Maryland, USA | +1 (667)-345-3775 | sumanpogul1@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience in **data automation**, analysis, and reporting to support strategic business goals. Proficient in **SQL**, **Python**, and cloud technologies for building scalable pipelines and enhancing model performance. Skilled in **Power BI**, feature engineering, and dashboard development to deliver actionable insights that drive operational efficiency. Optimized healthcare reporting and **predictive modeling** workflows, improving accuracy by 30% and reducing reporting time by 40%. Experienced in managing **ETL pipelines**, maintaining data quality, and supporting data-driven decision-making across cross-functional teams.

TECHNICAL SKILLS

Programming Languages & Development: SQL, PL/SQL, Python, R, Java, JavaScript, Visual Studio Code, PyCharm, Jupyter Notebook

Packages & Libraries: NumPy, Pandas, Matplotlib, TensorFlow, PyTorch, Seaborn, SciPy, Scikit-learn, Keras, ggplot2

Business Intelligence & Visualization: Power BI, Tableau, MS Excel, VBA, Pivot, VLOOKUP Alteryx, Data Visualization

Cloud Technologies: AWS (EC2, S3, RDS), Azure, Databricks, Snowflake, GCP

Databases & Data Management: MySQL, SQL Server, PostgreSQL, SQLite, Oracle, MongoDB, DBMS, RDBMS, Data Warehousing

ETL & Big Data Tools: Hadoop, MapReduce, Hive, Apache Spark, Pig, SSIS, Talend, Apache NiFi, Apache Kafka, SAP, SAS, SSRS, Data Pipeline Development

Data Analysis & Statistical Methods: Algorithms, Probability Distributions, Confidence Intervals, Hypothesis Testing, Regression Analysis, A/B Testing, Data Mining, Data Transformation, Forecasting & Modeling, Data Cleaning, Data Wrangling, Data Governance

Software Development & Project Methodologies: SDLC, Agile (Scrum), Waterfall, Jira, Git, Confluence, SharePoint

Operating Systems: Windows, Linux, Mac

PROFESSIONAL EXPERIENCE

Data Analyst | HCA Healthcare

Jan 2024 - Present | USA

- Automated the classification process for over **50,000 records** by building and deploying end-to-end **Python pipelines** integrated with **Cloud Search**, which significantly improved both data labeling speed and model training accuracy by 30%.
- Reduced manual reporting workload by 40% by optimizing **SQL workflows** and creating over 10 efficient **stored procedures** and user-defined functions, improving the performance and maintainability of daily data pipelines across multiple teams.
- Designed and maintained **interactive dashboards** using **Power BI** and Excel to visualize key performance indicators for departments, which enabled senior leadership to monitor performance trends and contributed to a 7% increase in quarterly revenue.
- Improved the overall accuracy and efficiency of predictive models by 18% by applying structured **feature engineering** techniques using **Scikit-learn**, including normalization, feature intersection, and label encoding during data preprocessing.
- Converted complex **machine learning** model outputs into clearly structured insights and presented findings to **stakeholders**, enabling informed, data-driven decisions that supported operational improvements.
- Created detailed and user-friendly reports in **SSRS** using features like grouping, sub-reports, and data regions to enhance report structure, usability, and data consistency for both analysts and non-technical users.

Data Analyst | TATA Consultancy Services (TCSL)

Mar 2021 - Jul 2022 | India

- Built and maintained scalable **ETL pipelines** across 5+ business domains to extract, transform, and load structured and unstructured data into a centralized **data warehouse**, reducing data inconsistencies by **30%** and improving the accuracy of downstream reporting.
- Pre-processed and cleaned large volumes of unstructured welding data using **Python**, applying techniques such as null value handling, outlier detection, and formatting, which led to a 10% improvement in data quality used for machine learning models.
- Executed scheduled maintenance and configured automated **backup strategies** for SQL Server databases supporting multiple production systems, ensuring over **95%** data availability and readiness for disaster recovery.
- Conducted advanced SQL analysis on **high-volume datasets** by joining complex tables, filtering, and aggregating data to generate reports and dashboards for operational and strategic use cases.
- Collaborated with QA and development teams to document over **15 data flows** and testing scenarios, ensuring analytics requirements were aligned with project objectives and reducing post-deployment defects by 20%.

Data Analyst | Streebo Inc

Jan 2019 - Feb 2021 | India

- Streamlined dashboard reporting by executing complex **SQL queries** on relational databases, which improved data modeling and performance tracking workflows, resulting in a **25% increase** in reporting efficiency for business teams.
- Configured and managed **AWS EC2 instances** supporting multiple deployment stages across 6+ projects, which improved infrastructure scalability and reduced deployment-related downtime by 30% during peak processing periods.
- Applied advanced **data wrangling techniques**, including merging, reshaping, and aggregating datasets, to build unified datasets that enabled a **20% improvement** in decision-making accuracy across business functions.
- Leveraged python for data manipulation, loading and extraction as well as with python libraries such as **NumPy**, **Seaborn** and **Pandas** to develop variety of models and algorithms for analytic purposes.
- Implemented **Google Sheets**, **Python**, and **Apps Script** to enhance reporting workflows, reducing manual effort by **approx. 15 hours per week** and enabling real-time collaboration across teams.

EDUCATION

Master's of Science in Information Systems, University of Maryland Baltimore County, MD, USA

Aug 2022 - May2024

Bachelor's in Electronics and Communication Engineering, MVSR Engineering College, India

Aug 2016 - Oct 2020
