EDUCATION

University of Wisconsin - Green Bay, Green Bay, WI

May 2026

- Bachelor of Science Degree – Computer Science with Emphasis in Software Engineering

WORK EXPERIENCE

Information Technology Intern - West Bend Insurance Company, West Bend, WI May 2025 – Aug 2025

- **Contributed** to the migration of over **40 applications** from **Okta** to **Microsoft Entra** for **client credential authentication**, supporting an enterprise-wide **identity consolidation** initiative project to save **\$300K annually**.
- **Enhanced observability** across multiple services and applications by implementing deep ping **health check functionality** using **endpoint validation**. Integrated with **Azure, WB APIM, CosmosDB**, and **Guidewire** systems to enable **real-time monitoring** of service **availability**, improving system reliability and operational insight.\
- Collaborated in an **Agile development environment**, participated in daily standups and sprint planning to deliver features on schedule.
- **Selected** as the **winning team** in West Bend's **internal competition** to **represent** the company in the **Light the Hoan Intern Challenge** for **Greater Milwaukee**, showcasing **innovative solutions** with measurable **community impact**.

Software Engineering Intern - O'Connor Wealth Management, Mequon, WI

May 2024 – Sept 2024

- **Designed and developed** responsive websites, ensuring cross-platform compatibility and optimal user experience using **HTML, CSS, and JavaScript**.
- **Updated and maintained web applications**, integrating new **features and security** patches across various platforms.
- **Developed custom JavaScript tools** to automate account **management tasks**, reducing manual processes and improving efficiency by around 20%.

PROJECTS

Medieval Munchers

- **Engineered** a Java-based 2D game with custom rendering and collision detection, creating seamless interactions between dynamic entities.
- Employed **advanced collision detection algorithms**, synchronized with game ticks, to ensure **seamless interaction** between the player and dynamic entities.
- Illustrated creativity and attention to detail by meticulously **crafting all player models and images from scratch**, infusing the game with a distinctive aesthetic.

Krypton API

- **Built a comprehensive user authentication system**, utilizing **JavaScript, TypeScript, SQL, and EJS**, improving security by integrating encryption protocols.
- **Streamlined data retrieval processes**, enabling faster access to user data, enhancing developer productivity by 25%.
- Simplified API integration, reducing setup time for developers by 50% through intuitive design and robust **frontend/backend** collaboration.

TECHNICAL SKILLS

Programming Languages

- Frontend: JavaScript (ES6+), HTML5, CSS3, React, EJS
- Backend: C#, C++, Java, SQL

Tools & Technologies

- Version Control: Git, GitHub
- Cloud & Identity: Microsoft Azure, Microsoft Entra, Okta, Redstone
- Database Management: MySQL, SQL
- Methodologies: Agile
