

VAIKUNTH DESAI

San Francisco, CA | +1 (669) 588-6967 | vdclassifier@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Science professional with 2+ years of experience in statistical analysis, business analytics, process automation, and cloud computing. Delivering data-driven solutions across technology and finance industries by leveraging machine learning algorithms and data visualization techniques to optimize product performance and enhance decision-making.

EDUCATION

San Francisco State University, California, USA

January 2022 - December 2023

Master of Science, Statistical Data Science

Gujarat Technological University, Gujarat, India

July 2017 - May 2021

Bachelor of Engineering, Computer Engineering

WORK EXPERIENCE

Westside Strategy Partners, San Francisco

February 2024 - Present

Data Scientist

- Built scalable data analytics solutions on **cloud** infrastructure for Asset Management Team with more than **\$100 million** AUM.
- Leveraged **SQL** stored procedures for **quantitative** financial **datasets**, resulting in a **15%** improvement in **portfolio analytics** performance and accuracy.
- Conducted **Python** based **time-series** analysis of fund NAV and presented insights from seasonality and fund trends.
- Utilized data visualization with **Tableau** to build **KPI** dashboards, communicate data insights with **stakeholders** and collaborated with Portfolio Manager to enable **data-driven** decisions.
- Transformed and cleaned trade data using **Pandas**, improving trade file distribution and reconciliation by **40%**.

MultiTech Developers, India

May 2020 - July 2021

Data Analyst

- Applied **R** to create **predictive models** for business **forecasting**, achieving **20%** improvement in accuracy.
- Performed in-depth data analysis to identify key **trends**, driving strategic decisions that increased **client** portfolio diversity by **15** new major accounts.
- Implemented **regression** and **clustering** algorithms to analyze **large datasets**, reducing **fraud risk** and saving more than **\$200K** in potential losses.
- Collaborated with **cross-functional** teams to translate business needs into data-driven solutions, leading to the completion of **5+** projects **ahead of schedule**.

PROJECTS

LinkedIn Post Summarizer Chrome Extension

(JavaScript, OpenAI API, LLM, AWS, HTML/CSS, Data Visualization)

- Built a Chrome extension that summarizes LinkedIn posts using OpenAI, helping users extract insights without FOMO.
- Integrated popup UI, cloud-based saving, personalized summary generation, and a dynamic analytics dashboard with charts on usage trends.

Customer Retention and Business Intelligence Analysis

(Power BI, Python, DAX, Excel, Machine Learning)

- Designed BI dashboards and Python models to uncover 15% higher retention in accessories and optimize bike segment profit margins by 40–50%.
- Automated data pipelines and reporting to streamline retention analysis across product categories.

Walmart Sales Prediction

(Python, Scikit-learn, Pandas, Forecasting, Regression, Time-Series Analysis)

- Deployed regression models to forecast regional sales trends, aiding inventory and promo planning.
- Integrated model outputs into a decision support system for store-level business insights.

TECHNICAL SKILLS

Programming Languages: R, Python, SQL, C++, VBA, Java, Scala, MATLAB

Databases: MySQL, MS SQL, NoSQL, BigQuery, PostgreSQL, Redshift, MongoDB

Tools & Frameworks: Excel, Tableau, Looker, Power BI, ggplot2, Matplotlib, Plotly, SAS, RStudio, Hadoop, Apache Spark, ETL, SSIS, Oracle, AWS, GCP, Azure, GitHub, Snowflake, Databricks

Data Science & Machine Learning: Hypothesis Testing, A/B Testing, ANOVA, Regression, Classification, Time Series Analysis, Keras, PyTorch, TensorFlow, Pandas, NumPy, Seaborn, Scikit-learn, SVM, Clustering, Neural Networks

ACHIEVEMENTS

- Earned the **Google Data Analytics** Professional Certificate
- Published Research Papers in [Big Data](#) field and [Covid Detection](#) using CNN in international journal
