

Gurwinder K
Java Developer

Gk.Sehmbey90@gmail.com

US Citizen, California (Looking for Remote Opportunity)

669-256-3145

PROFESSIONAL SUMMARY:

- **3+ years** of technical experience in implementation, customization, integration, and support of business application System.
- Thorough experience in Design, Development, Testing, Maintenance and Documenting of various Web-based Applications Client/Server and Distributed applications.
- Having Domain experience in Banking, Health Care, Telecom and Automobile.
- Experience to communicate with End Client to understand the business requirement and prepare business document.
- Expertise in Object Oriented analysis including development and implementation of various applications using **Core Java, J2EE** technologies.
- Good knowledge in developing application using Core java Concepts like **JAVA SWING, Multithreading, Junit, OOP, JDBC, JMD** and **java concepts like HTML, CSS, Servlets, EJB, Web services, Struts.**
- Have Good experience in implementing Web Services like **SOAP, REST, WSDL** and **UDDI.**
- Used **ANT, Maven** and **Gradle** scripts with **Lombok Library** and **Kotlin** for building and deploying in web/App servers.
- Knowledge to design, develop and maintains **Kubernetes Clusters** and **Docker** applications.
- Used **Camunda GUI** and **BPMN** Platform to manage the production deployment in **OpenShift** and **CI/CD** pipelines for deployments.
- Very good knowledge in working with IOC frameworks like **Spring** and **Spring AOP**, ORM frameworks like **Hibernate, JPA** and **MVC Frameworks.**
- Expertise in working with **Windows, LINUX**, and **UNIX** platforms and in environments using **Agile SCRUM** development methodologies.
- Well experience in Design and Development of database systems using **RDBMS** concepts including **Oracle, MySQL** and experience in writing **SQL** queries, **PL/SQL**, Stored Procedures, prepared statements, and triggers.
- Maintain the applications with **Splunk** and **New Relic.**
- Sound knowledge in **Object Oriented programming OOP, Object Oriented analysis**, and **Design OOAD** techniques and developing activity diagrams, sequence diagrams and use case diagrams using tools like **UML** and **Microsoft Visio.**
- Good knowledge in XML technologies including **Java Script, AJAX, CSS, HTML**, Enterprise Java Beans.
- Hands on exposure to various servers like **JBoss, JBOSS DROOLS engine, IBM WebSphere Server**, and **BEA WebLogic.**
- Have good knowledge in design patterns like Singleton **MVC** business delegate factory method end data access object DAO pattern.

- Good knowledge of using IDE tools like rad **NetBeans**, **Eclipse**, **IntelliJ** and **WebLogic** workshop for Java J2EE application development.
- Hands on Experience on **SSO** and **PHP**.
- Have Proficient time management skills, able to deliver assignments with superior quality on schedule and within budget. Possesses high working qualities with good interpersonal skills, highly motivated, fast learner, good team player and very proactive in problem solving with providing best solutions.

TECHNICAL SKILLS:

Hardware: Windows, UNIX, XP-Professional, Windows 2000 Server, MS-DOS

Version Control Tools: Git, VSS, CVS, Clear Case, Perforce

Languages: Java, J2EE, Kotlin, Lombok, Struts, Spring, Hibernate, EJB, Webservice, XML, HTML, JavaScript, PL/SQL

Web Technologies: HTML5, XHTML, DHTML, CSS3, XSLT, JSF, JavaScript

IDE's: Eclipse, NetBeans, RAD, IntelliJ, STS, Camunda

Application Servers: Apache Maven, OpenShift, Splunk, Tomcat, JBOSS, WebLogic, Web Sphere

Database: Oracle, MySQL, MongoDB, MS Access, SQL Server

Frameworks: Camunda BPMN, Splunk, New Relic, Log4j, Spring, Maven, ANT, Apache POI, Struts

Operation Systems: Windows, UNIX, MS-DOS, LINUX, Perl

Web Services: SOAP, REST Web Service, JAX-WS

EDUCATION AND CERTIFICATION:

- Bachelor of Information Technology from Guru Nanak Dev University, India
- Master of Information Technology from Guru Nanak Dev University, India

PROFESSIONAL EXPERIENCE:

Verizon, TX

(Infosys)

September 2021 to February 2024

Role: Technology Lead

Responsibilities:

- Develop application using Core Java, J2EE, Kotlin, Lombok, Spring MVC Framework, Web Services SOAP REST and RESTful APIs in networking domain.
- Involved in Code Digging and creation of Use Case diagrams for the business requirements.

- Developed REST architecture-based web application to facilitate communication between client and servers and implemented to integrate between different components.
- Extensively used JSON to parse the data from server side to satisfy the business requirement.
- Developed Angular JS Controllers to incorporate business logic into application.
- Implemented Multi-threading in application using Spring threading and Async features to consume data from multiple providers simultaneously to improve application performance.
- Design and Develop GUI and back-end components for analysis and collaboration Software in Google Web Toolkit, Java, and XML in a UNIX environment.
- Worked with WebLogic and JBoss servers for deployments and Putty to handle deployments and logs for the production services/applications with uses TCP/IP.
- Involved in writing services using EJB in WSDL.
- Code development using Eclipse. IntelliJ, HTML, JAVA, JSP, SQL, JavaScript, and Servlets.
- Developed Code using Camunda GUI Framework with BPM and BPMN files.
- Involved in Designing Kubernetes Cluster for the application.
- Involved in coordination with Testing teams to resolve defects in the application.
- Worked with Jenkins pipeline to deploy the application as well as worked in OpenShift environment.

Environment: Java 11, J2EE, Kotlin, Camunda, BPMN, PL/SQL, Kafka Brokers, Microservices, SpringBoot, Spring, GitHub, IntelliJ, Oracle, Web Services, Splunk, Jira, Restful API , SoapUI, Agile Scrum, Groovy, Spock Framework, Gradle, Lombok Library, Kubernetes.

Thermo Fisher Scientific, San Diego, CA

(Cognizant Softvision)

December 2020 – August 2021

Role: Java Backend Developer

Responsibilities:

- Implemented the application using Spring Boot Framework Gradle project with latest Lombok Library.
- Configures the web Interfaces using Java and worked on microservices architecture.
- Designed Multiple Micro Services to achieve high throughput through different design patterns.
- Designed and developed REST API Micro services to handle JSON Objects with Mongo DB.
- Used IntelliJ for writing code for JSP, Servlets.
- Used MongoDB databases to develop the API.
- Worked with Elasticsearch search Engine to handle the data coming from Mongo DB.
- Configured the Elasticsearch queries for different scenarios and frame that queries in Java to fetch the data from MongoDB.
- Analyzed the business Requirements for the creation of API.
- Created different Microservices and configured the CI/CD Pipeline in Cloud Platform with GIT Lab.

Environment: Java, J2EE, Microservices, SpringBoot, Spring, GitHub, IntelliJ, MongoDB, Elasticsearch, Web Services, Jira, Restful API , SoapUI, Agile Scrum, Groovy, Spock Framework, Gradle, Lombok Library.
