PROFESSIONAL EXPERIENCE

Natera

Remote, US

Title: Clinical Data Programmer

Mar 2025 - Present

- Built data visualization solutions for Natera Sponsored Studies, using SQL and Snowflake.
- Created site payment trigger systems using automated report generation and RPA, to ensure accurate and timely site payment per conducted Natera study.
- Initiated ETL data pipelines from Medrio to Snowflake and other Natera data warehouses, to validate EDC data and use it in real time data driven solutions.
- Led database management efforts through schema cleaning and view organization, all utilizing ETL data in real time/

VCU Massey Comprehensive Cancer Center

Richmond, VA

Title: Clinical Research Data Analyst

Oct 2022 - Mar 2025

- Conducted comprehensive data analysis, including SQL queries, to provide real-time status of samples and runs in the lab, delivering actionable insights for process optimization and quality assurance.
- Built and maintained dashboards using Snowflake to track and monitor patient sample statuses and research study recruitment efforts, allowing for accurate study material management and order processing.
- Managed production workflow and QC using a combination of existing software tools and in-house custom solutions.
- Collaborated cross-functionally to maintain data integrity and quality standards within review board and NCI compliance guidelines
- Coordinated regulatory and industry study monitoring using Veeva Sitevault to validate internal source databases against investigator databases
- Designed and maintained REDCap and EDC system workflows for accurate data capture and validation across multiple studies.

VCU College of Humanities & Sciences

Richmond, VA

Title: Clinical Research Data Analyst

Aug 2021 - Aug 2022

- Developed automated scripts in Python and R for data cleaning, preprocessing, and analysis of clinical trial datasets related to vascular health and exercise tolerance.
- Utilized SQL to query and manage patient databases, ensuring efficient data retrieval and integrity.
- Designed and maintained REDCap and EDC system workflows for accurate data capture and validation across multiple studies.
- Implemented statistical models and data visualizations using Python (Pandas, Matplotlib, NumPy) to analyze the effects of stress and antioxidant drug interventions on vascular function.
- Coordinated IRB correspondence, streamlining document organization and submission processes.

EDUCATION

Virginia Commonwealth University

Bachelor of Science in Health Sciences

Richmond, VA

Aug 2018 - May 2022

TECHNICAL SKILLS

- **Programming & Querying Language:** Python, R, SQL, HTML
- **Data Visualization & Analytics:** Tableau, Power BI, Excel, Snowflake
- **Database Management System:** MySQL, PostgreSQL, Snowflake
- **Development Environment:** Visual Studio Code, Cursor, Jupyter Notebook, Git, Snowflake
- **Clinical Data Management Systems:** Medidata, REDCap, OnCore, Merative, Medrio, Sample minded, MACRO
- **Regulatory Compliance & Certifications:** 21 CFR 11, 21 CFR 812, CITI GCP Certified, COG & CTSU Member, ECOG-ACRIN Member
