

TRUNG(ANTHONY) DOAN

JAVA DEVELOPER

Egg Harbor Township, NJ | (201) 916-1839 |
doant.anthony@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Front-end Technologies: HTML, CSS, Bootstrap, JavaScript, ECMAScript, TypeScript, Angular, React, Front-end debugging and developer tool

Back-end Technologies: Java SE, JDBC, C++, MySQL, Spring Core, Spring AOP, Spring Boot, Spring REST, Spring JPA, Spring Security, JWT- Token, Apache Tomcat Server

Cloud and other technologies: SDLC, GIT, AWS, Agile methodology, Docker, Kubernetes, Kafka, Microservices, UML

WORK EXPERIENCE

Full Stack Software Engineer – Contractor

Apr 2025 – Oct 2025

- Built a web-app for small independent real estate agency
- Redesigned input workflows and streamlined navigation, reducing user friction and increasing repeat session rate by 15%
- Worked closely with business analyst, QA and another developer as part of a project team
- Familiarity with resolving production issues during non-business hours

TD Bank, Wilmington, DE

May 2022 – Aug 2022

Software Development Intern

- Developed an API using JavaScript to organize incoming data to monitor real-time health status of successes and failures and response times of Total System Services (TSYS) sending to Universal Message Platform (SMS) to clients
- Participated in daily stand-ups and sprint planning as part of Scrum Agile methodology
- Completed business requirements analysis and analyzed large data sets to determine process bottleneck
- Collaborated with team members to provide recommendation on improving KPI metrics

United States Air Force

Feb 2015 – Feb 2021

2021 Civil Engineer - Water & Fuels System Maintenance

- Led teams of airmen in ensuring operational readiness and reliability of fueling and mobility support systems
- Diagnosed and resolved complex system integration issues using schematics, layouts, and operation specifications under mission-critical timelines
- Assisted with installing, maintenance, and repair of Fuels Mobility Support Equipment (FMSE), Fuels Operational Readiness Capability Equipment (FORCE), and other contingency fueling assets

PROJECT EXPERIENCE

Cogent University

Feb 2024 – May 2024

Capstone Project: Social Media Platform

- The platform functions alike Twitter, allowing users to create accounts, hashtags, and search posts by utilizing these hashtags
- Integrated JWT token-based authentication, empowering users to post messages and view all posts from their account securely
- Applied OOP principles and design patterns in building microservice components and integrated unit testing and validation for secure authentication workflows
- Additionally, users can engage with others' posts by viewing, commenting, and replying, with validations in place. Furthermore, users have the ability to generate hashtags and search posts using them
- Environment: HTML, CSS, JavaScript, Angular, Java, SpringBoot, JPA, Microservices, MySQL, Docker, Maven, GIT and GITHUB

Shopping List App

Oct 2024 – Jan 2025

- Implemented dynamic price-tracking logic to provide real-time cost analysis for recipes
- Developed a graphical user interface using Java within Android Studio
- Created a recipe price calculator which displays the cheapest dish, given the current ingredient prices

EDUCATION

Cogent University

2024

Certificate of Completion. Cogent University's state-of-the-art development program ensures you remain in sync with the ever-changing technological trends in the market to build the best new technology leaders in Software Development

Bachelor of Science in Computer Science & Information Systems

Sep 2018 – Dec 2022

Stockton University, Galloway Township, NJ

CERTIFICATION

Cogent Certified Java Developer

2024
