EDUCATION

State University of New York – New Paltz

MS in Computer Science – GPA: 3.80/4.00

New Paltz, NY

Jan. 2025 – May 2026

Sunbeam Institute of Technology (CDAC)

PG Diploma in Advanced Computing

Pune, India

Aug. 2021 – Apr. 2022

DY Patil's Ramrao Adik Institute of Technology

Bachelor of Engineering – Electronics & Telecommunication

Navi Mumbai, India

Aug. 2017 – May 2021

EXPERIENCE

Software Solutions Architect & Backend Engineer

Feb. 2024 – Present

Operation Unite NY & Little Ones Learning Center

New York, NY

- Engineered an end-to-end proprietary Python SSG engine and decoupled Node.js API system, modernizing the digital infrastructure for a 501(c)(3) community organization.
- Scoped, designed, and deployed a secure custom CMS, empowering non-technical administrative staff to independently manage organizational data and digital workflows without developer intervention.
- Navigated resource constraints and ambiguous requirements by iteratively building rapid prototypes, testing with community stakeholders, and providing clear, non-technical training sessions.

Teaching Assistant (Data Structures & C/C++)

Jan. 2025 – May 2026

State University of New York

New Paltz, NY

- Translated complex algorithmic concepts into accessible, digestible workshops for a diverse, mixed-technical audience of undergraduate students.
- Mentored students in end-to-end software development, debugging processes, and evaluating edge cases in their codebases.

Software Engineer – Development

Dec. 2023 – Feb. 2024

Pansuriya Imper (HK) Ltd.

HQ: Hong Kong

- Rapidly onboarded to an existing complex codebase to design and deliver RESTful APIs using Java and Spring Boot.
- Built automated retry logic and background processing systems to handle asynchronous API failures, demonstrating high autonomy in scoping and shipping robust backend solutions.

Associate Software Engineer – Development

May 2022 – Nov. 2022

SAS Research & Development Pvt. Ltd.

HQ: North Carolina, USA

- Collaborated within an Agile R&D environment to build Java/Spring Boot endpoints, supporting downstream integrations for enterprise platforms.
- Spearheaded defect resolution during critical incidents, identifying edge cases and deploying fixes inside a fast-moving organization where I wore multiple hats.

PROJECTS

Aura – Relational Intelligence Engine | *Java, Spring Boot, LLMs, Docker*

Spring 2026

- Architected and shipped an end-to-end AI platform that integrates Large Language Models to evaluate and translate complex relational psychology patterns.
- Designed robust evaluation harnesses and prompt structures to ensure the AI provides safe, clinically-grounded interventions, catching and mitigating model hallucinations.
- Deployed the secure backend infrastructure using Spring Boot, STOMP WebSockets, and custom JPA encryption, managing the full lifecycle from scoping to production deployment.

Little Ones Learning Center – Digital Modernization | *Python, Node.js, SQL, JS*

- Led the end-to-end digital transformation for a public-interest organization, scoping the project by interviewing non-technical stakeholders to identify critical workflow bottlenecks.
- Shipped a custom, highly performant Headless CMS and automated asset manager, turning manual, expensive processes into a streamlined digital workflow.
- Created extensive runbooks and conducted hands-on training, successfully handing off the software to non-technical staff to ensure long-term sustainability after project completion.

TECHNICAL SKILLS

Languages: Java 21, JavaScript (ES6+), SQL (PostgreSQL, MySQL), Python, PHP, C, C++, HTML5, CSS3

Frameworks & Libraries: Spring Boot 3, React 19, Node.js, Express.js, Spring Data JPA, Htmx, Thymeleaf, JUnit

Databases: PostgreSQL, MySQL, MongoDB, Mongoose ODM

Tools & Platforms: Docker, Render / Koyeb, Git/GitHub, GitHub Actions, STOMP WebSockets, Postman, IntelliJ IDEA, VS Code

Concepts: Generative AI, LLM Integration, REST API Architecture, JWT Security, OOP, SOLID Principles, Distributed Systems, Agile
