

SWATHI SOMISETTY
Swathisomisetty1@gmail.com
Phone: +1 3179415782

PROFESSIONAL SUMMARY:

- 6+ Years of IT experience in **Analysis, Design, Development**, experience in both server side and GUI development software Development life cycle (**SDLC and AGILE**), **Implementation and Testing of Web Based, Client-Server and N-tier Architectures**.
- Experience in .Net Core 2.0, .Net Framework 3.5/4.0/4.5, MVC 4.0/5.0, AJAX, Web Services (SOAP), SQL Server 2014/2016/2018 and Web API.
- Designed and developed the user interface, the cost benefit analysis summaries module & the printing modules of application using **JavaScript, jQuery, JSON, and AJAX. HTML/HTML5 AND CSS/CSS3** that helped store operators to execute sales orders more efficiently.
- Strong knowledge of .Net libraries and their practical implications to **WPF, C#, Ajax, XML, DHTML, CSS and JavaScript**.
- Created browser compatible forms using InfoPath 2010 and deployed to Form Library in **SharePoint** Sites.
- Hands on experience in design using **Object Oriented Programming Principles** like **Inheritance, Polymorphism** and design patterns **Like, Singleton, Mvc3.0**.
- Experience of creating rich UI applications in **WPF 4.5/4.0, Silverlight 4.0/3.0** along with XAML programming and Expression Blend 4.0/3.0
- Expertise in using **ADO.NET** object such as **connection Object, Command Object, Data Reader Object, Dataset Object and Data Adapter Object**.
- Involved in the development of the **Web Forms and web pages** according to the specifications. Extensive experience on **AJAX, HTML, XHTML, XACML**.
- Experience in using **SSIS** tools like Import and Export Wizard, Package Installation, and SSIS Package Designer.
- Excellent in front-end UI design implementations by writing **HTML5/HTML, CSS3/CSS, Bootstrap, JavaScript, jQuery, jQuery UI, jQuery Mobile** to make better Single Page Application SPA working on **Node.JS Server**.
- Extensive experience in various UI widgets using JavaScript libraries like **angular.js, backbone.js, Require.js, Ext.js, and Node.js** and developing Rich Internet Applications RIA.
- Strong hands-on programming, design, understanding and deep functional experience in creating, deploying and consuming of **XML Web Services, WPF services, WCF services, REST Services and Web API**.
- Experience in using **ASP.NET AJAX, VB.NET** framework for quickly creating efficient and interactive web application that work across all popular browsers.
- Excellent Experience in writing Data Access Layers using **ADO.net entity Frame Work**.
- Being doing single page Apps using **MVC** especially on **Angular JS** and good experience in Angular JS 2.
- Expert in **HTML5/CSS3** development and have experience in **Backbone.js, Require.js, node.js, angular.js Responsive design**.
- Expert level Experience in **SQL server 2010/2013/2015/2016**, Tables, user Defined functions, **stored Procedures, Cursors and Triggers**.
- Extensive experience developing application **WPF development** including front end designing in **Microsoft Expression Blend & XAML**.
- Experience in development and implementation of windows communication foundation (**WCF**) Responsible for development **WCF** based Service, Data, fault and message Contracts.
- Recent intensive project experience in Silverlight and **WPF (Windows Presentation Foundation)** development including front designing in Microsoft Expression Blend and back programming in Microsoft Visual Studio.
- Experience in **Design patterns like singleton and MVVM** and in working on **Web services, SOAP, AngularJS, , object-oriented Architecture, XML, HTML, DHTML, CSS**.
- Experience in Configuration management, setting up company version policies, build schedule using **Team Foundation server**.

- Knowledge of VSTO in generating reports in MS- Word and MS-Excel and Good experience with Reporting Tools like **SQL server Reporting services (SSRS)**.

TECHNICAL SKILLS:

.Net Technologies	.Net Core 6.0, ASP.NET 3.0/3.5/4.0/4.6, ADO.NET 1.1/2.0/3.5
Languages/Database	C#.NET, SQL, NoSQL, PL/SQL, T-SQL,
Tools/Technologies/patterns	Microsoft Visual Studio 2022/2015/2013/2012/2010, Team Foundation Server (TFS), GitHub, Web API, Win Forms, Azure, WPF, EDI, Entity framework 6, WPF, LINQ, NUnit Testing MVC. RDBMS Oracle, JIRA, UAT, Lambda Expressions.
Web Based	Classic ASP, ASP, ASP.NET 1.1/2.0/3.0/3.5/4.0/4.6 AJAX, ADO.NET, SOAP, CSS, XML, , Bootstrap, HTML, Java Script, Angular JS 1/1,6/2.0, MVVM, MVC, ORM.
GUI&IDE	Visual Studio.NET 2010/2013/2015/2017/2019/2022
RDBMS	MS SL Server 2016/2010/2008/2005/2000, Oracle 8i/9i/10g, 12C.
Reporting Tools	Crystal Reports 9.0/10.0/11.0/12.0, Microsoft SQL Server Reporting Services (SSRS), SSIS
Web Server	IIS 5.0/6.0/7.0
Version Controller	TFS Visual Source Safe, GitHub.
Operation system	Windows 2010/2008.

Educational Details:

- Master of Sciences in Computer Science from Sri Venkateshwara University – 2009
- Master of Philosophy in Computer Science from Sri Venkateshwara University – 2012

PROFESSIONAL EXPERIENCE:

Dot Foods, Illinois
Sr.Net Developer

Jan 2023-Present

- As part of the development team, I was associated with the full life cycle of the project (**analysis,design, development, testing**).
- Worked on agile methodology to meet timelines with quality deliverables.
- Experience working with code base first approach application using **.net core 6.0** .
- Experience working with Integration of Repositories from **SQL to Postgre SQL**.
- Developing multiple new applications from scratch and supporting multiple existing applications.
- Creating the different **RESTful** services using .Net WEB API core, as well as making changes to existing web applications according to the feedback received from the end users.
- Designed the repository layer that maps the data from the database to provide encapsulation over data access layer using Entity Framework Core.
- Used **LINQ** to entities for manipulating the data.
- Designed database schema, tables with relations and required stored procedures, UDFs and views.
- Utilizing experience with version Control tools like GIT hub to manage the code repository to commit, to clone and pull request. Also use for continuous integration, collaboration and communication purposes

Environment: .Net Core 6.0, C#, Entity Framework core, LINQ to SQL, Microsoft SQL Server 2018, Visual Studio 2022, Web API Core, POSTMAN, GIT HUB, JIRA, Azure.

Blue Cross BlueShield of Nebraska , Omaha
Sr.Net Developer

Dec 2021-Dec 2022

Responsibilities:

- Involved in all the phases of Software Development Life Cycle (SDLC) including analysis, design, programming, testing, and deployment.
- Designed and developed an application using Angularjs, HTML5, CSS3, SQL server 2016 and ASP.Net web API.
- Experience in analyzing and communicating User interface design requirements
- Experience using technologies like Entity framework, Rest Services.
- Experience using the MVVM Pattern in WPF.
- Worked on BL and DAL Layer classes and integrated in UI Using MVVM pattern.
- Developed visual components through WPF using XAML and Expression Blend.
- Worked on Binding, Styles, DataTemplate, Control Template, Routed Events, Converts, Layout Panels in XAML.
- Developed GUI using WPF Controls in .NET 4.0, V.S.Net2022, C# and XAML.
- Created the application in .Net framework 4.5 and implement logic using C# and oops concepts.
- Created the application UI using client-side technologies like Javascript, JQuery, Angular JS, CSS3, HTML5, and Ajax.
- Used Angular-JS and typescript for control validations and data format checking.
- Developed form validations on the server side and client side using AngularJS.
- Developing multiple new applications from scratch and supporting multiple existing applications.
- Participated in scrum/agile meetings to update the status of application development.
- Creating the different RESTful services using .Net WEB API core, as well as making changes to existing web applications according to the feedback received from the end users.
- Worked in designing and configuration of the Azure environment. Migrated legacy applications to the Azure cloud platform.

Environment: .Net Core 4.7, ASP.Net MVC,WPF,MVVM, C#, Angular 6, Node JS, AJAX, JSON, Bootstrap, HTML5, CSS, jQuery, Entity Framework core, LINQ to SQL, SQL, Microsoft SQL Server, Visual Studio 2022, Web API Core, POSTMAN, GIT HUB.

State of Kentucky (CHFS), KY

Feb 2021 – Nov 2021

.Net Developer

- Involved in various phases of Software Development Life Cycle (SDLC) using agile methodology.
- Designed and developed an application using **MVC Razor, HTML5, CSS3, SQL server 2018** and ASP.Net web API.
- Experience in analyzing and communicating User interface design requirements.
- Experience in creating Stored Procedures **T-SQL Queries** Triggers and views in SQL Server 2008/2012/2016.
- Experience using technologies like Entity framework, Rest Services.
- Used Entity Framework to create the Models.
- Developed Razor-based user interface for the Application
- Handled **performance tuning and break/fix of existing T-SQL code.**
- Created View Models to encapsulate all models and classes used on the different views for more stable organized and clean code to reuse in Views.
- Extensively Understanding in creating and managing View Models Views Partial Views with using **ASP.NET MVC**
- Implemented model view controller (MVC) architecture with **ASP.NET Core Razor views**, dependency injection (DI) and Entity Framework (EF Core) according to UI layouts and business requirements.
- Participated in scrum/agile meetings to update the status of application development.
- Creating the different RESTful services using **.Net WEB API core**, as well as making changes to existing web applications according to the feedback received from the end users.

- Worked in designing and configuration of the Azure environment. Migrated legacy applications to the Azure cloud platform.

Environment: .Net Core 6.0, ASP.Net MVC, C#, Bootstrap, HTML5, CSS, jQuery, Entity Framework core, LINQ to SQL, SQL, Microsoft SQL Server 2018, Visual Studio 2022, Web API Core, TFS

Inovalon, Pittsburgh, PA
.Net Developer

Jun2019–Jan2021

Responsibilities:

- Involved in Requirements Collection, Design & Analysis of the Customer Specifications, Development and Customization of the Application.
- Designed and developed the project using ASP.NET4.5 design pattern.
- Involved in the complete lifecycle (SDLC) of the project i.e. Design, Development, Implementation, and Unit testing.
- Designed and developed Master pages and User controls.
- Designed and Developed flexible UI, more user interactive and user-friendly rich front-end pages, reusable classes, functions using, C#, and AJAX for client-side validation.
- Developed WCF services to enable effective communication.
- Implemented Web Services to integrate the client systems using WCF.
- Using WCF in client and server side with different security and transport protocols along with data integration, Used WSDL, SOAP, Rest along with SOA and component driven development.
- Used WCF services to store files in a repository, using a file storage service and hosted the service using multiple end points.
- Extensively used ADO.NET features like Data Set, Data View, Data Reader and Data Adapter.
- Implemented state management using View state, Control state, Hidden fields, Cookies, Query strings, Application state, Session state.
- Used Server-side Asynchronous JavaScript, jQuery and XML (AJAX) techniques to improve performance.
- Response UI and website layout is achieved using Bootstrap framework. JQuery helped in bootstrapping web application efficiently without registering call backs which helped in code debugging.
- Extensively used **JavaScript, jQuery** to control the user interactions and validation on client side.
- Developed complex stored procedures and complex SQL queries using SQL Server 2010 for extracting, inserting and deleting the data from database and display on data bound controls and dropdown controls and list boxes.
- Performed unit testing and system integration testing.
- Maintained design requirements documentation with accurate information sharing.
- Prepared training material presentations and related documentation to use for the team.
- Involved in fixing the bugs based on the client requirements and involved in the enhancements in the web forms, class files and stored procedures.

Environment: Visual Studio.Net 2013, ASP.NET4.5, C#, ADO.NET, AJAX, HTML, CSS, Bootstrap, jQuery, WCF, IIS 7.0, SQL Server 2014, TFS.

SJI Solution, India
.Net Developer

Jun 2016 – Dec 2018

Description: SJI solutions are one of the leading companies in Hyderabad, India. This company recruits most talented people who graduated from bachelor's and this company gave me the chance to prove myself.

Responsibilities:

- As part of the development team, I was associated with the full life cycle of the project (**analysis, trading design, development, testing, and implementation**).

- Deploying and managing applications in Datacenter, Virtual environment and **Azure platform** as well.
- Worked with **JQuery, Angular JS 1.6** and **typescript** for the development of the UI and Knowledge on **Web API** and REST, JSON based development experience.
- Involved in the **Software Development Life Cycle** phases like Requirement Analysis, Implementation and estimating the time-lines for the project.
- Created **Restful SOA** services using **ASP.NET Web API** for exposing these to mobile device and Involved in Web Application using **MVC3/MVC4, WEB API**.
- Provided technical assistance for designing and maintenance of enterprise based IVR systems.
- Participated in development of a well responsive single page application using **React JS** framework and JavaScript in conjunction with **Angular JS 1.6, HTML5, CSS3** standards, with front-end **UI team**.
- Worked with **Entity Framework EDMX** and **ORM tool n Hibernate** for creating objects from database table.
- Developed visual components through **WPF** using **XAML** and Expression Blend.
- Enhanced user experience by designing new web features using **MVC Framework** like **Backbone.js, Require.js** and **Node.js**.
- Have created and used **Win Forms** to create functionality in networking module.
- Developed ASP pages using **ASP.NET web form controls, ASP.net Ajax, C#** and **Jquery.ASP.net MVC, HTML 5, Knockout.JS**
- Built a heavy front end using **Angular JS 1.6/HTML/CSS/JavaScript** on top of **.NET MVC 3**
- Developed the user interface for back office support and worked collaboratively in Agile scrum team on the design and development of application based MVC framework using **Angular JS 1.6, HTML 5.0 and CSS3**
- Implemented used SOA architecture using windows Communication foundation (WCF).
- Design responsive and intuitive user interface for the web using **XHTML/CSS** and both custom **ASP.NET, VB.NET, AJAX** scripts.
- Effectively and **ASP.NET** intrinsic **state management functionality** to store application-specific, session-specific, page-specific and user- specific information between page requests.
- Effectively used **ASP.NET** security infrastructure for **authenticating and authorizing** user access as well as performing other security related tasks using **VB.NET**.
- Managed authentication using **ASP.NET form authentication, using windows 10 groups, and using ASP.NET.VB.NET roles**.
- Designed Frontend with in object-oriented JavaScript framework like **Angular.js 1.6 and Ext.js**.
- Handling the tasks of designing and maintaining SQL databases and **VB6** applications and designing of multi-layer forms using designs and layouts in **VB6**
- Effectively used **JQuery** a concise **JavaScript** Library fir traversing **HTML, Angular JS** document, event handling and **AJAX** interactions.
- Created **ASP.NET Validation Controls and Java Script** for client-side validation in the **Web pages and C#** code behind.
- Generated periodic reports based on the statistical analysis of the data from various time frame and division using **SQL Server Reporting Services (SSRS)**
- Developed various operational Drill-through and Drill-down reports using **SSRS**
- Worked on integration of code behind web forms development in **VB.NET** with **Data Access layer** using **ADO.NETSQL server 2013**.
- Wrote business queries in **T-SQL** for policy details and commission processing per sales, have created, and used **Win Forms**.

Environment: .Net Framework 3.0, UFT testing tools, IVR, SharePoint, SSIS, GUI development, Selenium, ASP.Net 2.0/3.0, VB.Net, ADO.Net, SOAP, HTTP, ASP.Net, XML, XSLT, React JS, GitHub, Bootstrap, Azure, Restful SOA, Typescript, JavaScript, Entity framework, VB6, Angular JS 1.6, JIRA, knockout, MVVM IIS 6.0, WPF, NOSQL, HTML, DHTML, Web API, CSS, Require.js, SQL Database, Ajax Toolkit, SSRS, C#, SQL Server 2015.
