

CAREER SUMMARY

Junior Software Developer with hands-on experience developing, testing, and debugging Java applications in an enterprise environment. Completed a Global Technology internship at Bank of America, contributing to multiple projects, resolving production bugs, and performing unit testing. Strong foundation in Agile development, code collaboration, and modern DevOps tools.

TECHNICAL SKILLS

Java | Debugging | Object-Oriented Design | Test Automation | Unit Testing | Data Structures | API Integration
| Jira | IntelliJ | Git | MySQL | Copilot | Quality Assurance | Agile Methodologies | Problem Analysis | Code Review

PROFESSIONAL EXPERIENCE

BANK OF AMERICA

Charlotte, NC

Global Tech Intern

July 2025 – Present

- Resolved 10+ software defects by debugging and analyzing Java-based applications, improving application stability and code quality.
- Successfully migrated legacy code and executed unit testing across multiple projects, ensuring smooth transitions and functional software.
- Collaborated with a cross-functional Agile team of 5+ engineers on development projects, learning team coding practices, and communication skills.
- Worked with Jenkins, Jira, SQL Developer, and Bitbucket platforms, becoming skilled with industry-standard software development tools.
- Contributed to over 4+ software projects during internship, gaining wide exposure to different coding challenges and development cycles.
- Coded in Java for software projects, building strong programming skills needed for creating robust applications.

AMAZON

Concord, NC

Warehouse Associate

May 2023 – May 2025

- Processed and handled up to 40,000 boxes per shift in an 855,000 square foot fulfillment center, ensuring efficient inventory management and timely order fulfillment.
- Utilized Amazon Web Services, Logiwa Cloud Fulfillment Platform, and advanced robotics and AI technologies to efficiently manage inventory and optimize warehouse operations.
- Collaborated with a team of 15-30 colleagues daily to ensure smooth warehouse operations, effective communication, and timely completion of tasks.
- Worked in an 855,000 square foot warehouse, efficiently navigating the expansive space to locate and process inventory while meeting strict deadlines.

FOOD LION

Morganton, NC

Quality Assurance

Jan. 2021 – Apr. 2021

- Inspected and tested 20-40 products monthly, utilizing Self Scan Stations, POS System, and Food Lion To-Go to ensure quality and functionality.
- Identified and resolved 10 to 30 quality issues annually, ensuring high standards of product quality in the grocery industry.
- Created Custodian documents, Employee reports, and Customer data reports to track quality assurance metrics and communicate findings to stakeholders.
