- Maven
- Jenkins
- JIRA

Work History

IBM India Pvt Ltd

December 2021 to December 2023

Senior Software Consultant - Automation Testing

Pune, India

Projects

ISS Facility Management

- Architected, Maintained, and extended automation infrastructure by utilizing various tools like Selenium, Rest Assured, Jenkins, JIRA, Maven, TestNG, IntelliJ IDE, etc.
- Played a key role in aiding the deployment team to establish automated smoke testing across 50 individual environments, each serving a distinct customer base. As a result, we managed to significantly reduce execution time by approximately 1 hour and 45 minutes.
- Identifying, documenting, and prioritizing defects discovered during automated testing, and working closely with development teams to ensure timely resolution.

Bank Of America

- Designing, developing, and maintaining robust automated test scripts for native and web client using Selenium WebDriver, and UFT and comparing both results in excel.
- Collaborated in the creation, optimization, and maintenance of a test automation framework formulated with the BDD Gherkin approach for UI automation.

Dassault Systemes

October 2013 to December 2021

Test Automation Specialist

Pune, India

- Involved in developing and enhancing hybrid automation framework (Selenium-java).
- Achieved a 60% reduction in manual effort by implementing automation for regression scenarios.
- Identifying test scenarios for automation and developing automation test scripts using Selenium WebDriver, SIKULI, and TestNG.
- Configuring and integrating Automation scripts on Jenkins for nightly test suite execution
- Enhanced testing process by replacing manual testing with automated regression testing.
- Performed end-to-end testing by understanding business requirements.

- Develop test cases, test scenarios, and Requirement traceability matrix for new Highlights in each release.
- Analyzed customer defects and updated the test cases accordingly.
- Additionally, oversee maintenance activities such as hot-fix management and validation of customer fix packs.
- Conducted Knowledge transfer training and mentoring of new employees.

Education

NMU University, Jalgaon, India

May 2011

Bachelor of Engineering: Mechanical Engineering

June 2007 - May 2011

Certifications

- ISTQB Certified (CTFL).
- Azure Fundamentals
