| Examination | Majors                                  | Institute                   | Year      |
|-------------|-----------------------------------------|-----------------------------|-----------|
| Graduation  | A.S. Actuarial Science                  | Eastern Kentucky University | 2021-2022 |
| Graduation  | B.A. General Mathematics                | Eastern Kentucky University | 2018-2022 |
| Graduation  | B.S. Statistics                         | Eastern Kentucky University | 2018-2022 |
| Graduation  | M.A. Applied Mathematics (Data Science) | Eastern Kentucky University | 2022-2023 |

## SUMMARY

A Mathematician, Statistician, and Data Scientist who can quickly adapt to any situation and solve complicated problems. Quantitative development and problem-solving is in his blood and always looks forward to working on exciting new projects.

## TECHNICAL SKILLS

|                    |                                                                           |
|--------------------|---------------------------------------------------------------------------|
| <b>Programming</b> | R, Python, Java, SAS, Linux                                               |
| <b>Design</b>      | LaTeX, shinyapp                                                           |
| <b>Tools</b>       | Jupyter, RStudio, DataSpell, Hadoop, Microsoft Office                     |
| <b>Other</b>       | Highly Analytical, Strong Communication, Writing, and Presentation Skills |

## MASTER'S THESIS

### Optimization of Machine Learning Models for Predicting Deposit Terms Subscriptions for Bank Marketing Strategies

- Utilized Machine Learning to predict whether or not a banking client will subscribe to a bank term deposit given attributes of that client using many models. Developed using R.
- Seven different machine learning models were fit against the data to accomplish highest predictability of the target variable. Best model results were the KNN model with accuracy score of 96%.

## OTHER PROJECTS

### EKU Diversity Survey - 2019

- Designed and deployed university opinion survey to gauge effectiveness of EKU's diversity programs to identify needed improvement.
- Project as part of an undergraduate survey sampling course.

## WORK HISTORY

### Math and Statistics Department: Work Study/GA

Aug 2018 - December 2023

*Eastern Kentucky University*

- Math/Stat Tutor:** Helped students with their math and statistics work to reinforce course knowledge.
- Lab Assistant:** Instructed students with given assignments in lab and assisted professor of lab by helping with grading and general paper work.

### Statistical Consultant (Graduate Assistantship)

Aug 2023 - December 2023

*Eastern Kentucky University*

- Consulted clients regarding the statistical procedures conducted and data collected in their projects.
- Provided professional insight regarding the appropriate use of statistical procedures and project data.

### AI Trainer: Mathematics

May 2024 - Present

*Outlier.ai*

- Create prompts and rewrite LLM model responses.
- Rate and provide professional feedback to tasks of other rewrites.

### Virtual Math/Stat Tutor

September 2024 - Present

*StudyPoint*

- Instruct and help students with their math and statistics classes by reinforcing study habits and techniques to increase course grade.
