

Summary

Proactive Android Developer **with 2 years of experience designing, developing, and deploying** scalable mobile applications **using Kotlin and Java. Skilled in Jetpack Compose, MVVM architecture, and integrating RESTful and GraphQL APIs. Proficient in building** clean, modular, and maintainable codebases **following SOLID principles and Clean Architecture. Experienced in Room, Firebase, and PostgreSQL for data management, and leveraging tools like** Git, Jenkins, **and CI/CD pipelines for efficient delivery. Adept at collaborating in Agile/Scrum environments and optimizing app performance for a seamless user experience.**

Technical Skills

- **Frontend Development:** Android (**Jetpack Compose, XML UI**), React, React Native
- **Programming Languages:** Kotlin, Java, Python, JavaScript, SQL
- **Backend Development:** Spring Boot, Python (**FastAPI, Flask**), Node.js, **RESTful & GraphQL APIs**
- **Architecture & Design:** MVVM, **Clean Architecture**, OOP, **SOLID Principles, Dependency Injection (Hilt/Dagger)**, Modular App Development
- **Databases:** Room, Realm, **Firebase Realtime Database**, Firestore, SQLite, PostgreSQL, MongoDB
- **Tools & Infrastructure:** **Android Studio**, Git, Jenkins, Gradle, **CI/CD Pipelines**, GitHub Actions, **Retrofit**, Coroutines, LiveData, ViewModel, AWS, Google Cloud
- **Testing & Quality:** **JUnit**, Espresso, Mockito, Crashlytics, SonarQube
- **Other Skills:** Play Store Deployment, **App Performance Optimization**, UI/UX Implementation, Agile/Scrum

Professional Experience

Tekbricks

Client: CVS Health

01/2025 – Present | Remote, USA

- Developed and maintained **Android applications** using **Kotlin, Jetpack Compose, MVVM**, and **MVI**, delivering high-quality features to **2M+ users**.
- Integrated **RESTful APIs** with **Retrofit** and **Coroutines**, improving **data sync speed** and responsiveness by **25%**.
- Applied **OOP** and **SOLID principles** to build **modular, maintainable, and reusable codebases**, reducing **technical debt** by **15–20%**.
- Implemented **SSL pinning, encrypted storage, and secure key management** to protect **user data**.
- Built **unit tests (JUnit, MockK)** and **UI tests (Espresso)**, achieving **90%+ test coverage** and ensuring **release stability**.
- Collaborated with cross-functional teams and used **Python-based mock servers** to simulate backend APIs, reducing **development and testing cycles** by **25%**.

Amazon

10/2022 – 11/2023 | India

- Developed **Android applications** using **Kotlin, Jetpack Compose**, and **MVVM**, supporting **2M+ users**.
- Integrated backend services with **RESTful APIs, Retrofit, Coroutines**, and **Dagger**, improving **data handling efficiency** and maintainability.
- Implemented **secure communication** using **SSL pinning, encrypted storage, and VPN/SFTP connections**.
- Leveraged **Android framework APIs** including **Google Maps, Camera, Location Manager, and Notification Manager** to deliver **feature-rich experiences**.
- Optimized **app performance** through **profiling, debugging, and lifecycle management** using **ADB, Logcat, and DDMS**, reducing **crash rates** by **30–40%**.
- Managed **CI/CD pipelines** using **Git** and **Jenkins** and published apps to **Google Play** with **In-App Billing (AIDL)** and **beta testing workflows**.

Education

Master of Science, University of Central Missouri
Computer Science

01/2024 – 05/2025 | Missouri, USA

Bachelor of Technology, Vidya Jyothi Institute of Technology
Computer Science Engineering

06/2018 – 05/2022 | Hyderabad, India
