Houston, TX (Open to relocate) | (315)-395-5333 | bsiddhi14@gmail.com | [LinkedIn](#)

SUMMARY

Business Data Analyst with 4+ years of experience translating complex business and customer needs into actionable requirements, user stories, process documentation, and digital solutions. Skilled in SQL, Python, and dashboard creation for actionable data insights. Ready to drive impactful results through advanced analytics.

PROFESSIONAL EXPERIENCE

HealthSnap | *Business Data Analyst* Remote, USA

Mar 2024 - Jan 2026

- Collaborated with cross-functional stakeholders to translate business requirements into analytics-ready user stories in Jira and authored Confluence documentation for KPIs, data sources, and reporting logic, ensuring clear business communication and traceability.
- Piloted a proof-of-concept evaluation of Sigma Analytics by creating sample analyses and validating insights and ad-hoc query capabilities; the assessment showed a 25% faster query response and lower cost, leading to a recommendation for BI adoption across the enterprise.
- Unified Salesforce, Rippling, EHR, billing, and internal systems into daily-refreshed Tableau dashboards, reducing manual reporting effort by 80% and supporting 50+ Care Navigators and 10,000+ patient enrollments.
- Optimized SQL queries, indexing, and data models using RDBMS concepts, improving dashboard load times by 50% and reducing query response time from 5 minutes to 2 minutes.
- Engineered predictive staffing, enrollment, churn, and retention models using Python, SQL, and advanced data analysis techniques, improving forecast accuracy by 30%, reducing attrition variance by 20%, and enabling proactive hiring and patient engagement strategies.
- Automated ETL pipelines with Databricks, Python, and SQL, cutting data processing time by 40% and weekly runtimes from 12 to 4 hours.
- Established a data validation and quality assurance framework, preventing downstream reporting errors across 100+ employee records while ensuring HIPAA compliance, ICD-10 coding accuracy, and data governance standards.
- Produced ad hoc and strategic analytics via Tableau, Salesforce reporting, and advanced Excel modeling (pivot tables, nested formulas, conditional logic), influencing program performance, eligibility decisions, and operational improvements.
- Supported Salesforce Business Systems and Analytics through ad-hoc reporting, dashboard development, user access management, custom fields/objects, validation rules, page layouts, data quality checks, and system documentation, enabling reliable downstream reporting and operational insights.
- Led quantitative analytics projects using SQL (CTEs, window functions) and Python (pandas) to analyze large datasets, delivering Tableau dashboards and stakeholder insights that improved reporting efficiency and enabled data-driven decisions.
- Analyzed Medicare-Medicaid claims data to identify trends, optimize workflows, & support strategic decision-making for healthcare operations.

iConsult Collaborative at Syracuse University | *Business Analyst* Syracuse, USA

Feb 2023 - Mar 2024

- Led product and business analytics initiatives within agile frameworks using SQL, Python, Power BI, and Excel automation, applying management consulting experience to improve workflow efficiency, increase KPI visibility by 25%, and enable faster data-driven decisions.
- Designed, automated, and optimized ETL pipelines and data models using Python and SQL, improving recruiting and product analytics performance by 20% while streamlining end-to-end reporting workflows.
- Built and maintained Power BI dashboards and SQL-based reporting solutions, reducing manual reporting effort by 9 hours per week and improving operational transparency for stakeholders.
- Aggregated and analyzed data from 10+ sources using Python (pandas, NumPy) and SQL, applying TF-IDF vectorization and cosine similarity (scikit-learn) to match job requirements with candidate qualifications, driving strategic hiring decisions and improving talent acquisition efficiency.
- Managed projects end-to-end, gathering requirements, documenting specifications, executing Jira tickets, coordinating UAT, communicating with stakeholders using Power Query, SAS, Tableau, and SQL, delivering actionable insights that enhanced university decision-making.

Spoon Money | *Marketing Data Analyst* Remote, India

Jan 2021 - Aug 2021

- Developed interactive Power BI and Google Data Studio dashboards tracking KPIs, attribution, and campaign performance, enabling rapid identification of underperforming campaigns.
- Ingested, cleaned, and transformed 1+ TB of marketing, sales, and customer data for 10+ Fortune 500 clients using Python and advanced Excel, streamlining reporting and improving data accessibility.
- Implemented Python-based data validation and anomaly detection, reducing reporting inconsistencies by 25% and strengthening data integrity across marketing analytics pipelines.

Deesan Textiles | *Data Analyst* Shirpur, India

May 2019 - Dec 2020

- Analyzed production, inventory, procurement, and operational data to identify process bottlenecks and improve manufacturing performance.
- Developed Excel and VBA reporting tools that automated recurring operational reports and reduced manual reporting effort by ~ 20%.
- Built inventory and production-performance dashboards that helped reduce inventory costs by 20% and production delays by 15%.
- Partnered with operations and management teams to define KPIs, validate source data, and communicate actionable findings.

EDUCATION

Westcliff University | *Doctor of Business Administration*

(Part-time) Expected 2029

Syracuse University | *Master of Science, Information Systems*

Aug 2021 - May 2023

NMIMS University | *Bachelor of Technology, Information Technology*

Aug 2017 - May 2021

KEY SKILLS

- **Programming Languages:** SQL, Python, pandas, NumPy, scikit-learn, SciPy, TensorFlow, PyTorch, R
- **Data Visualization:** Tableau, Power BI, DAX, Power Query, Looker, Excel, VBA, Pivot Tables, Sigma
- **Data Engineering:** Databricks, MySQL, MSSQL, Snowflake, RDBMS Concepts, Data Platforms
- **Tools & Platforms:** Google Analytics, Jira, Visio, SAS, Salesforce, Visual Studio, Figma, Git
- **Professional Skills:** Business Communication, Agile Methodologies, LLM Prompting, Vector Databases, Scrum, Client-first Mentality
