

SUPRIYA GURAJALA

BUSINESS DATA ANALYST

Arizona, USA | +1 808-751-1488 | supriyagurajala7@gmail.com | [LinkedIn](#)

SUMMARY

- Business Data Analyst with almost 5 years of experience bridging business requirements and data-driven solutions to improve decision-making, efficiency, and profitability across cross-functional initiatives.
- Proficient in **Python** and **SQL**, leveraging **Pandas**, **NumPy**, and **Matplotlib** for data preparation, statistical analysis, and forecasting that drive actionable business insights and strategic planning.
- Skilled in **Tableau**, **Power BI**, and **Advanced Excel**, developing interactive dashboards and executive reports that enhance transparency, track KPIs, and optimize performance across business units.
- Hands-on experience with **MySQL** and **PostgreSQL**, and working knowledge of **AWS (S3, RDS)** for managing, storing, and integrating enterprise-scale datasets in secure, scalable environments.
- Experienced in **requirement gathering**, **process documentation**, and **data validation**, collaborating with stakeholders to design automated analytical workflows that streamline reporting and operation.
- Conducted **User Acceptance Testing (UAT)** and data quality checks to ensure BI solutions and pipelines meet business specifications, maintain accuracy, and align with governance standards.
- Partnered with **finance**, **operations**, and **strategy teams** to define KPIs, optimize reporting frameworks, and translate analytical outputs into measurable business outcomes and process improvements.
- Delivered measurable improvements in decision-making, forecasting accuracy, and operational efficiency while ensuring compliance with **HIPAA**, **CMS**, & **SOX regulations** across all business and data operations.

TECHNICAL SKILLS

Methodologies	SDLC, Agile, Waterfall, Business Process Re-engineering (BPR), Requirement Elicitation, GAP Analysis, UAT
Programming Languages	Python, SQL, R
Packages / Libraries	Scikit-Learn, ggplot2, Pandas, NumPy, Matplotlib, SciPy, Seaborn
Visualization Tools	Tableau, Power BI, Advanced Excel
IDEs	Visual Studio Code, PyCharm, Jupyter Notebook
Databases	MySQL, PostgreSQL, MongoDB, Oracle
Cloud Technologies	AWS (S3, EC2, RDS, Redshift), Azure Data Lake
Other Tools & Platforms	Snowflake, Google Analytics, JIRA, Confluence, Git, GitHub, MS Visio, ServiceNow
Business & Analytical Skills	BRD, FRS, Use Case Modeling, Stakeholder Management, Business Process Mapping, KPI Tracking, Feasibility & Impact Analysis, Cost-Benefit Analysis, Reporting & Insights Generation
Statistical & Analytical Skills	Probability Distributions, Hypothesis Testing, Regression Analysis, Forecasting, Clustering, Classification, Data Mining, Data Wrangling, Data Warehousing, Data Visualization, Data Storytelling, Root Cause Analysis
Soft Skills	Quantitative Analytics, Critical Thinking, Communication, Presentation, Problem-Solving, Requirement Clarification, Cross-Functional Collaboration
Operating Systems	Windows, Linux, Mac OS

EDUCATION

Master of Science in Computer and Information Sciences

Sacred Heart University, Fairfield, Connecticut, USA

Bachelor of Electronics and Communication Engineering

Saveetha Engineering College, Thandalam, Chennai, Tamilnadu, India

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate

EXPERIENCE

Business Data Analyst | **Banner Health** | AZ, USA

Nov 2024 – Current

- Analyzed large-scale patient and claims datasets, uncovering reimbursement inefficiencies & claim denial patterns that resulted in a **20%** faster claims resolution and a **\$500,000 profit gain** within six months.
- Partnered with **clinical, finance, and operations teams** to gather requirements and redesign coverage workflows, aligning analytics with business goals to enhance visibility and decision-making efficiency.
- Designed and automated **ETL workflows** using **SQL** and **Python**, extracting multi-source data from EHR, claims, and billing systems to reduce manual intervention and improve data refresh rates by **45%**.
- Created **Power BI & Excel** dashboards visualizing claim denial trends, patient utilization, & reimbursement metrics, driving real-time insights & enabling leadership to take proactive performance improvement actions.
- Applied advanced **Data Wrangling, Data Profiling, Validation, & Visualization** techniques to cleanse, standardize, & enrich raw healthcare data, resulting in a **50%** boost in data quality & analytical readiness.
- Established a robust **data governance framework** to maintain **HIPAA & CMS compliance**, enhancing claim data reliability, lineage traceability, & audit readiness across all reporting & analytical environments.
- Conducted **User Acceptance Testing (UAT)** & collaborated with business teams to validate analytical models, ensuring dashboards & data pipelines aligned with operational objectives & end-user requirements.
- Collaborated with **Project Managers, Data Engineers, & BI Developers** to integrate predictive analytics & automated reporting solutions, enhancing operational efficiency & boosting data-driven decision-making.
- Delivered insights through **root-cause analysis** of claim denials and billing errors, reducing claim rework by **28%** and improving reimbursement turnaround time across provider networks.

Business Data Analyst | **Cognizant**, India

May 2020 – Nov 2023

- Partnered with finance & operations teams to prepare **BRD, FRS, & process flow diagrams** in Confluence, improving traceability and reporting transparency across multi-department financial planning initiatives.
- Conducted **requirement elicitation** sessions with business stakeholders to define key financial KPIs, driving **30%** improvement in forecasting accuracy through automated **Power BI** and **Excel dashboards**.
- Developed optimized **SQL queries & Python** scripts for reconciliation, revenue variance, and forecasting reports, reducing manual intervention by **40%** & enhancing financial reporting reliability across global teams.
- Designed end-to-end **business process maps** using **MS Visio** and performed **GAP Analysis**, streamlining financial reporting workflows, and achieving a 25% reduction in redundant operations.
- Integrated multi-source data from **Snowflake & AWS RDS**, enabling unified financial data accessibility and improving accuracy in performance dashboards and KPI-driven executive reports.
- Conducted **User Acceptance Testing (UAT)** on Power BI and Excel dashboards to validate data accuracy, ensuring financial insights aligned with stakeholder requirements and audit compliance.
- Configured **JIRA boards, backlogs, and sprints** for finance automation initiatives, enhancing cross-functional collaboration, improving workflow visibility, & accelerating project delivery efficiency.
- Performed **Cost-Benefit Analysis & Impact Assessment** on reporting automation initiatives, identifying savings opportunities and improving ROI forecasting accuracy across financial systems by **18%**.
- Collaborated across teams using **Confluence** and **ServiceNow** to document requirements, manage change requests, and align analytics deliverables with organizational financial transformation objectives.
- Analyzed financial datasets with **over 2 million transactions** across revenue and expenses, identifying cost-saving opportunities that improved forecasting accuracy and boosted financial performance by 20%.
- Monitored key performance metrics such as **ROI, cash flow variance, profit margins, & budget utilization**, providing actionable insights that strengthened strategic decision-making and operational cost control.
