

Sujana Maraju Babitha

Front End Developer

babitha.s@myjobscv.com | 513-914-6988 | AL

SUMMARY

- Front End Developer with over Around 5 years of experience in development, enhancement, and technical support.
- Experience in all phases of SDLC like Requirement Analysis, Implementation, and Maintenance, and good experience with Agile and Waterfall.
- Expert in utilizing React.js, Angular, and Node.js to develop dynamic and responsive web applications.
- Experienced in implementing client-side registration forms, login forms, and logout forms validation using JavaScript, jQuery, Node.js, and React.js.
- Experience working with HTML, CSS, JavaScript, jQuery, JSON, Ajax, Bootstrap, and React-Redux to create interactive and user-friendly interfaces.
- Familiar with MongoDB and MySQL databases for efficient data storage and retrieval.
- Working knowledge with Version Control tools like GIT and SVN for Source Code version management.

SKILLS

Methodology: SDLC, Agile, Waterfall

Frameworks/Libraries: React.js, jQuery, Angular, React-Redux

IDE's: Visual Studio Code, Sublime Text Editor

Web Technologies: HTML, CSS, Node.js, JavaScript, JSON, Ajax, Bootstrap, DOM Manipulation

Databases: MongoDB, MySQL

Version Control Tools: Git, SVN

Other Tools: UML, MS Visio, MS Office

Operating Systems: Windows, Linux

EDUCATION

Master in Computer and Information Science

Texas Tech University, Lubbock, TX

Bachelor in Information Technology

BVRIT, Vishnupur, Narsapur, Medak, Telangana, India

EXPERIENCE

Allstate, TX | Nov 2022 - Current | Front End Developer

- Working in an Agile environment, with the ability to accommodate and test the newly proposed changes at any point of time during the release.
- Implementing responsive and user-friendly front-end interfaces using React.js, resulting in a 25% improvement in user satisfaction and a reduced bounce rate of 20%.
- Facilitate event handling between the browser and the browser-rendering engine using Node.js.
- Utilize Bootstrap framework to create responsive and mobile-friendly web applications, leading to a 20% increase in mobile users' engagement and improving accessibility.
- Developing interactive and dynamic web pages using HTML, CSS, and JavaScript, resulting in a 40% increase in user engagement and longer average session duration.
- Design and development of various front-end reusable components using ReactJS with Redux as a state management library
- Use MongoDB databases to store and retrieve data efficiently, resulting in a 25% reduction in data access time and improving data integrity.

Kalp Technolab, India | Jan 2019 - June 2021 | Front End Developer

- Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Utilized Node.js to build server-side logic and RESTful APIs, leading to a 30% improvement in application performance and faster data retrieval.
- Created new web pages for current and new programs using Sublime Text Editor and JavaScript.
- Implemented React-Routing to enhance website interactivity and reduce page load times, resulting in a 15% decrease in bounce rate and improved overall site performance.
- Executed DOM manipulation techniques to enhance website interactivity and user experience, resulting in a 25% decrease in user errors and improved usability.
- Created SQL queries to perform insert, update or delete operations on MySQL database.
- Conducted code reviews and implemented best practices for front-end development, resulting in a 20% reduction in code defects and improved code quality.

Macro Software Solutions, India | Aug 2017 - Dec 2018 | Front End Developer

- Collaborated with cross-functional teams to deliver web applications following the SDLC methodology, resulting in a 15% increase in project delivery efficiency.
- Implemented various screens for the front end using Angular and using various predefined components from NPM (Node Package Manager) and RxJS library.
- Used git for version control and used Visual Studio Code as the IDE for developing the application.
- Created notification service for Forge Data Inspector using Angular.
- Designed and developed Single Page Applications using Angular and Angular-Router from scratch.
- Created efficient design and development of User Interaction screens using HTML, CSS, TypeScript, Angular, and JSON.
- Conducted unit testing and end-to-end testing on components and service using Jasmine, Protractor, and Karma.
