SUMMARY

- 5+ years of industry experience with solid understanding of Data Modeling, Evaluating Data Sources, and strong understanding of Data Warehouse/Data Mart Design, ETL, BI, Data visualization, OLAP, Client/Server applications.
- Accomplished various tasks in big data environment which involved Microsoft Azure Data Factory, Data Lake, and SQL server. Experience in analyzing business user requirements, analyzed data and designed software solutions in Tableau Desktop based on the requirements.
- Experience in converting Legacy Reports to Tableau dashboards connecting to SQL server.
- Built and published interactive reports and dashboards using Tableau Desktop and Tableau Server.
- Expertise in Microsoft Integration Services like SSIS (Control Flow tasks, Data Flow tasks, Transformations, Database administration tasks).
- Excellent in Data Analysis, Data Profiling, Data Validation, Data Cleansing, Data Verification, and Data Mismatch Identification. Experienced in migrating Data from Excel, Flat file, Oracle to MS SQL Server using SQL Server Integration Services (SSIS) and expert in Creating, Configuring and Fine-tuning ETL workflows in SSIS.
- Hands on design and implementation of AI, machine learning algorithms using Python and R.
- Experience in different Project Management Methodologies like Traditional waterfall and Agile.
- Very good experience and knowledge on Amazon Web Services: AWS Redshift, and AWS.
- Experience in designing Star Schema, Snowflake schema for Data Warehouse, by using tools like Erwin data modeler, Power Designer and Embarcadero E - R Studio.
- Experience in writing complex SQL/PL SQL/MYSQL queries to perform data analysis and to build reports
- Experience in developing Alteryx workflows to automate the manual process of data validations across multiple systems.
- Experience in creating Power BI Dashboards (Power View, Power Query, Power Pivot, Power Maps).
- Proficient in analyzing the metrics using Tableau, Adobe Analytics and Qlik Sense to identify the bottle necks and derive business justifications
- Experience in Developing dashboards and reports data adhere to the visualization best practices and communicate a story
- Excellent understanding of Data services, ETL, Teradata, Big Data, Oracle, MySQL and MS Access

TECHNICAL SKILLS

RDBMS/Databases	MS SQL Server, Oracle, TOAD, MS Access, SQL Server Management Studio, SQL Server Data Tools, Business Intelligence Development Studio (BIDS), Visual Studio, SQL Profiler, Performance Monitor, DTS, Database.
Operating Systems	MS-DOS, Windows Server, UNIX, Linux.
BI Tools	Power BI Desktop, Einstein Analytics, SAP Business Objects, Tableau Desktop, Tableau server , Workday, Reader, Online, Crystal reports, MS Excel, SSRS and Excel Power View
SQL Server Tools	SQL Server Management Studio, BIDS, SQL Server Profiler, FTP, TOAD.
Programming languages	Python, R, SQL, Linux, UNIX shell scripting, Java, JSP, HTML, JavaScript, JIRA, T-SQL, PL/SQL, C/C++, XML, HTML, CSS, Visual Basic6, VBScript, Java script, C#, PHP, .NET, VB.NET, ASP.NET.
Methodologies	Software Development Life Cycle, Agile, Waterfall, Data Modeling Logical/Physical/ Dimensional, MS Project, SQL Profiler, Toad and TFS.
Technologies & Primary Tools	Artificial Intelligence, Machine Learning, ML, PMML, AI, Big Data, Hadoop, Spark, Cloudera, Storm, Kafka, Hive, Impala, Flume, Sqoop, C, C++, Python, Graph Lab, AWS, R, Spark, scikit- learn
Cloud Services	Microsoft Azure, Confidential Web Services (AWS) and Oracle Enterprise Manager Cloud.

EDUCATION

Lamar University, Texas, USA

- Master's Degree in Computer Science

August 2022 – May 2024.

CERTIFICATIONS

- Power BI Data Analyst Associate – Microsoft
- Certified Data Analyst Associate – Microsoft
- Certified System Administrator – ServiceNow
- Certified Application Developer – ServiceNow
- Certified Cloud Practitioner – Amazon

WORK EXPERIENCE

Senior Data Analyst

Christus Health - Irving, Texas, USA

July 2024 – Present

Responsibilities:

- Performed complex data analysis in support of ad-hoc and standing customer requests
- Designed and developed automation test scripts using Python.
- Worked with Systems Development Life Cycle (SDLC)/ Software as a Service (SaaS) delivery model.
- Designed and implemented secure data pipelines into a Snowflake data warehouse from on-premises and cloud data sources. Implemented Data Lake in Azure Blob Storage, Azure Data Lake, Azure Analytics, Data bricks Data load to Azure SQL Data warehouse using Polybase, Azure Data Factory
- Designed and implemented effective Analytics solutions and models with Snowflake.
- Queried and analyzed data from Cassandra for quick searching, sorting and grouping
- Involved in Data profiling, Data analysis, data mapping and Data architecture artifacts design.
- Extensively created data pipelines in cloud using Azure Data Factory.
- Develop calculated fields, combine fields, geo-coding, and scorecards to include them in custom Tableau Dashboards
- Develop REST APIs to provide consumers with necessary data to develop dashboards and reports
- Made Power BI reports more interact and activate by using storytelling features such as bookmarks, selection panes, drill through filters also created custom visualizations using "R-Programming Language".
- Used Machine learning using "Python-Programming Language" for converting different language text to English for analysis. Implemented Tableau for visualizations and views including scatter plots, box plots, heatmaps, tree maps, donut charts, highlight tables, word clouds, reference lines, etc.
- Generated complex reports in Tableau using multiple functionalities including context filters, hierarchies, parameters, LOD Expressions, time intelligence, etc.
- Utilized Power BI to create various analytical dashboards that helps business users to get quick insight of the data
- Published and maintained workspaces in Power BI Service, allotted the time refresh for the data, maintained the apps and workbooks. Used R for prototype on a sample data exploration to identify the best algorithmic approach and then wrote scala scripts using spark machine learning module.
- Conducted Backlog grooming sessions with business stakeholders and team to refine and align the User stories according to business priority for future sprints
- Monitor batch processes using Splunk Dashboard to ensure scheduled jobs are running successfully
- Used DAX functions to create measure and calculated fields to analyze data for logical visualization and used Power Queries to transform the data. Converted the Boulder Tables from Excel to Power BI with better Graphs and visualizations for the understanding and improvement of business.
- Collected the Plants Data in Excel sheets from different Regions around the World and combined them in Power BI to know the Loss and Profit of the Product. Performed ETL on multiple platforms such as SAP HANA and Teradata, familiarized with Confidential Legacy, SAP and other backend environments to pull the data-to-data Warehouse

Senior Data Analyst

Globe Life - McKinney, Texas, USA

Dec 2022 - Feb 2024

Responsibilities:

- Deployed and monitored scalable infrastructure on cloud environment Amazon web services (AWS). Managed development team by receiving the weekly updates. Used Agile Method for daily scrum to discuss the project related information. Effectively designed, developed and enhanced cloud-based applications using AWS
- Developed an issue log for the projects and worked with management to resolve them.
- Co-ordinated with testing team and ETL development team for the successful dry run in all the projects.
- Collaborated with and reported to Platform Manager who directly reported to CIO.
- Identified the entities and relationship between the entities to develop Conceptual Model using Erwin.
- Performed match/merge and ran match rules to check the effectiveness of MDM process on data.
- Data sources are extracted, transformed and loaded to generate CSV data files with Python programming and SQL queries. Develop Key Performance Indicators (KPI's) to report the metrics using Qlik Sense on monthly basis and utilized Microsoft Excel Pivot Tables, v-lookup functions and Macros for analysis
- Develop and Execute MySQL queries to generate KPI reports on monthly basis
- Perform data analysis on daily trades and positions data from Investment Data Warehouse (IDW) and Charles River Database (CRD) using Db Visualizer Pro and Excel functions Built codebase for a natural language processing and (AI) artificial intelligence, (ML) machine learning framework. Tested raw data and executed performance scripts.
- Developed Map Reduce programs to parse the raw data, populate staging tables and store the refined data in partitioned tables in the EDW. Designed and developed logical & physical data models and Meta Data to support the requirements.
- Involved in extensive DATA validation using SQL queries and back-end testing
- Used AWS Glue to crawl the data lake in S3 to populate the Data Catalog.
- Wrote SQL queries, PL/SQL procedures/packages, triggers and cursors to extract and process data from various source tables of database. Built interacting and storytelling dashboards in Tableau workbooks using dashboard actions
- Published Tableau workbook on Tableau Server and set report refresh. Used Data Analysis Expressions (DAX) to create measures and calculated fields to analyze data and to create time intelligence.
- Extensive use of DAX (Data Analysis Expressions) functions for the Reports and for the Tabular Models.
- Used Data Analysis Expressions DAX to create custom calculations in PowerPivot for Microsoft Excel workbooks and Analysis Services tabular model projects. Shared responsibility for administration of Hadoop, Hive and Pig.
- Created PowerPivot models and PowerPivot reports, publish reports onto SharePoint, and deploy models into SQL Server SSAS instance. Created SSIS Packages for Incremental Loading and slowly changing dimensions.

Programmer Analyst
Cognizant (Novartis) - Hyderabad, India

Mar 2021 - Jul 2022

Responsibilities:

- Worked in agile process having expertise in life cycle of a project from start to end.
- Created data warehouse and data marts from scratch based on data structures and reporting needs.
- Worked on writing ad hoc SQL scripts which are required for reporting purposes. Worked on creating basic dashboards in tableau connected to Azure SQL database for client reporting. Worked on user management for power bi. Sharing the dashboard access for power bi online. Extensive back-end support for many various reports on Tableau and Power BI.
- Created store procedures, functions, triggers, indexes, views based on data processing and data cleansing.
- Created various SSIS packages for data movements and transformations. Worked on Python code to load data from Google buckets to big query tables, used data flow for ELT (Extract Load Transform) in Big Query.
- Worked on creating POC for data movement in NiFi (Hortonworks), C# programming used in script task for SSIS and in Azure functions to create retrievers for data pull from API. Experienced in doing the restful calls using Scala and load the data into spark Data Frames. Worked on Power BI dash boards and ad hoc DAX queries for power bi.
- Developed Hive/MapReduce/Spark Python modules for ML & predictive analytics in Hadoop/Hive/Hue on AWS. PIG scripts. are written for ETL jobs, to acquire data from multiple sources and convert them into uniform format.
- Hands on experience in working with Applications Migration and App Development in AZURE.
- Worked on Web jobs, AZURE data factory, Logic Apps for application and project development in Azure.
- Worked on Web Applications in Azure and Azure functions to pull data from API to blob Storage and SQL.
- Worked on deploying web sites in Azure and used MVC framework on backend. Experienced in Developing PL/SQL- Procedures, Functions, SQL Scripts and Database Triggers to populate the data applying business logic.
- Extensive knowledge in developing PL/SQL codes using Oracle 11g. Create and review SSAS tabular cubes for consuming as a data source for reports, Dashboards, Pivot table. Worked on creating multiple databases from scratch.

Data Analyst Intern
Parle Agro - Mumbai, India

Mar 2019 - Feb 2021

Responsibilities:

- Work with the Project Management in the creation of project estimates.
- Analysis of the data identifying source of data and data mappings of HCFG.
- Worked extensively in documenting the Source to Target Mapping documents with data transformation logic.
- Interact with the SME's to analyze the data extracts from Legacy Systems Mainframes and COBOL Files and determine the element source, format and its integrity within the system. Transformation of requirements into data structures which can be used to efficiently store, manipulate and retrieve information
- Collaborate with data modelers, ETL developers in the creating the Data Functional Design documents.
- Ensure that models conform to established best practices including normalization rules and accommodate change in a cost- effective and timely manner. Provide 24 x 7 problem management support to the development team.
- Enforce standards to ensure that the data elements and attributes are properly named.
- Work with the business and the ETL developers in the analysis and resolution of data related problem tickets.
- Support development teams creating applications against supported databases.
- Document various Data Quality mapping document, audit and security compliance adherence.
- Perform small enhancements SOR element additions, data cleansing/data quality.
- Create various Data Mapping Repository documents as part of Metadata services EMR.
- Provide inputs to development team in performing extraction, transformation and load for data marts and data warehouses.
- Provide support in developing and maintaining ETL processes that extract data from multiple SOR's residing on various technology platforms then transport the data to various delivery points such as data marts or data warehouses.
- Collaborate with data modelers, ETL developers in the creating the Data Functional Design documents.
