About Me

With over 3 years of experience, I have served as a Java full stack developer, specializing in different projects. Proficient in Java frameworks such as Spring Boot, Hibernate, and JPA, I have collaborated closely with UI/UX designers to ensure adherence to WCAG 2.1 guidelines for user-friendly interfaces. My expertise extends to MEAN stack development with Angular 9, Test Driven Development (TDD), and deployment of J2EE applications in agile CI environments. Additionally, I have implemented CI/CD pipelines using technologies like GIT, Jenkins, and Docker, and contributed to the development of responsive GUIs using JSP, HTML5, CSS3, and Bootstrap.

Work Experience

Java Developer, Cognizant Technology Solutions, Hyderabad, IN.

{May 2019 –August2022}

- Worked as a Java full stack developer in a project called AZ-Veeva to OCR conversion.
- Used various Java frameworks such as Spring Boot, Hibernate, and JPA to develop robust and scalable applications. Collaborated with UI/UX designers to develop user-friendly and visually appealing front-end interfaces by following all the WCAG 2.1 guidelines.
- Used end to end single page web applications using MEAN stack with Angular 9.
- Involved in Test Driven Development (TDD), Unit Tests (JUnit, Mockito), Gradle, JIRA issue navigator, GIT as a part of everyday tasks.
- Involved in Client Scripting language and server-side scripting languages like HTML5, CSS3. Expertise in developing web pages using HTML5, CSS3.
- Strong knowledge JavaScript objects, prototypes, closures, callback functions and promise.
- Involved in design and architecture of the web application. Developed new cross-browser accessible interfaces using Bootstrap, JavaScript with html and CSS. Made the page user-friendly by following all the WCAG 2.1 guidelines.
- Created many REST (GET/POST/PUT/DELETE) service endpoints, both for POST and GET operations using groovy language and rails platform.
- Responsible for setting up Angular 4 framework for UI development. Participated in front end development using Angular 4, JavaScript, HTML5, CSS, JSON and Bootstrap.
- Deployed J2EE applications to Application servers in an agile continuous integration environment and automated the whole process.
- Actively participated and provided feedback in a constructive and insightful manner during weekly Iterative review meetings to track the progress for each iterative cycle and figure out the issues.
- Implemented CI/CD using technologies such as GIT, Jenkins & Open Deploy are used for developing and deploy web services and experienced in Jenkins for building and testing Software projects, created performance test data by using JMeter.
- Involved in the development of presentation layer and GUI responsive development using JSP, HTML5, CSS/CSS3, Bootstrap, jQuery.
- Implemented Spring boot microservices to process the messages into the Kafka cluster setup and used to manage containers using Docker by writing Docker files, setting up automated builds on Docker HUB, installing, and configuring Kubernetes.

Environments: GIT, Jenkins, and Open Deploy, Java 8, Gradle, JIRA issue navigator, GIT, JMeter

Education

Master of Science, Computer Science

Gpa: 4.0

- Central Michigan University, Mount Pleasant, MI
- Major in Computer science
- **Coursework:** Software Engineering, Web Data Management, Software Testing, Database Management, Algorithms, Java programming

Bachelor of Technology, Computer Science and Engineering

Gpa: 3.5

- Jawaharlal Nehru Technological University, Hyderabad, India

Skills

Programming

- **Languages:** Java, JavaScript, python, c, c++
- **Databases:** MySQL, Oracle, Mongo dB
- **Web Technologies:**
Frontend: Angular 9, HTML5, CSS3, Bootstrap, jQuery
Backend: Spring Boot, Hibernate, JPA

- **Developer Tools:** Eclipse, Visual Studio Code, AXEDEV tool, Maven, Tomcat
- **Microservices:** Spring Boot, Docker, Kubernetes
- **Frameworks:** Spring Boot, Hibernate, MEAN Stack (Angular 9)
- **SoftSkills:** Problem solving, Time Management, fast-paced and dynamic environments.
- **Methodologies:** Waterfall, Agile
- **Technical Environment:** Dynamo DB, Java 8, IntelliJ, Python, spring boot, GIT, JIRA, Gradle, SOAP, spring, REST API.
