoint related issues.
- Co-ordination with Server hosting team if any hardware related issues.
- Co-ordination with Ping Federate vendor if any software related issues.
- Maintained both Test and Production servers for Ping Federate along with the cluster management and timely Replications to deploy changes to servers.
- Installing and configuring Forgerock servers.
- Experience in doing Web service federation (WS-Fed) between two web services' using SAML and by creating connection between the two soap Service clients.
- Designed KPI monitoring & reporting framework to measure service providers' quality, adherence to company processes & value-ad.
- Provides guidance on the development of metrics, KPI s, and reports needed to measure the health and status of services.
- Setup Daily, Weekly, Monthly Backups and check failovers.
- Used Python code for authentication for web application build in it.
- Migration application from Forgerock to Okta.
- Using Python requests, called various APIs for user credentials.
- Developed custom Ping Agent using Ping SDK and Implemented SAML Protection with Digital Signature.
- Designed, deployed and supported highly available and scalable Ping Federate infrastructure in AWS and On-premise that provides single-sign-on (SSO) and federation solutions for internal accesses.
- Ping Federate Performance tuning for supporting support heavy traffic.
- Build and Configure Sail Point tasks like aggregation, ID refresh, schedule tasks, correlation, etc.
- Responsible for preparing documentation for each application and providing the Run Book to the Operations team to troubleshoot issues.
- Experience in implementing CA Siteminder policy server, framing Rules and Policies, Policy Server maintenance, SSO call clearance, Web Agent & Application agent installations, troubleshooting production problems.
- Responsible for provisioning users across endpoints like Active Directory, LDAP, Unix, and RACF/Mainframe along with explore and correlating users from various endpoint.
- Configured Affiliate agents, RADIUS agents to provide federation of web services in the SSO environment providing authentication & authorization to IDM.
- Good knowledge with PIV-Personal Identity Verification.
- Configured custom alerts and e-mail notifications based on the business needs.
- Created and updated the provisioning policies as per the change in the business environment using Policy Xpress.
- Developed multiple Policy Xpress to trigger on various tasks and to generate standard company requirements like generation of unique ID's, passwords, emails, record entries etc.
- Responsible to handle complex JobCode logics which involved multivalued attributes and multiple PX's to tie groups, provisioning roles and endpoints to respective JobCode.
- Worked on setting up remote task to CA IDM through Web services calls from EFI front-end applications via Task Execution Web Service (TEWS).
- Good experience in setting up Bulk Load Clients and automating different IDM tasks.
- Migrated passwords from legacy application to CA IDM capturing the last password change date.

- Expertise in implementing SAML as both Identity Provider and Service Provider across multiple platforms Using PingFederate.

Environment: Windows 2012 R2, RHEL 7.0, PingFederate 8.4,8.0,9.0,10 PingAccess 4.1, AD (LDAP) as User Store, SAML, MAF, OAuth, Oracle Database as Policy store, Apache Web Server, IBM Http Web Server., Azure, SSO.

T- Mobile

Oct 2017 – May 2020

Location: Atlanta, GA

Identity Access Manager

Responsibilities:

- Provided solutions for complex application using SiteMinder and Ping federate.
- Hands on experience on Ping federate, CA Single Sign-ON, CA Advance Authentication, CA Secure Proxy Server.
- Installed and configured SiteMinder policy servers and policy stores to utilize MS SQL Database as policy store and AD LDS as the user store.
- Use of rules for complex authorization scenarios and custom built adapters to handle complex authentication scenarios.
- Installed and Configured PingAccess to authenticate and authorize the users using Ping federation as token provider.
- Hands on experience in designing, deployment, implementation and architecture with Ping Access and PingFederate.
- Experiencing in Architecture Integrated SAAS applications, service now, and tableau, KLT with Azure production servers and AWS in Non-production. Experience with Ping Federate, SecureAuth and OAM Federation with SAML 2.0
- Creating as architect in Ping Federate with external partners. Implemented Single sign-on using the Unbound id component to interact with the Customer LDAP. Provided solutions for complex application using SiteMinder and Ping federate
- Experience in protected as architecture in all multiple applications both web based and API based using Ping Access and Ping Federate. Migrated login pages from SiteMinder to ping and involved in building custom adapters for ping to analyze risk based transactions. Worked on OAuth Integration using PingFederate and PingAccess and implementing Federation SAML services to SSO into third-party vendors.
- Hands-on configuration of SP MFA rules/policies, PingFederate SSO Connections, Private Clouds, and LDAP browsers.
- Used Ping API to deploy and create SAML changes. Architecture and implementation of Identity and Access Management (IAM) solution using Ping Federate, Risk-based 2-Factor Authentication (using RSA Adaptive Authentication) and OAuth 2.0.
- Hands on experience with Apache, SunOne Web servers and WebLogic and WebSphere Application servers in Identity and access management environment.
- Developed custom PingFederate adapters and PingFederate custom data source drivers using PingFederate Java SDK (IdpAuthenticationAdapterV2 / Custom Data Source Driver /Password Credential Validator).
- Experience with application configuration with Ping Access and defining Ping Access Sites, Site Authenticators, Rules, Virtual hosts, Policies and Rules.
- Built a new IT Governance Team responsible for IT Audit, Service Management, KPI's & DR / BCP planning, coordination and testing.
- Hands on experience in IAM requirement analysis, implementation of Access Gateways and SAML, OAuth, WSFed and OpenID based integrations using PingFederate.
- Enabled LDAP authentication for PingFederate Admin console and enabled SSO for Ping access admin console.
- Expertise in implementing SAML as both Identity Provider and Service Provider across multiple platforms Using PingFederate.
- Experience in SAML based authentication 1.1 and 2.0 using Ping Federation, SiteMinder Federation and integrate with SiteMinder authentication and adapter.
- Creating SP/IdP connections using Ping Federate with external partners.
- Implemented Single sign-on using the unbound id component to interact with the Customer LDAP.
- Migrated SAML Based SSO partners from CA Single Sign-On federation to Ping Federate.
- Setup and maintain distributed IT systems including computational resources, servers, storage and net Involved in creating architecture patterns for SiteMinder to ping applications using SAML, OAUTH, Openid connect and ws-federation.
- Configured Network policy server (NPS) in Prod and Non Prod, and NPS extension with Azure tenant for MFA.
- Successfully established and tested Azure AD tenant for production. Provided technical direction to allow Active Directory on-Prem group to populate users.
- Active Directory Federation Services (ADFS), SAML, web Single Sign-on (SSO), related authentication technologies.
- Protected multiple applications both web based and API based using Ping Access and Ping Federate.
- Migrated login pages from SiteMinder to ping and involved in building custom adapters for ping to analyze risk based transactions.
- Worked on OAuth Integration using PingFederate and PingAccess and implementing Federation SAML services to SSO into third-party vendors.
- Used Ping API to deploy and create SAML changes.
- Architecture and implementation of Identity and Access Management (IAM) solution using Ping Federate, Risk-based 2-Factor Authentication (using RSA Adaptive Authentication) and OAuth 2.0.

- Engagement with service owners and business owners and explain them about SAML and Multifactor authentication to protect their applications, and migrate all the users to MFA group to get MFA challenge from Azure AD.
- Designed common framework for Single Sign-On implementation for partners using Ping Federate.
- Ping Federate Performance tuning for supporting heavy traffic.

Environment: Ping Federate 8.3, Ping Access 3.2, Novell Access Manager 4.2,4.3, SAML 2.0, SAML1.1, WS-FED, MFA, SAML, OAuth, SSO, OAuth2.0, MS SQL 2005/2008, Active Directory, Java, C#, PowerShell.

Symantec

Oct 2016 to Sept 2017

Mountain View, CA

IAM Consultant/Intern

Responsibilities:

- Analysis and Implementation of the EJB code and making enhancements to the existing code. Installed, Configured and Maintained Policy Servers, Sun ONE Directory Server, Configured and maintained Policy Store, User stores and key stores in Sun ONE Directory Server.
- Created, Maintained Policy server objects Agents, Domains, Rules, Realms, Policies, and Responses. Intercept access requests for protected resources and work with the Policy Server to determine whether or not a user should have access.
- Integrated CA SiteMinder with CA Identity Manager 12.5. Performed business logic tasks using BLTH and LAH API's. Experience in configuring SSO with Ping Access using out of the box and custom developed authentication schemes.
- Installed and Configured CA SiteMinder 12.0, CA Identity Manager r12/12.5, Sun ONE LDAP Directory server 5.2/6.3, in Development, Break-fix, QA and Production environments on UNIX and Windows Platforms,
- Technical liaison with new business partners in the Federation protocol space – working with Ping Identity and Trustgenix. Implemented SAML server with Ping ID libs, (java & eclipse). Configured One View Monitor to monitor CA/Netegrity SiteMinder components like Policy Servers and Web Agents in both Production and Non-Production.
- Automated identity management tasks such as user provisioning and application access based on each user's relationship with and role within our organization using CA Identity Manager in both Production and Non-Production environments.
- Deployed Applications of various formats like WAR, JAR and EAR on Web Sphere Servers in both Production and Non-Production environments. Migrated SiteMinder Policy Server from version 6.0 to 12.0, Integrated CA SiteMinder with CA Identity Manager
- Implementing Access and Identity management for similar client on OAM/OIM using OUD as AD.

Education:

Bachelors in JNTUH - 2015

Masters , Stevens Henager, Salt Lake City - 2017
