EDUCATION

Colorado State University Global

Master in Computer Science – Solutions Architect

Pennsylvania State University

Bachelor in Computer Science – The Behrend College

Remote

Erie, PA

EXPERIENCE

Metlife

Full Stack Engineer (React, Node.js, GraphQL, Java, Springboot, Microservices, DevOps)

Remote, PA

Jan 2024 - Present

- Participated in the full Software Development Life Cycle (SDLC) using Agile methodology (SCRUM), contributing to analysis, design, implementation, and testing phases.
- Led development and maintenance a scalable financial transaction management system using Java, Spring Boot, Spring MVC, and Hibernate, ensuring high performance and security for processing large volumes of financial transactions.
- Designed and implemented RESTful APIs with Java and Express.js, integrating backend services and enhancing data exchange between systems.
- Managed data storage and optimized query performance using MongoDB and SQL, ensuring efficient data retrieval and handling for complex financial transactions.
- Utilized React.js and JavaScript to build dynamic, interactive user interfaces, enhancing the user experience and supporting a responsive web design.
- Automated end-to-end testing using Selenium, Postman, and Git for version control, ensuring seamless deployment cycles and high-quality code.
- Worked in Agile/Scrum environments to deliver a robust microservices architecture, incorporating Jenkins and GitHub for CI/CD pipelines, streamlining code integration and deployment processes.

Liberty Mutual Insurance

Full Stack Engineer (Python, FastAPI, Angular, AWS, Azure, AI/ML)

Pittsburg, PA

March 2021 – Nov 2023

- Created a robust NLP solution to classify client data, achieving a fivefold reduction in response time while maintaining 95% accuracy, ultimately boosting user satisfaction and engagement significantly.
- Designed and developed over 20+ interactive data visualization dashboards using Power BI, improving data comprehension and enabling more accurate and refined classification of predictive models.
- Involved in full SDLC and utilized Agile/Scrum methodologies to ensure timely delivery of key features, meeting 95% of sprint goals and improving system efficiency.
- Sculpted responsive front-end user interfaces with Angular and Node.js, improving customer engagement and reducing page load time by 25%.
- Developed and integrated clearing system functionalities using Spring, REST, SQL, Hibernate, and MQ, enhancing transaction processing speed and overall system performance by 30%.
- Implemented MongoDB for flexible, high-performance data management, supporting real-time updates and maintaining 15% faster application response time.
- Experience in working with AWS and proficient with EC2, S3, and RDS with high availability, scalability, and deploying infrastructures and backend compute service using Lambda.
- Recognized optimal microservice divisions using server statistics, enhancing architecture performance and operational efficiency.
- Conducted an in-depth AWS time series cost analysis, resulting in savings of \$2,50,000 across 20 cluster deployments by implementing strategic cloud architecture optimization and cost control measures.

Project Experience

SikeWear | Node.js, React, TypeScript, Claude SDK, OpenAI, AI Architecture

Erie, PA

- Developed and deployed scalable web services using the M.E.R.N stack (MongoDB, Express, React, Node.js) and designed RESTful APIs to facilitate client-server communication, enhancing backend efficiency by 30%.
- Integrated and optimized 3D product models on the frontend using React and react-three-fiber, improving user interaction and visual representation for product-based websites.
- Implemented automated end-to-end testing frameworks with Python and Selenium to ensure data integrity and backend database performance, reducing system bugs by 95% and improving deployment reliability.

AR/WebXR for Public Engagement, A.S.U and NASA | Java Script, FastAPI, Next.js, TypeScript, NLP, Agentic AI

Erie, PA

- Developed and integrated interactive features using HTML, CSS, and JavaScript to enhance user engagement on the ASU NASA Psyche Mission website, resulting in a 40% increase in average session duration.
- Collaborated with UX/UI designers to create a seamless user experience on the ASU-NASA Psyche Mission website, resulting in an increase of 20% in page views.
- Conducted thorough end-to-end testing to ensure functionality across all devices, resulting in a 95% bug-free user experience.

SKILLS

ML/AI	:	NLP, Deep Learning, AI Agent, LLMs, Data Pipeline Development, RAG, Prompt Engineering
Programming Languages	:	Java, C++, Python
Frameworks/ Web Technologies	:	Spring, Spring Boot, Node.js, React.js, NEXT.js, Axios.js, Express.js, Angular JS, PyTorch, TensorFlow, Flask, FastAPI, HTML5, CSS3, Tailwind, JavaScript, RESTful APIs, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap
Databases/ IDEs	:	Oracle, MySQL, SQL Server, Supabase, PostgreSQL, Prisma, MongoDB, IntelliJ IDE, Visual Studio Code
Version Control & Other Tools	:	Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant, Jenkins
DevOps/ Cloud Platform	:	Docker, Kubernetes, AWS, Azure
Extras	:	Windows, Linux, SDLC, Agile, Waterfall, Effective verbal and written communication, Problem-solving, and Troubleshooting skills
