

VARUN KAMMADANAM

Full Stack Developer | Software Developer| H1b Approved (Start: Oct 2024)

Mobile: +1 (973) 752 - 5288 Email: saivarun2022@gmail.com Location: USA LinkedIn: [LinkedIn](#)

SUMMARY

Software Developer with Over 5 years of experience bridging the gap between business needs and robust software solutions. Skilled in designing, developing, and deploying applications across various environments, I leverage industry-standard methodologies like SDLC to ensure successful project delivery. My technical expertise encompasses Java, Spring, Spring Boot, web services, AWS, API/Microservices development, database technologies, open-source tools NGINX/CONSUL, Angular.js or React.js, web application servers, DevOps practices, development tools like Git, Gradle/Maven, testing frameworks, and agile development methodologies like Scrum/Kanban.

TECHNICAL SKILLS

- **Programming Languages:** Java, C, C++, Python, Shell Scripts
- **Java Technologies:** J2EE, JDBC, Servlets, JSPs, EJB, JMS, Spring, Spring Boot
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks and Libraries:** Hibernate, Struts 1.x/2.0, JSF, JQuery, Ajax, Angular.js, Node.js, React.js, Bootstrap, Django
- **Web Services:** JSON, REST, SOAP, JAX-RS, WSDL
- **Application Servers:** Apache Tomcat, IBM WebSphere, BEA WebLogic, JBoss, GlassFish, Tomcat, Jetty
- **Cloud Services:** Amazon EC2, Amazon S3, Amazon RDS, AWS Lambda, AWS CloudWatch, AmazonEBS, Amazon CloudFront, Azure, Kubernetes
- **Open Source Technologies:** NGINX/CONSUL framework, Angular.js, React.js, SQL/NoSQL Databases
- **Service-Oriented Architecture Technologies:** RESTful
- **Database Technologies:** Oracle, SQL Server, MySQL, Sybase 12.5, DB2, MongoDB, Cassandra
- **Development Tools:** Eclipse, IntelliJ IDEA
- **Version Control and Collaboration Tools:** Git, SVN, GitHub
- **Build and Continuous Integration Tools:** Maven 3.x, Jenkins 2.x, SonarQube
- **Testing Frameworks:** JUnit, Selenium, TDD, Code Testability Standards, Mockito
- **Operating Systems:** Windows, UNIX, Linux, macOS

PROFESSIONAL EXPERIENCE

OPTUM Inc		
Full Stack Developer	July 2023 – Present	Philadelphia, PA
• Worked with Core Java, J2EE, and Spring Framework, including Spring Boot, Spring Cloud, Java EE, and Spring Web Flux, to develop scalable and robust enterprise applications with a focus on reactive programming. • Designed and managed databases using SQL, Oracle, and MySQL/Postgres, ensuring optimal performance and data integrity. • Developed front-end solutions using HTML, CSS, and JavaScript, with experience in React for building interactive and responsive user interfaces. • Implemented SOAP and RESTful APIs, collaborating closely with UI developers to integrate and optimize API endpoints. • Hands-on experience with API management tools like APIGEE, enabling efficient API lifecycle management. • Utilized streaming technologies such as Kafka and RabbitMQ for real-time data processing, enhancing system responsiveness and scalability. • Worked with cloud platforms, including AWS, Azure, and Google Cloud, for deploying and managing scalable cloud-based solutions. • Designed and developed distributed systems to ensure high availability, reliability, and performance. • Utilized version control systems, particularly Git and GitLab, to manage code repositories and collaborate on development projects. • Configured CI/CD pipelines using GitLab CI, automating the build, test, and deployment processes for efficient software delivery.		

- Gained expertise in cache mechanisms like Redis, Memcached, and Hazelcast to optimize application performance and reduce latency.
- Managed containerization using Docker, ensuring consistent environments across development, testing, and production.
- Employed container orchestration and management platforms, including Kubernetes, for efficient scaling and management of microservices.
- Proficient in using IDEs such as IntelliJ IDEA, Eclipse, and Visual Studio Code for efficient software development.
- Deployed Java applications on application servers like Tomcat, ensuring reliable and scalable deployment processes.
- Familiar with project management and collaboration tools, such as Jira, for tracking project progress and facilitating team communication.
- Applied system design and architecture principles to create scalable, efficient, and maintainable software solutions.

Northern Trust Corporation
Full Stack Developer

Jan 2023 – May 2023

Chicago, IL

- Currently working on a project involving Core Java, J2EE, Servlets, JSP, JDBC, MVC, Spring Framework, and Hibernate.
- Implemented Kubernetes services, pods, and replication controllers, which facilitated automatic failover and load balancing.
- Worked in a collaborative agile environment as a Full Stack Developer at Northern Trust.
- Familiar with Agile Scrum principles and actively participated in scrum ceremonies.
- Extensive experience with Spring components like Spring MVC, Spring Security, Spring Integration, Spring Data JPA, and Spring Boot.
- Practical knowledge of Spring Data Redis and Spring Data MongoDB.
- Strong understanding of integration with backend data systems including SQL, PostgreSQL, JPA/Hibernate, and NoSQL Databases like Redis and DocumentDB.
- Designed and implemented RESTful services as part of the current project. Collaborated with UI developers to integrate new/modified API endpoints with newly created UI.
- Experience with Docker and Kubernetes for containerization and orchestration. Familiar with cloud platforms like AWS and Google Cloud.
- Proficient in using development tools like Eclipse, IntelliJ, GitLab, JIRA, and Confluence. Comfortable writing developer tests using JUnit with Mockito and Spock.
- Worked closely with Business Analysts to ensure clear requirements. Performed code reviews for peer developers.

Fusion Tech Solutions
Software Development Engineer

May 2019 – Dec 2021

Hyderabad, India

- Conducted web crawling and scraping to extract strings and values from HTML content using advanced techniques and tools.
- Developed and implemented Java code to process and utilize extracted data, ensuring performance and accuracy.
- Utilized XPath to efficiently capture various types of strings from web pages.
- Analyzed competitors' data to create effective deals for customers, enhancing our market competitiveness.
- Set optimized threshold values for automation tasks to maintain efficiency and effectiveness.
- Facilitated communication and collaboration within the team, specifically with Retail, Adhoc, and SMAC
- Developed algorithms for promotional activities, leveraging data and analytics to drive customer engagement and sales.
- Responsible for training new joiners on multiple tools for performing functions such as monitoring competitors' behavior, Web crawling, etc.
- Involved in designing and implementation of MVC design pattern using Struts framework for Web-tier.
- Provide escalated ticket/incident management supported applications as well as will participate in defect management, issue tracking/trending

EDUCATION

Master's in Computer Science

Stevens Institute of Technology, Hoboken, New Jersey

Bachelor of Technology in Computer Science and Engineering

Gitam University, Hyderabad, India

CERTIFICATIONS

- Completed a specialization in Developing APIs with Google Cloud's Apigee API Platform, covering API design, security, and deployment. Gained hands-on expertise in integrating API management tools for enterprise-scale solutions
- Achieved Oracle Cloud Infrastructure 2023 Certified Foundations Associate, showcasing proficiency in Oracle Cloud services, infrastructure management, and cloud architecture principles. Certified to implement secure and scalable cloud solutions.
- Certified in Version Control with Git, gaining advanced skills in branching strategies, pull requests, and collaborative workflows using Git on platforms like GitHub, GitLab, and Bitbucket. This enhances version control efficiency in software projects.
