PROFESSIONAL SUMMARY:

As a Full Stack Developer with over 5 years of experience, I specialize in designing, developing, and deploying scalable backend architectures while leveraging my proficiency in front-end technologies. I am skilled in multiple programming languages, frameworks, and databases, with a strong focus on delivering high-quality solutions. I excel at optimizing performance, ensuring robust security, and utilizing cloud technologies to build future-proof applications. My ability to collaborate effectively across teams allows me to deliver end-to-end solutions that meet user needs and organizational goals. I am committed to staying up-to-date with emerging technologies and continuously improving development practices. With experience in agile methodologies, I ensure efficient project delivery while meeting both technical and business requirements. I take pride in delivering user-friendly, efficient, and maintainable code while maintaining a strong focus on scalability and performance.

TECHNICAL SKILLS:

Programming Languages: JavaScript, TypeScript, Python, Java, C++, Ruby, PHP

Front-end Technologies: React, JSX, HTML5, CSS3, Bootstrap, jQuery, Sass, LESS, Figma

Back-end Technologies: Node.js, Express.js, Django, Flask, Spring Boot, Ruby on Rails, ASP.NET

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Oracle, Redis, Firebase

Version Control: Git, GitHub, GitLab, Bitbucket

DevOps & Cloud: AWS, Azure, Google Cloud Platform (GCP), Docker, Kubernetes, Jenkins, Terraform, CircleCI, Nginx, Certbot

Testing & Tools: Jest, ESLint, Webpack, Bash

Project Management & Tools: Jira, Trello, Slack, Confluence, Asana, Monday.com, Basecamp

WORK EXPERIENCE:

Dell Technologies

Role: Full Stack Developer

Oct 2023 – Present

- Developed and maintained dynamic web applications using React.js and Node.js, ensuring optimal performance and a seamless user experience.
- Designed and implemented RESTful APIs for efficient communication between the front-end and back-end systems, ensuring reliable data flow.
- Integrated cloud services (AWS, Azure) for scalable application deployment and management, improving infrastructure efficiency.
- Led the migration of legacy monolithic applications to microservices architecture, improving system scalability and reducing deployment time by 40%.
- Utilized GitHub and Bitbucket for version control, collaborating on team projects to enhance code quality and maintain consistent development standards.
- Automated front-end testing with Jest and React Testing Library, reducing manual testing time by 50%.
- Integrated third-party APIs such as payment gateways and external data sources, streamlining business operations and improving transaction processing times by 18%.

Deloitte

Role: Frontend Developer

Feb 2021 – Sep 2023

- Led the development of intuitive and responsive user interfaces using HTML, CSS, and JavaScript, ensuring consistency and usability across various platforms.
- Collaborated closely with backend developers to integrate APIs, enabling smooth data flow and enhancing the functionality of web applications.
- Implemented advanced frontend features using ReactJS, improving the maintainability and scalability of the application codebase.
- Ensured adherence to best practices in frontend development, including code modularity, maintainability, and accessibility standards, for better long-term project sustainability.
- Integrated RESTful APIs to ensure seamless communication between frontend and backend, improving data fetching efficiency by 35% and enhancing overall user experience.

- Built and deployed applications on cloud platforms like AWS using S3, reducing deployment times by 20% and ensuring robust, scalable hosting solutions.
- Worked with cross-functional teams to gather requirements and implement frontend features that aligned with business goals, leading to a 10% improvement in customer satisfaction ratings.

Epsilon

Role: Software Developer

Jan 2020 – Jan 2021

- Contributed to the development and maintenance of web applications using modern technologies, ensuring robust and efficient software solutions.
- Collaborated closely with cross-functional teams in an Agile environment, actively participating in daily stand-ups, sprint planning, and retrospective meetings.
- Assisted in debugging and troubleshooting code to resolve issues and enhance overall system stability and performance.
- Utilized version control tools to manage code repositories, maintain code integrity, and support smooth team collaboration.
- Authored comprehensive technical documentation and user guides to facilitate knowledge sharing and support ongoing system improvements.
- Participated in regular team code reviews, providing constructive feedback that contributed to a 10% reduction in coding errors.
- Gained practical experience with containerization by working with Docker, contributing to a 30% reduction in deployment times across development environments.
- Assisted in optimizing SQL queries for backend databases, achieving a 15% decrease in data retrieval times during high-traffic operations.

PROJECT EXPERIENCE:

JobMate App - Frontend Developer

- Developed user authentication features using React and local storage, ensuring secure registration and login functionalities.
- Implemented a personalized dashboard with React components to display user-specific job recommendations, significantly enhancing user engagement.
- Designed dynamic forms for setting and editing job preferences, enabling users to effectively customize their job search criteria.
- Created responsive layouts using CSS Modules and BEM methodology, ensuring optimal user experience across desktop, tablet, and mobile devices.

React App - Frontend Developer

- Developed an interactive, responsive UI with React, offering a seamless user experience and real-time weather-based clothing recommendations.
- Integrated a third-party weather API to fetch real-time data, dynamically updating clothing suggestions based on current weather conditions.
- Implemented user authentication and profile management via React Context API, enabling secure login, profile updates, and preference saving.
- Enhanced user engagement by adding a like/dislike feature for clothing items and storing preferences locally for personalized experiences.

Express Backend API - Backend Developer

- Engineered RESTful APIs using Express.js to facilitate efficient data retrieval and manipulation for user profiles and clothing items.
- Implemented user authentication and authorization with JWT, improving security by ensuring only authorized users can access and modify personal data.
- Designed and optimized data schemas with MongoDB, ensuring efficient data storage and retrieval processes for user information and clothing recommendations.
- Conducted thorough testing using Jest to ensure the reliability and robustness of API endpoints and middleware functions.

EDUCATION:

Software Engineering Certificate, TripleTen
