

Sri Kotipalli

972-249-6253 | sri@worksemail.com | United States | [LinkedIn](#)

Summary

Software Engineer with 5+ years of experience designing and delivering scalable, high-performance applications across fintech, banking, and healthcare domains. Proven expertise in building microservices and RESTful APIs using Java, Spring Boot, Node.js, Python, and modern frontend frameworks such as React and Angular. Strong background in cloud-native and serverless architectures on AWS, leveraging Docker, Kubernetes, and event-driven systems like Kafka for reliable, real-time processing. Experienced in CI/CD automation, observability, and performance optimization to ensure secure, highly available enterprise systems.

Education

Master of Science in Computer Science and Engineering

Dec 2024

University of North Texas, Denton, Texas

Bachelor of Technology, Computer Science and Engineering

Oct 2020

Aditya Educational Institute, India

Skills

Methodologies: SDLC, Agile (Scrum), Waterfall

Programming Languages: Java, Core Java, Python, JavaScript, TypeScript, SQL, Go

Backend & API Development: Spring Boot, Spring MVC, Spring Security, Hibernate / JPA, Microservices Architecture, RESTful API Design, FastAPI (Python), Node.js (Express.js, NestJS), OAuth2, JWT Authentication, Apache Kafka

Frontend Development: React.js, Angular, Vue.js, HTML5, CSS3, Bootstrap, TypeScript, State Management (Redux, Context API)

Adobe Experience Manager (AEM): AEM Sites, AEM Assets, AEM Forms, AEM Workflows, Sling, OSGi, JCR, AEM Cloud Service, Adobe Dispatcher, AEM Author & Publish Environments, AEM On-Prem to Cloud Migration, Adobe Analytics & Adobe Target Integration

Databases & Data Stores: PostgreSQL, MySQL, DynamoDB, Cassandra, SQL Server, Redis, Elasticsearch

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, Step Functions, SNS, SQS, And Redshift), Azure (App Services, Azure Monitor), GCP (Compute Engine, Cloud Storage, Cloud Functions), Docker, Kubernetes, Infrastructure as Code (IaC): CDK, CloudFormation, CI/CD Pipelines: Jenkins, GitHub Actions

Observability & Monitoring: AWS CloudWatch, Azure Monitor, Prometheus, ELK Stack, Splunk

Application & Web Servers: Apache Tomcat, NGINX

Build & Development Tools: Maven, Gradle, JUnit, IntelliJ IDEA, Eclipse, Visual Studio Code, UML, MS Visio

Version Control & Collaboration: Git, GitHub, Jira, Confluence, Trello

Operating Systems: Linux, Windows, macOS

Work Experience

Intuit, USA | Software Engineer

Jun 2024 - Present

- Led development of scalable microservices architecture for TurboTax using Core Java, Spring Boot, Hibernate, and PostgreSQL, handling real-time calculations for millions of users while improving system throughput and reducing processing latency.
- Implemented RESTful APIs with Node.js and secured integrations using OAuth2/JWT, enabling seamless connectivity between QuickBooks Online and external fintech platforms and accelerating partner onboarding.
- Built React.js dashboards for tax and finance analytics using Redux and TypeScript, delivering responsive, accessible, and high-performance user interfaces across customer-facing applications.
- Developed Python-based microservices for Credit Karma personalized insights, leveraging AWS Lambda and Step Functions for serverless automation and real-time recommendation workflows.
- Integrated Adobe Experience Manager (AEM) with backend services to support content-driven workflows, dynamic content delivery, and personalization across financial web portals.
- Led CI/CD pipelines using Jenkins and GitHub Actions, automating builds, tests, and deployments to Apache Tomcat, Docker, and Kubernetes environments.
- Integrated Apache Kafka for event-driven processing and asynchronous workflows across tax and finance modules, enhancing transaction monitoring and system reliability.
- Implemented end-to-end observability using AWS CloudWatch and Splunk, proactively monitoring performance, detecting anomalies, and resolving production issues to ensure high availability of financial applications.

Publicis Sapient, Bangalore, India | Associate Software Engineer

May 2019 - Dec 2022

- Developed Angular-based enterprise web applications for digital banking modernization, integrating backend services Core Java, Spring Boot, Node.js, and PostgreSQL, streamlining financial workflows for enterprise clients.
- Designed and implemented Python-based backend services to automate healthcare claims processing, deploying containerized applications using Docker and Kubernetes for scalable and reliable execution.
- Built backend microservices using Kotlin and Scala, supporting retail analytics platforms and real-time data processing use cases.
- Implemented OAuth2/JWT authentication across distributed services, ensuring compliance with PCI-DSS and HIPAA standards and strengthening application security.
- Optimized databases including MySQL, PostgreSQL, and Redis using indexing and caching strategies, improving query performance and reducing application response times.
- Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions, automating builds, tests, and deployments to Apache Tomcat and cloud infrastructure.
- Monitored applications using Splunk, ELK Stack, and Prometheus, enabling proactive issue detection, performance tuning, and minimal downtime.
- Executed Adobe Experience Manager (AEM) implementations and migrations for enterprise clients, working with AEM Sites, Assets, and Workflows, and integrating Adobe Analytics to improve content delivery and personalization.

Certifications

- AWS Certified Developer – Associate Certification
- ADOBE PROFESSIONAL DEVELOPER – ADOBE
- AZURE FUNDAMENTALS- AZ (900)
