

SRI SAI GANESH J

Missouri, USA | (314)-529-1231 | 18.jssg@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of hands-on experience supporting healthcare and financial analytics initiatives. Strong background in complex data extraction, transformation, and validation across large, multi-source datasets. Proven expertise in building analytical data models, implementing business and regulatory logic, and delivering insight-driven dashboards that support operational, clinical, and financial decision-making in enterprise environments.

SKILLS

Data Analysis & Statistics: Data Wrangling, Data Cleaning, Exploratory Data Analysis (EDA), Hypothesis Testing, Regression Analysis, Predictive Modeling, Time Series Analysis, Statistical Inference, A/B Testing, Machine Learning Algorithms

Programming Languages: Python (pandas, NumPy, SciPy, scikit-learn, Matplotlib, Seaborn), R (dplyr, ggplot2), SQL

Data Visualization & BI Tools: Tableau, Power BI, QlikView, Excel (Advanced, Pivot Tables, Macros, VBA)

Databases & Data Warehousing: MySQL, PostgreSQL, SQL Server, NoSQL (MongoDB), Amazon Redshift, Snowflake, BigQuery, ETL Concepts, Data Modeling, Star & Snowflake Schemas

Cloud Technologies: AWS (S3, Redshift, Athena, Glue), Google Cloud Platform (BigQuery, Data Studio)

Tools & Productivity: Jupyter Notebook, VS Code, Git/GitHub, Jira, Confluence, Agile/Scrum Methodology

Other/ Soft Skills: Data Profiling, Data Governance, Regulatory Compliance (HIPAA, GDPR), Automated Dashboards, Report Scheduling, API Data Integration, KPI Reporting, Stakeholder Management, Problem Solving, Data-driven Decision Making, Presentation & Storytelling

EXPERIENCE

HCA Healthcare

Missouri, USA

Data Analyst

Jan 2025 – Present

- Engineered advanced SQL queries (CTEs, window functions, complex joins) on claims, eligibility, provider, and pharmacy datasets to create longitudinal member profiles supporting population health analysis.
- Built Python pipelines using pandas and NumPy to clean, standardize, and reconcile multi-source healthcare data, improving analytical dataset reliability for downstream reporting and modeling.
- Developed Tableau dashboards with calculated fields, parameters, and LOD expressions to visualize utilization trends, readmission patterns, and cost-of-care metrics for clinical leadership.
- Implemented HEDIS and quality-measure logic using SQL-based rules to calculate CMS- and NCQA-aligned performance indicators.
- Leveraged data modeling techniques (fact/dimension tables) within an enterprise data warehouse to optimize query performance and enable scalable analytics.
- Conducted data quality checks using profiling, validation rules, and exception reporting to reduce inconsistencies in claims ingestion pipelines.
- Partnered with actuarial and care management teams to support risk adjustment and stratification initiatives, delivering analytical outputs for member prioritization workflows.
- Maintained HIPAA-compliant data governance, including lineage documentation, access controls, and audit-ready reporting artifacts.

Cognizant

India

Data Analyst

Jan 2021 – Jul 2023

- Extracted and analyzed high-volume financial, transactional, and operational datasets using SQL Server and relational databases, optimizing stored procedures, indexing strategies, and query logic to support scalable analytical reporting.
- Designed and implemented end-to-end ETL workflows using SSIS, integrating data from multiple upstream financial systems into a centralized reporting layer to improve data consistency, traceability, and availability.
- Automated data cleansing, transformation, and recurring financial reports using Python scripts, streamlining weekly and monthly performance reporting cycles and reducing manual processing effort.
- Developed interactive Power BI dashboards leveraging DAX measures, calculated columns, and drill-through functionality to monitor revenue trends, cost drivers, operational efficiency, and variance analysis.
- Applied Advanced Excel techniques including Power Query for data shaping, Pivot Tables for aggregation, and VBA macros for automation, enabling rapid ad-hoc analysis for finance and operations stakeholders.
- Conducted detailed root-cause analysis and data reconciliation across transactional systems and reporting outputs to identify data discrepancies, improve data quality, and strengthen reporting accuracy.
- Collaborated within an Agile/Scrum delivery model, actively participating in sprint planning, backlog refinement, and reviews while using JIRA for tracking and Git for version control of analytics artifacts.
- Translated business and finance requirements into technical data specifications, KPI definitions, and reporting logic, ensuring alignment between business users, developers, and QA teams throughout the delivery lifecycle.

EDUCATION

Master of Science in Information Technology Management

Webster University, Webster Groves, Missouri, USA

Bachelor of Technology in Mechanical Engineering

Malla Reddy College of Engineering, India
