Work Permit : Green Card

subajothi@gmail.com | +1 4087077212

PROFESSIONAL SUMMARY

- More than 15 Years of experience in Software Design, Development, **PHP**, **MYSQL**, JavaScript and Web technologies.
- Proficient in **integrating various payment gateways** such as PayPal and Stripe, ensuring secure and efficient transaction processing.
- More than 3 Years of experience in **Single page development using React, Next.js, React-Hooks, Typescript, Redux**, Expressjs, MongoDB, Postgres.
- Role-based access control (**RBAC**) with **JWT**, Protected Routes in React and Rest API routes.
- Experience in developing user interfaces using React using **Redux Toolkit** architecture.
- Proficient in developing and maintaining **RESTful APIs using PHP, Express.js with MySql, Postgres and MongoDB**.
- Developed a schema by using **TypeORM, Prisma** ORM for SQL databases and **Mongoose** for NoSQL databases.
- Proficient in developing Single Page Applications (**SPA**) using MVC framework and technologies like React JS, PHP.
- Expertise in software methodologies like **Agile Unified Process, Scrum** and **Waterfall**.Involved in Agile process, two-week Sprints, and daily Scrums to discuss the development of the application.
- Deployed **Dockerized applications** on **EC2** instances, using **ECS** or directly on **EC2**, ensuring smooth operation and easy scaling for containerized services.
- Developed a file upload service with integration between **S3** and **AWS Lambda**, allowing for automated image processing and metadata extraction upon upload.
- Integrated **Lambda** with other AWS services (e.g.**IAM,API Gateway, S3, SNS, SES**) for automated and scalable solutions.

TECHNICAL SKILLS

Languages	:	PHP, MYSQL, JavaScript,Typescript.
Frameworks / Libraries	:	Bootstrap, React JS, Node JS, Express JS, jQuery
SCM	:	GIT, Bit Bucket, Subversion SVN, Visual Studio.
ORM	:	TypeORM, Prisma, Mongoose
Tools	:	Visual Studio, Swagger, Postman, Jira.
Platform(OS)	:	Linux – (Red Hat, Ubuntu), Windows and Mac OS.
Web Technologies	:	HTML, HTML 5, XHTML, XML, JavaScript, AJAX, jQuery, JSON, CSS.
Web/Application Servers	:	Apache HTTP Web Server with lamp, Express.js.
Cloud Technologies	:	AWS (IAM, EC2, S3, Lambda, SNS, SES)
Containerization	:	Dockerfile creation, Docker image building, Docker registries

PROFESSIONAL EXPERIENCE

3bit studio limited

July 2021 – Present

MERN Stack Developer (Nodejs, Expressjs, React, MongoDB)

Responsibilities:

- Working as a Full-Stack internal software developer and developed many web applications for generating reports, Drill down reports, Admin Tools, Sales Backlog, Proposal tool and sales booking tool using REACT-Redux, ExpressJs, Node.js, HTML, Bootstrap and MongoDB as backend.
- Handled multiple projects in Agile methodology in multiple sprints and also handled projects in a waterfall model.

- Implemented Drill-down reports for various departments which consists of Aggregate and detailed layers using React as front end and ExpressJs as backend.Developed dashboards for Sales departments (Sales, CRR) using React-Redux.
- Experience in building reusable frameworks for consuming and providing REST API using Swagger.
- Revised procedures on optimization and performance improvement for new and current systems and showed fascinating results.
- Optimized slow queries and showed a huge performance difference in many existing data reports by decreasing the loading time.
- Designed and implemented MongoDB database, ensuring efficient data storage and retrieval.Utilized mongoose for schema modeling and data validation, enhancing data integrity and consistency.

Environment: HTML, JavaScript, React, Redux Toolkit, NodeJs, ExpressJs, MVC, Swagger API, MongoDB, Bootstrap, REST API, Agile.

3bit studio limited
Senior LAMP Stack Developer

May 2009 – July 2021

Responsibilities:

- Developed and maintained web apps using HTML, CSS, JavaScript and jQuery, PHP, MySQL, Linux.
- Configured and Optimizes Apache web servers for high performance and security.
- Designed and managed MySQL databases, including query optimization and schema design.
- Implemented RESTful APIs for seamless integration with third-party services.
- Collaborated with front-end developers to integrate user-facing elements with server-side logic.
- Ensured application security and data protection through regular updates and patches.

E-commerce Platform Development

- Developed a scalable e-commerce application with Yii2, Codeigniter,Drupal.
- Optimized database queries to improve performance and reduce load times.
- Implemented features such as user authentication, prod management, discount codes,order tracking and payment processing.Integrated payment gateways including PayPal and Stripe for secure online transactions.
- Implemented subscription models and recurring billing features.

Content Management System (CMS)

- Built a custom CMS using the LAMP stack to enable easy content creation and management.
- Implemented a custom CMS within Yii2 for managing course content, reducing content update time by 50%.
- Integrated third-party APIs for extended functionality and user engagement.
- Ensured data security and application reliability through regular backups and monitoring.

Environment: Linux, PHP, MySQL, Javascript, CSS, JQuery, MVC, AJAX, Bootstrap,Yii2,Codeigniter,Wordpress,Drupal.

Software Developers Inc (SDI)
LAMP Stack Developer

Aug 2006 – May 2009

Responsibilities:

- Lead a team of 5 developers in the design and implementation of dynamic web applications using the LAMP stack.
- Maintain highly scalable and efficient database structures using MySQL.
- Developed a full-featured e-commerce platform with user authentication, product catalog, shopping cart, and payment integration.
- Built a custom CMS from scratch for a publishing company, allowing non-technical staff to manage website content easily.
- Integrated third-party APIs for payment processing, social media authentication, and geolocation services in various web applications.Integrated Google Maps API to provide location-based services, including geocoding and displaying interactive maps on web applications.
- Developed a multi-user blog platform with features such as user profiles, commenting, and content moderation.
- Designed and implemented a custom authentication system, improving security and user experience.

Environment: Linux, PHP, MySQL, Javascript, CSS, JQuery, MVC, AJAX,Codeigniter,Wordpress.
